List of Contributors ix

PART 1. GAZE CONTROL AND THE MAPPING OF SPACE

1 The neural encoding of the location of targets for saccadic eye movements 3
David L. Sparks

2 Spatio-temporal patterns of activity on the motor map of cat superior colliculus 20
D. Guitton, D. P. Munoz, and D. Pélisson

3 Eye–head co-ordination: influence of eye position on the control of head movement amplitude 38
Vincent Delreux, Sylvie Vanden Abeele, Philippe Lefèvre, and André Roucoux

4 A neurophysiological model for the directional coding of reaching movements 49
Marc Jeannerod

5 Spatial programming of eye movements 70
John Schlag, Madeleine Schlag-Rey, and Paul Dassonville

PART 2. REFERENCE FRAMES AND MOVEMENT CONTROL

6 Reference frames for the perception and control of movement 81
Alain Berthoz

7 Proprioception as a link between body space and extra-personal space 112
Jean Pierre Roll, Régine Roll, and Jean-Luc Velay

8 Parietal cortex area 5: a neuronal representation of movement kinematics for kinaesthetic perception and movement control? 133
John F. Kalaska

9 Perceptual and automatic aspects of the postural body scheme 147
V. S. Gurfinkel and Yu. S. Levick

10 Motor and representational framing of space 163
Jacques Paillard

PART 3. THE PARIETAL CORTEX AND SPATIAL DISORDERS

11 Space and the parietal association areas 185
John F. Stein

12 Congruent representations of visual and somatosensory space in single neurons of monkey ventral intra-parietal cortex (area VIP) 223
Jean-René Duhamel, Carol L. Colby, and Michael E. Goldberg

13 Brain and space: some deductions from the clinical evidence 237
Graham Ratcliff

14 Extinction and neglect: same or different? 251
Edoardo Bisiach

15 Self-motion and ocular motor disorders affect motion perception 258
T. Brandt, M. Dieterich, and T. Probst

PART 4. THE HIPPOCAMPUS AND SPATIAL MEMORY

16 The hippocampal cognitive map and navigational strategies 273
John O'Keefe

17 Spatial firing correlates of neurons in the hippocampal formation of freely moving rats 296
R. U. Muller, J. L. Kubie, E. M. Bostock, J. S. Taube, and G. J. Quirk

18 The hippocampus, exploratory activity, and spatial memory 334
C. Thinus-Blanc, E. Save, M.-C. Buhot, and B. Poucet

19 Functions of the primate hippocampus in spatial processing and memory 353
Edmund T. Rolls

PART 5. MODELS OF SPACE REPRESENTATION

20 Interaction of multiple representations of space in the brain 379
Michael A. Arbib

21 Neurocomputing concepts in motor control 404
Pietro Morasso and Vittorio Sanguineti

22 Sensorimotor space representation: a neuromimetic model 433
Jean-Claude Gilhodes, Yves Coiton, and Jean-Luc Velay

23 A model for the co-operation between cerebral cortex and cerebellar cortex in movement learning 446
Y. Burnod and M. Dufossé

EPILOGUE

24 Knowing where and knowing how to get there 461
Jacques Paillard
