

Contents

Preface xiii

PART ONE	Foundations	1
1	The Origins and Methods of Physiological Psychology	3
	Understanding Self-Awareness: A Physiological Approach	5
	<i>Blindsight</i>	<i>6</i>
	<i>Split Brains</i>	<i>7</i>
	<i>INTERIM SUMMARY</i>	<i>9</i>
	The Nature of Physiological Psychology	10
	<i>The Goals of Research</i>	<i>10</i>
	<i>Biological Roots of Physiological Psychology</i>	<i>11</i>
	<i>Functionalism: Natural Selection and Evolution</i>	<i>14</i>
	<i>INTERIM SUMMARY</i>	<i>18</i>
	Methods of Physiological Psychology	18
	<i>Experimental Ablation</i>	<i>18</i>
	<i>Study of the Living Human Brain</i>	<i>20</i>
	<i>Recording the Brain's Electrical Activity</i>	<i>23</i>
	<i>Electrical Stimulation of the Brain</i>	<i>25</i>
	<i>INTERIM SUMMARY</i>	<i>26</i>
	Key Concepts	26
	Suggested Readings	26
2	Cells of the Nervous System	27
	Cell Structure	29
	<i>Neurons</i>	<i>29</i>
	<i>Supporting Cells of the Nervous System</i>	<i>34</i>
	<i>The Blood-Brain Barrier</i>	<i>37</i>
	<i>INTERIM SUMMARY</i>	<i>38</i>
	Neural Communication: An Overview	38
	Communication within a Neuron	40
	<i>Measuring Electrical Potentials of Axons</i>	<i>41</i>
	<i>The Membrane Potential: Dynamic Equilibrium</i>	<i>43</i>

<i>The Action Potential</i>	46	
<i>Conduction of the Action Potential</i>		49
<i>INTERIM SUMMARY</i>	52	
Synaptic Transmission	52	
<i>Structure of Synapses</i>	53	
<i>Neural Integration</i>	54	
<i>Release of Transmitter Substance</i>		55
<i>Activation of Receptors</i>	58	
<i>Ionic Movements During Postsynaptic Potentials</i>	59	
<i>Termination of the Postsynaptic Potential</i>		60
<i>Autoreceptors</i>	61	
<i>INTERIM SUMMARY</i>	61	
Key Concepts	62	
Suggested Readings	62	
3 The Nervous System and Endocrine System		63
Neuroanatomical Methods	65	
<i>Basic Nomenclature</i>	65	
<i>Discovering the Parts and Connections of the Nervous System</i>	67	
<i>INTERIM SUMMARY</i>	71	
Basic Features of the Nervous System		72
<i>Meninges</i>	72	
<i>The Ventricular System</i>	72	
<i>INTERIM SUMMARY</i>	75	
The Central Nervous System		75
<i>The Forebrain</i>	76	
<i>The Midbrain</i>	86	
<i>The Hindbrain</i>	89	
<i>The Spinal Cord</i>	89	
<i>INTERIM SUMMARY</i>	91	
The Peripheral Nervous System (PNS)		92
<i>Spinal Nerves</i>	92	

<i>Cranial Nerves</i>	92	
<i>Autonomic Nervous System</i>	94	
Glands and Hormones	98	
<i>Exocrine Glands</i>	98	
<i>Endocrine Glands</i>	98	
<i>INTERIM SUMMARY</i>	100	
Key Concepts	102	
Suggested Readings	102	
4 Biochemistry of Behavior	103	
Transmitter Substances	104	
<i>Acetylcholine</i>	105	
<i>The Monoamines</i>	105	
<i>Amino Acid Transmitter Substances</i>	107	
<i>Peptide Neurotransmitters</i>	108	
<i>Neuromodulators</i>	109	
<i>Biochemically Defined Neural Systems</i>	110	
<i>INTERIM SUMMARY</i>	111	
Pharmacology of Synapses	112	
<i>Effects on Production of Transmitter Substances</i>	112	
<hr/>		
PART TWO Perception and Movement		129
5 Vision	131	
Vision: The Stimulus	133	
The Visual System: From Eye to Brain	133	
<i>The Eye</i>	133	
<i>Photoreceptors</i>	136	
<i>The Visual Pathway</i>	138	
<i>INTERIM SUMMARY</i>	139	
Perceiving Visual Features	140	
<i>Transduction</i>	141	
<i>Mapping Receptive Fields</i>	143	
<i>Detecting Edges: Role of Lateral Inhibition</i>	145	
<i>Feature Detectors in the Primary Visual Cortex</i>	147	
<i>Feature Detection in the Visual Association Cortex</i>	154	
<i>INTERIM SUMMARY</i>	155	
Color Vision	156	
<i>Color Coding in the Retina</i>	156	
<i>Color Coding in the Lateral Geniculate Nucleus</i>	158	
<i>Color Coding in the Cortex</i>	158	
<i>INTERIM SUMMARY</i>	160	
Effects of Brain Damage on Human Visual Perception	161	
<i>Apperceptive Visual Agnosia</i>	161	

