

Contents

PART ONE EARLY DEVELOPMENTAL FACTORS RELATED TO LATERALIZATION	1
1 The Emergence of Cerebral Asymmetries in Early Human Development: A Literature Review and a Neuroembryological Model	5
<i>Catherine T. Best</i>	
Functional Asymmetries in Infants, 6 Proposal for a Lateralized Gradient in Neuroembryological Development, 11 Conclusion, 30 References, 31	
2 Anatomical Development of the Corpus Callosum in Humans: A Review with Reference to Sex and Cognition	35
<i>Sandra F. Witelson and Debra L. Kigar</i>	
Overview of Empirical Studies, 36 Total Corpus Callosum: Absolute Size, 40 Developmental Course of Absolute Callosal Size, 43 Sex and Callosal Size, 45 Hypothesis of Developmental Course of Callosal Growth, 51 Callosal Growth and Implications for Cognition, 52 Summary, 54 References, 55	
3 Laterality in Animals: Brain and Behavioral Asymmetries and the Role of Early Experiences	59
<i>Victor H. Denenberg</i>	
Brain Laterality in Animals: Some Examples, 59 Early Experiences, Brain Laterality, and Behavioral Asymmetry in the Rat, 63 Early Experiences, Brain Laterality, and the Corpus Callosum, 66 Summary, 68 References, 68	
4 A Prenatal Source for the Development of Hemispheric Specialization	73
<i>Gerald Turkewitz</i>	
Plan of the Chapter, 73 Fetal Responsiveness to the Acoustic Environment, 74 Characteristics of the Uterine Acoustic Environment, 76 Prenatal Auditory Functioning, 77 Anatomic Heterochrony, 77 Establishment of Hemispheric Specialization, 78 Other Factors, 78 Implications for Differences between Subpopulations, 79 References, 80	
PART TWO LATERALIZATION IN NORMAL DEVELOPMENT	83
5 Behavioral Asymmetries in Normal Children	85
<i>Merrill Hiscock</i>	
Background, 86 The Evidence, 89 General Problems, 148 Directions for Future Research, 158 References, 159	

6	Electrophysiological Indices of the Early Development of Lateralization for Language and Cognition, and Their Implications for Predicting Later Development	171
	<i>Dennis L. Molfese and Jacqueline C. Betz</i>	
	Electrophysiological Procedures, 171 Stage 1: Evidence for Functional Laterality for Speech Perception in Young Infants, 173 Stage 2: The Search for Hemispheric Specificity, 177 Stage 3: Electrophysiological Indices of Early Lateralized Processes as a Means to Predict Future Language Development, 184 Stage 4: Lateralization and Early Word Acquisition, 186 References, 188	
7	Cerebral Asymmetry and Emotion: Developmental and Individual Differences	191
	<i>Richard J. Davidson and Nathan A. Fox</i>	
	Lateralization of Emotional Functions: Core Neuropsychological Evidence, 192 EEG Studies of Stimulus-Elicited Affect in Adult and Infant Populations, 193 Frontal Asymmetry and Expression of Facial Signs of Emotion, 197 Individual Differences in Frontal Activation Asymmetry: Relation to Affective Style in Adults and Infants, 199 What Do Frontal Activation Asymmetries Reflect?, 201 Summary and Conclusions, 203 References, 204	
8	Right-Brain Training: Some Reflections on the Application of Research on Cerebral Hemispheric Specialization to Education	207
	<i>Lauren Julius Harris</i>	
	Teaching the Left Brain: The Old Orthodoxy, 207 Current Developments in Research on Lateral Specialization, 208 Teaching the Right Brain, 211 Evaluation, 219 Conclusions, 226 References, 230	
9	The Effect of “Right Brain/Left Brain” Cognitive Profiles on School Achievement	237
	<i>Harold W. Gordon</i>	
	Dyslexia, 237 Mainstream Education, 240 Conclusion, 252 References, 254	
PART THREE HANDEDNESS AND INTELLECTUAL DEVELOPMENT		257
10	Sinistrality, Brain Organization, and Cognitive Deficits	259
	<i>Marcel Kinsbourne</i>	
	Non-Right-Handedness as Deviancy, 259 Pathological Left-Handedness, 260 Early Left-Hemisphere Insult and Sinistrality, 262 Sinistrality and Psychometric Findings in the General Population, 263 Sinistrality and Reading Disability: The Relationship, 270 Sinistrality and Reading Disability: The Mechanism, 270 Conclusion, 275 References, 276	
11	Human Hand Preference: Three Nondextral Subtypes	281
	<i>Paul Satz, Henry V. Soper, and Donna L. Orsini</i>	
	Pathological Left-Handedness (PLH), 282 Ambiguous Handedness (AH), 282 Natural Left-Handedness (NLH), 284 Conclusions, 284 References, 285	

