

Contents

PART I. OVERVIEW

Chapter 1

Clinical Applied Psychophysiology: Introduction	3
<i>A. Ronald Seifert, Niels Birbaumer, and John G. Carlson</i>	
The Conference and a Changing World Order	3
The Chapters	6
I. Overview	6
II. Disorders of the Central Nervous System	9
III. Disorders of the Cardiovascular System	10
IV. Applied Psychophysiology and Respiration	13
V. Neuromuscular Disorders	16
VI. Long-Term Stress	19
Conclusion	20

Chapter 2

Schopenhauer's Ethics and the Concept of Behavioral Self-Regulation	21
<i>Wolfgang Tunnner</i>	
Reference	25

PART II. DISORDERS OF THE CENTRAL NERVOUS SYSTEM

Chapter 3

Biofeedback of Slow Cortical Potentials in Epilepsy	29
<i>Niels Birbaumer, Brigitte Rockstroh, Thomas Elbert, Peter Wolf, Andreas Düchting-Röth, Martin Reker, Irene Daum, Werner Lutzenberger, and Johannes Dichgans</i>	
Introduction: Behavioral and Psychophysiological Treatment of Epilepsy	29
Study 1	31
Study 2	32
<i>Biofeedback Procedure</i>	33
<i>Learning of Slow-Cortical-Potential Control</i>	35
<i>Treatment Effects</i>	37
<i>Factors That Determine the Outcome of the Behavioral Slow-Cortical- Potential Treatment</i>	38
Summary	39
References	40

Chapter 4

The P300 Event-Related Brain Potential in Psychiatric and Neurological Diagnosis	43
<i>J. P. Rosenfeld</i>	
References	51

PART III. DISORDERS OF THE CARDIOVASCULAR SYSTEM

Chapter 5

Type A and Cardiovascular Responsiveness in Italian Blue Collar Workers	55
<i>Giorgio Bertolotti, Ezio Sanavio, Elisabetta Angelino, Ornella Bettinardi, Giorgio Mazzuero, Giulio Vidotto, and Anna Maria Zotti</i>	
Introduction	55
Method	58
<i>Subjects</i>	58

<i>Procedure</i>	59
<i>Equipment and Measures</i>	59
Results	61
Discussion	65
References	68

Chapter 6

Psychological Factors Affecting Ambulatory Blood Pressure in a High-Stress Occupation	73
--	----

David Shapiro, Iris B. Goldstein, and Larry Jamner

Ambulatory Blood Pressure Monitoring as a Research Tool	71
Job Stress and Blood Pressure	75
Research on Paramedics	76
Clinical Implications	83
References	85

Chapter 7

Mechanisms and Treatment of Raynaud's Disease and Phenomenon	89
---	----

Robert R. Freedman

Introduction	89
Etiology	89
Raynaud's Disease	91
<i>Behavioral Treatments</i>	91
<i>Medical Treatments</i>	96
Secondary Raynaud's Phenomenon	96
Conclusions	97
References	98

PART IV. APPLIED PSYCHOPHYSIOLOGY AND RESPIRATION

Chapter 8

Sleep-Disordered Breathing: Preliminary Natural History and Mortality Results	103
--	-----

*Sonia Ancoli-Israel, Melville R. Klauber, Robert L. Fell, Linda Parker,
Lynne A. Kenney, and Richard Willens*

Methods	105
---------------	-----

<i>Subjects</i>	105
<i>Apparatus</i>	105
<i>Procedure</i>	106
<i>Statistical Methods</i>	106
Results	107
<i>Natural History Results</i>	107
<i>Mortality Results</i>	108
Discussion	108
References	109
 Chapter 9	
Significance of Breathing Awareness and Exercise Training for Recovery after Myocardial Infarction	113
<i>Jan van Dixhoorn</i>	
Introduction	113
<i>Breathing Awareness</i>	115
<i>Research Questions</i>	116
Patients and Methods	117
<i>Patients</i>	117
<i>Procedure</i>	117
<i>Measurements</i>	118
<i>Treatments</i>	119
Results	120
<i>Training Outcome</i>	120
<i>Psychological Changes</i>	120
<i>Respiration and Body Sensation</i>	123
<i>Social Recovery Three Months Later</i>	125
<i>Cardiac Events</i>	127
Discussion	128
<i>Effect of Breathing Awareness</i>	128
<i>Training Outcome</i>	129
<i>Rehabilitation Policy</i>	130
References	131
 Chapter 10	
Respiration in Clinical Psychophysiology: How to Assess Critical Parameters and Their Change with Treatment	133
<i>Robert Fried</i>	
Introduction	133

Assessment: The Psychophysiological Respiration Profile	137
<i>Method</i>	138
<i>Typical Findings</i>	143
<i>Sample Clinical Case Profiles</i>	145
Summary	154
References	154

Chapter 11

Breathing: Physiological Reasons for Loss of Self-Control	157
<i>P. G. F. Nixon</i>	
Diagnosis and Clinical Testing	162
Physiological Testing	163
Conclusions	164
Summary	166
References	166

PART V. NEUROMUSCULAR DISORDERS

Chapter 12

Psychophysiological Methods in the Assessment and Treatment of Chronic Musculoskeletal Pain	171
<i>Herta Flor and Niels Birbaumer</i>	
Theoretical Background	171
Response Specificity in Chronic Musculoskeletal Pain	174
Behavioral Treatment of Chronic Musculoskeletal Pain	178
Conclusions	182
References	183

λ Chapter 13

Overcoming Learned Nonuse: A New Approach to Treatment in Physical Medicine	185
<i>Edward Taub</i>	
Somatosensory Deafferentation in Monkeys	186
<i>Background</i>	186
<i>Behavioral Methods for Overcoming Motor Deficit following Unilateral Forelimb Deafferentation in Monkeys</i>	187

<i>Bilateral Forelimb Deafferentation</i>	188
<i>Spinal Shock</i>	189
<i>The Central Question: Difference in the Results for Bilateral and Unilateral Deafferentation</i>	190
Learned Nonuse	190
<i>The Learned Nonuse Formulation</i>	191
<i>Direct Test of the Learned Nonuse Hypothesis</i>	193
<i>Previous Research with Humans</i>	194
An Experiment on Overcoming Learned Nonuse in Humans after Stroke	197
<i>Recent Clinical Use of the Learned Nonuse Approach</i>	204
<i>Relevant Issues for Interpretation of the Data</i>	205
<i>Applicability of the Learned Nonuse Model to Chronic Stroke Patients with Motor Deficit</i>	208
Excess Motor Disability	210
Overcoming Learned Nonuse and the Use of Biofeedback in Rehabilitation Medicine	213
Summary	216
References	217

PART VI. LONG-TERM STRESS

Chapter 14

Quartets in Antarctic Isolation	223
<i>A. J. W. Taylor and M. M. Brown</i>	
Methods	223
<i>Subjects and Preparation</i>	223
<i>Instruments</i>	225
Results	226
Discussion and Conclusions	248
References	249

Chapter 15

Notes on the Use of Biological Markers in the Study of Long-Term Stress	251
<i>Tores Theorell</i>	
Change in Cross-Sectional Correlation Patterns with Change in Job Strain	252

What Is the Relationship between Acute Physiological Reactions during a Crisis Situation and Resulting Long-Term Difficulties?	256
Blood Pressure Recordings at Night and at Work	258
References	260
Index	261