*Effects on Storage and Release of Transmitter
Substances* 113

Effects on Receptors 114

*Effects on Re-uptake or Destruction of
Transmitter Substance* 116

INTERIM SUMMARY 117

Drugs That Affect Behavior 118

Drugs That Cause Sedation 118

Drugs That Cause Excitation 121

*Drugs That Modify Perceptions or Produce
Hallucinations* 122

Psychotherapeutic Drugs 123

Analgesic Drugs 123

INTERIM SUMMARY 124

Understanding Opiate Addiction 124

INTERIM SUMMARY 127

Key Concepts 127

Suggested Readings 127

Associative Visual Agnosia 162

INTERIM SUMMARY 164

Key Concepts 164

Suggested Readings 164

**6 Audition, the Body Senses, and the Chemical
Senses** 165

Audition 167

The Stimulus 167

The Ear 167

Auditory Hair Cells 169

The Auditory Pathway 170

Detection of Pitch 174

Detection of Loudness 175

Detection of Timbre 176

Detection of the Location of Sounds 176

*Behavioral Functions of the Auditory
System* 179

INTERIM SUMMARY 179

Vestibular System 181

The Vestibular Apparatus 181

The Receptor Cells 183

The Vestibular Pathway 183

INTERIM SUMMARY 184

Somatosenses 185

The Stimuli 185

<i>Anatomy of the Skin and Its Receptive Organs</i>	186
<i>Detection of Cutaneous Stimulation</i>	186
<i>The Somatosensory Pathways</i>	189
<i>Perception of Pain</i>	191
<i>INTERIM SUMMARY</i>	193
Gustation	194
<i>The Stimuli</i>	194
<i>Anatomy of the Taste Buds and Gustatory Cells</i>	195
<i>Detection of Gustatory Information</i>	196
<i>The Gustatory Pathway</i>	196
<i>Neural Coding of Taste</i>	197
<i>INTERIM SUMMARY</i>	198
Olfaction	198
<i>The Stimulus</i>	198
<i>Anatomy of the Olfactory Apparatus</i>	198
<i>Transduction of Olfactory Information</i>	200
<i>Detection of Specific Odors</i>	200
<i>Recordings of Neural Responses to Olfactory Stimuli</i>	200
<i>INTERIM SUMMARY</i>	201
Key Concepts	202
Suggested Readings	202

PART THREE Motivated Behavior	229
8 Sleep and Waking	231
Sleep: A Physiological and Behavioral Description	233
<i>Description of a Night's Sleep</i>	233
<i>Mental Activity During Sleep</i>	237
<i>INTERIM SUMMARY</i>	238
The Functions of Sleep	239
<i>The Evolution of Sleep</i>	239
<i>Sleep as a Period of Restoration</i>	240
<i>Sleep as an Adaptive Response</i>	244
<i>INTERIM SUMMARY</i>	245
Disorders of Sleep	246
<i>Insomnia</i>	246
<i>Narcolepsy</i>	247
<i>Problems Associated with Slow-Wave Sleep</i>	248
<i>INTERIM SUMMARY</i>	249
Biological Clocks	250
<i>Circadian Rhythms and Zeitgebers</i>	250
<i>The Neural Basis of Biological Clocks</i>	251
<i>INTERIM SUMMARY</i>	255
Neural Mechanisms of Sleep and Waking	255
<i>Brain Stem Arousal Mechanisms</i>	256