- 12 Pathological Left-Handedness: An Analysis of Theories and Evidence** **289**
Lauren Julius Harris and Douglas F. Carlson
 Introduction, 289 Nonclinical Populations, 292 Theories, 292 Measurement of Handedness and Distribution in the General Population, 301 Anatomical and Physiological Foundations of Hand Control and Handedness, 315 Nature, Site, and Timing of Pathology, 322 Is the Left Hemisphere More at Risk than the Right? 328 Potential Risk Variables for PLH, 331 Can Left-Hemisphere Injury Cause PLH? Evaluation of the Two-Type Unilateral Lesion Model, 336 Is All Left-Handedness PLH? Evaluation of the One-Type Model, 345 Conclusions and Suggestions for Further Research, 357 References, 359
- PART FOUR LATERALIZATION AND ATYPICAL DEVELOPMENT** **373**
- 13 Misconceptions and New Conceptions about Early Brain Damage, Functional Asymmetry, and Behavioral Outcome** **375**
Jacqueline Liederman
 Misconception 1: All Children with Atypical Functional Asymmetry Have Suffered Brain Damage, 376 Misconception 2: Knowledge of the Locus of Brain Damage Is Sufficient to Predict Behavioral Outcome; Behavioral Laterality Data Provide No Additional Information, 377 New Conceptions about Three Kinds of Brain Organization That May Underlie Atypical Laterality: General Issues, 378 Directions for Future Research, 392 References, 394
- 14 The Development of Cognition and Personality in X Aneuploids and Other Subject Groups** **401**
Charles Netley and Joanne Rovet
 Cognition and Some Biological Factors, 401 A Theoretical Proposal, 407 Personality and Some Biological Factors, 409 A Theoretical Proposal, 413 References, 414
- 15 Cognitive Sequelae of Unilateral Lesions Acquired in Early Childhood** **417**
Dorothy M. Aram and Harry A. Whitaker
 Subject Specification and Measurement, 418 Review of Recent Studies, 420 Summary, 434 References, 435
- 16 Cerebral Lateralization in Autism: Clues to Its Role in Language and Affective Development** **437**
Geraldine Dawson
 Hemisphere Functioning in Autism: A Review of the Evidence, 438 The Role of Abnormal Hemispheric Functioning in Autism, 450 The Role of Abnormal Hemispheric Functioning in the Affective and Social Deficits of Autistic Children, 454 Summary and Conclusions, 456 References, 458
- 17 Childhood Depression and Medically Treatable Learning Disability** **463**
Roger A. Brumback
 Biological Depressive Disorder, 463 Symptomatology of Depression in Children, 467 Representative Biological Correlates of Depression, 471 Depression,

	Neurological Function, and Neuropsychological (Cognitive) Function, 472	
	Depression and the Hemisyndromes of Cerebral Hemispheric Dysfunction, 475	
	Neurobiology of Depression, 493 Evaluation and Treatment Implications, 496	
	References, 497	
PART FIVE	LATERALIZATION IN LEARNING-DISABLED CHILDREN	507
18	Does Laterality Make Any Difference? Thoughts on the Relation between Cerebral Asymmetry and Reading	509
	<i>M. P. Bryden</i>	
	The Basic Data, 510 Models of Disturbed Laterality, 515 Choice of a Laterality Measure, 516 Problems with Statistical Measurement, 517 Subject Selection, 518 Some Suggestions, 518 What Would It Mean?, 520 An Alternative View, 521 Conclusions, 521 References, 522	
19	Dual Processing Models of Learning Disability	527
	<i>John R. Kershner</i>	
	The Models, 528 Major Issues on Which the Models Disagree, and Learning Disability Hypotheses, 530 Testing the Models, 538 Summary and Discussion, 539 Conclusions, 543 References, 544	
20	Subtypes of Learning-Disabled Children: Implications for a Neurodevelopmental Model of Differential Hemispheric Processing	547
	<i>Byron P. Rourke and John L. Fisk</i>	
	Introduction, 547 Patterns of Abilities and Deficits of Selected Surveys of Learning-Disabled Children, 548 Socioemotional and Personality Dimensions of Subtypes of Learning-Disabled Children, 557 Theoretical Implications, 561 References, 563	
21	Deficient Lateralization in Learning-Disabled Children: Developmental Lag or Abnormal Cerebral Organization?	567
	<i>John E. Obrzut</i>	
	Historical Perspective of Learning Disabilities, 567 Dichotic Listening, 569 Visual Half-Field, 576 Verbal-Manual Time Sharing, 581 Current Investigation in Laterality, 584 Conclusions, 585 References, 586	
22	The Impact of Early Developmental History on Cerebral Asymmetries: Implications for Reading Ability in Deaf Children	591
	<i>Cheryl Gibson</i>	
	Cerebral Asymmetry in Deaf Children: A Review of the Literature, 591 Some Conclusions about Cerebral Asymmetry in the Deaf, 599 Cerebral Asymmetry and Reading Ability: An Experiment, 600 Neuropsychological Models of Language, 602 Conclusion, 603 References, 603	
	Index	605
