List of Contributors	ix
Preface	xi
1 Cognitive Representations and Processes in Number Production: Evidence from Cases of Acquired Dyscalculia	1
<i>Michael McCloskey, Scott M. Sokol, Roberta Ann Goodman-Schulman, and Alfonso Caramazza</i>	
Cognitive Mechanisms in Number Processing	2
Linguistic Structure of Verbal Numbers	3
Subject HY: Lexical Representation and Retrieval in Verbal Number Production	4
A Model of Spoken Verbal Number Production	8
Subject AT: Morphology and the Production Lexicon	14
Syntactic Frames and Semantic Representations	18
Written versus Spoken Verbal Number Production	23
Summary and Conclusion	26

2	Phonological Deficits in Aphasia: Theoretical Perspectives	33
	<i>Sheila E. Blumstein</i>	
	The Primitives of Phonological Representation: Their Organization and Structure	34
	Dichotomy Between Phonological Planning and Phonetic Implementation	40
	Neural Instantiation of the Phonetic/Phonological Component	44
3	Neuropsychology of Sentence Parsing	55
	<i>Marcia C. Linebarger</i>	
	Introduction	55
	Evidence for Modularity	57
	Evidence about Language Processing	83
	Conclusions	117
4	Lexical Processing and Sentence Comprehension in Aphasia	123
	<i>Edgar Zurif, David Swinney, and Merrill Garrett</i>	
	Grammatical Class Effects in Sentence Processing	124
	Exhaustive Lexical Access in Sentence Processing	129
5	Short-Term Memory Impairment and Language Processing	137
	<i>Eleanor M. Saffran</i>	
	Introduction	137
	Defining the STM System	138
	Brain Damage and the STM Function	148
	Sentence Comprehension Deficits in STM Patients	156
	Conclusion	163
6	Image Generation in the Cerebral Hemispheres	169
	<i>Jeffrey D. Holtzman and Stephen M. Kosslyn</i>	
	A Right Hemisphere Imagery Deficit	172
	Isolating the Deficit	178
	Conclusions	184
	Afterword	184

7 Hierarchical Distributed Networks in the Neuropsychology of Selective Attention	187
<i>Michael I. Posner</i>	
Framework	188
Computational Analysis of Visual-Spatial Attention	191
Neural Systems of Visual-Spatial Attention	195
Hierarchies of Distributed Networks for Spatial Attention	202
Nonspatial Selective Attention	204
Conclusions	205
8 The Effects of Attentional Deficits on Reading and Spelling	211
<i>Argye E. Hillis and Alfonso Caramazza</i>	
Subjects	215
Experimental Tasks	218
Reading	218
General Discussion	247
Appendix A	259
Appendix B	260
Author Index	277
Subject Index	285