7 Control of Movement	203
Muscles	205
<i>Skeletal Muscle</i>	205
<i>Smooth Muscle</i>	208
<i>Cardiac Muscle</i>	208
<i>INTERIM SUMMARY</i>	208
Reflex Control of Movement	208
<i>The Monosynaptic Stretch Reflex</i>	208
<i>The Gamma Motor System</i>	210
<i>A Polysynaptic Reflex</i>	210
<i>INTERIM SUMMARY</i>	211
Control of Movement by the Brain	211
<i>Organization of Motor Cortex</i>	212
<i>Cortical Control of Movement</i>	212
<i>Deficits of Verbally Controlled Movements: The Apraxias</i>	217
<i>The Basal Ganglia</i>	221
<i>The Cerebellum</i>	222
<i>The Reticular Formation</i>	226
<i>INTERIM SUMMARY</i>	226
Key Concepts	227
Suggested Readings	227
<hr/>	
<i>Brain Stem Mechanisms of Slow-Wave Sleep</i>	258
<i>Forebrain Mechanisms of Slow-Wave Sleep</i>	261
<i>Neural Mechanisms of REM Sleep</i>	263
<i>INTERIM SUMMARY</i>	266
Key Concepts	267
Suggested Readings	267
9 Reproductive Behavior	268
Sexual Development	269
<i>Production of Gametes</i>	270
<i>Fertilization</i>	270
<i>Development of the Gonads</i>	270
<i>Development of the Internal Sex Organs</i>	271
<i>Development of the External Genitalia</i>	272
<i>Sexual Maturation</i>	273
<i>INTERIM SUMMARY</i>	276
Hormonal Control of Sex-Related Behavior	276
<i>Hormonal Control of Female Reproductive Cycles</i>	276
<i>Hormonal Control of Sexual Behavior of Laboratory Animals</i>	277

<i>Effects of Pheromones</i>	280
<i>Human Sexual Behavior</i>	283
<i>INTERIM SUMMARY</i>	289
Neural Control of Sexual Behavior	290
<i>Spinal Mechanisms</i>	290
<i>Brain Mechanisms</i>	291
<i>INTERIM SUMMARY</i>	293
Maternal Behavior	294
<i>Maternal Behavior in Rodents</i>	294
<i>Stimuli That Elicit and Maintain Maternal Behavior</i>	296
<i>Hormonal Control of Maternal Behavior</i>	296
<i>Neural Control of Maternal Behavior</i>	298
<i>Human Maternal Behavior</i>	298
<i>INTERIM SUMMARY</i>	300
Key Concepts	300
Suggested Readings	301
10 Ingestive Behavior	302
The Nature of Physiological Regulatory Mechanisms	304
Water Balance	305
<i>Fluid Compartments of the Body</i>	305
<i>Physiological Control of Water and Sodium Balance</i>	306
<i>INTERIM SUMMARY</i>	308
Drinking	309
<i>Volumetric Thirst</i>	310
<i>Osmometric Thirst</i>	312
<i>Satiety</i>	313
<i>INTERIM SUMMARY</i>	315
Eating	316
<i>Storage and Utilization of Nutrients</i>	317
<i>INTERIM SUMMARY</i>	320
<i>What Starts a Meal? The Glucostatic Hypothesis</i>	320
<i>INTERIM SUMMARY</i>	322

PART FOUR Learning and Communication

12 Learning and Memory	361
Learning to Perceive: Visual Memory of Objects	363
<i>INTERIM SUMMARY</i>	367
Human Anterograde Amnesia	368
<i>Korsakoff's Syndrome</i>	369
<i>Temporal Lobectomy</i>	369
<i>The Nature of Anterograde Amnesia</i>	370
<i>INTERIM SUMMARY</i>	373
The Role of the Hippocampus in Learning: Studies with Laboratory Animals	373

<i>What Stops a Meal?</i>	323
INTERIM SUMMARY	328
<i>Neural Mechanisms</i>	328
INTERIM SUMMARY	331
<i>Eating Disorders</i>	332
INTERIM SUMMARY	335
Key Concepts	335
Suggested Readings	335
11 Aggressive Behavior	336
Nature and Functions of Aggressive Behaviors	337
Neural Control of Aggression	338
<i>Species-Typical Nature of Attack</i>	338
<i>Attack Elicited by Electrical Brain Stimulation</i>	339
<i>Neural Control of Aggression</i>	340
INTERIM SUMMARY	343
Hormonal Control of Aggression	344
<i>Intermale Aggression</i>	344
<i>Social Aggression by Females</i>	345
<i>Maternal Aggression</i>	347
<i>Infanticide</i>	350
<i>Effects of Androgens on Human Aggressive Behavior</i>	351
INTERIM SUMMARY	352
Psychosurgery and the Suppression of Human Violence	353
<i>The Case for Psychosurgery: The "Dyscontrol Syndrome"</i>	354
<i>Rationale for Psychosurgery: Animal Studies</i>	355
<i>Alternatives to Psychosurgery</i>	356
INTERIM SUMMARY	356
Key Concepts	356
Suggested Readings	357

359

<i>Spatial Perception and Learning</i>	373
<i>Participation in Classical Conditioning</i>	377
INTERIM SUMMARY	379
Reinforcement	381
<i>Discovery of Reinforcing Brain Stimulation</i>	381
<i>Anatomy of Reinforcement: The Role of Dopaminergic Neurons</i>	383
INTERIM SUMMARY	385
The Cellular Basis of Learning	385
<i>Short-Term Memory</i>	385

<i>Long-Term Memory</i>	386
<i>Investigating the Physiology of Long-Term Memory: Model Systems</i>	387
<i>INTERIM SUMMARY</i>	401
Key Concepts	402
Suggested Readings	402
13 Human Communication	403
Speech Production and Comprehension: Brain Mechanisms	405
<i>Studying Speech Disorders</i>	405
<i>Lateralization</i>	406
<i>Speech Comprehension: Wernicke's Aphasia</i>	407
<i>Speech Production: Broca's Aphasia</i>	411
<i>Repetition and Verbal Short-Term Memory: Conduction Aphasia</i>	414
<i>Memory of Words: Anomic Aphasia</i>	416
<hr/>	
PART FIVE Disorders	443
14 Neurological Disorders	445
Tumors	446
Seizure Disorders	448
Cerebrovascular Accidents	451
<i>INTERIM SUMMARY</i>	452
Disorders of Development	452
<i>Toxic Chemicals</i>	452
<i>Inherited Metabolic Disorders</i>	453
<i>Down's Syndrome</i>	455
<i>INTERIM SUMMARY</i>	455
Degenerative Disorders	455
<i>Parkinson's Disease</i>	456
<i>Alzheimer's Disease</i>	456
<i>Multiple Sclerosis</i>	458
<i>INTERIM SUMMARY</i>	458
Disorders Caused by Infectious Diseases	459
<i>INTERIM SUMMARY</i>	460
Key Concepts	460
Suggested Readings	460
15 Mental Disorders	461
Schizophrenia	463
<i>Description</i>	463

<i>Aphasia in Deaf People</i>	417
<i>Memory of Meanings of Words</i>	418
<i>Prosody: Rhythm and Emphasis in Speech</i>	421
<i>INTERIM SUMMARY</i>	422
Reading and Writing Disorders	422
<i>Relation to Aphasia</i>	422
<i>Alexia with Agraphia</i>	423
<i>Pure Alexia</i>	424
<i>Pure Agraphia</i>	425
<i>Toward an Understanding of Reading</i>	428
<i>INTERIM SUMMARY</i>	434
Communication of Emotions	435
<i>Studies with Normal Subjects</i>	436
<i>Studies with Neurological Patients</i>	438
<i>INTERIM SUMMARY</i>	440
Key Concepts	441
Suggested Readings	441
<hr/>	
<i>Heritability</i>	464
<i>Pharmacology of Schizophrenia: The Dopamine Hypothesis</i>	465
<i>Schizophrenia as a Neurological Disorder</i>	473
<i>INTERIM SUMMARY</i>	476
Major Affective Disorders	477
<i>Description</i>	477
<i>Heritability</i>	478
<i>Physiological Treatments</i>	478
<i>Role of Monoamines</i>	480
<i>Role of Circadian Rhythms</i>	482
<i>INTERIM SUMMARY</i>	483
Key Concepts	484
Suggested Readings	484
Glossary	485
References	499
Name Index	519
Subject Index	525
