PREFACE v

CONTRIBUTORS xvi

Part I Attention and Set

1. Sequential effects of foreperiod duration: some strategical factors in tasks involving time uncertainty (*J. Alegria*)
   - I. Introduction . . . 1
   - II. Method . . . 3
   - III. Results . . . 5
   - IV. Discussion . . . 7
   - References . . . 9

2. Set and lateral asymmetry in the perceived sequence of speech and nonspeech (*P. Bertelson and F. Tisseyre*)
   - I. Introduction . . . 11
   - II. Experiment . . . 15
   - References . . . 18

3. Hemispheric differences in the utilization of advance information (*G. Cohen*)
   - I. Introduction . . . 20
   - II. Method . . . 23
   - III. Results . . . 26
   - IV. Discussion . . . 28
   - References . . . 32

4. The attaining and maintaining of preparation (*R. Gottsdanker*)
   - I. Introduction . . . 33
   - II. Attaining experiment . . . 35
   - III. Maintaining I. Positive probes . . . 39
   - IV. Maintaining II. Negative probes . . . 42
   - V. Maintaining III. Indefinite number of signal instants . . . 43
   - VI. Irregular responses . . . 45
   - VII. Discussion . . . 47
   - References . . . 49

5. Acquisition of automatic processing in perceptual and associative learning (*D. LaBerge*)

I. Introduction 50
II. Model of automatic perceptual processing 51
III. Model of automatic associative learning 57
IV. Discussion 60
References 63

6. Effort, recognition and recall in auditory attention (*D. Kahneman*)

I. Introduction 65
II. Experiment I. Word recognition in focused and in divided attention as a function of presentation rate 66
III. Analysis of recognition performance 67
IV. Indices of competition between simultaneous items . . . 68
V. Contingencies between simultaneous words in recognition . 71
VI. Experiment 2. Recall and recognition of divided attention . 72
VII. Experiment 3. Stimulus set and the control of attention . 76
VIII. Review of conclusions 79
References 79

7. The mechanism of hemispheric control of the lateral gradient of attention (*M. Kinsbourne*)

I. Introduction 81
II. Experiment 1 (Earle and Kinsbourne, 1973). Perceptual gradients within a visual half-field 83
III. Experiment 2 (Earle and Kinsbourne, 1973). Verbal biasing of the detection of gaps in vertical lines 84
IV. Experiment 3 (Eisner, Poon and Kinsbourne, 1973). Direction of prior head and eye turning affects latency of associating to a letter 86
V. Experiment 4 (Eisner, Poon and Kinsbourne, 1973). Effects of relatively unpractised word load on response latency as determined by direction of prior turning 87
VI. Experiment 5 (Kinsbourne and Briggs, 1973). Report of dichotic digits by hemispherectomized patients 88
VII. Experiment 6 (Kinsbourne and Briggs, 1973). Auditory search by hemispherectomized patients 89
VIII. Experiment 7 (Kinsbourne, Trevarthen and Sperry, 1973). Search for letters callosally-sectioned subjects 90
IX. Experiment 8 (Kinsbourne, Trevarthen and Sperry, 1973). Visual search for single or dual targets 91
References 95

8. Loci of contextual effects on visual word-recognition (*D. E. Meyer, R. W. Schvaneveldt and Margaret G. Ruddy*).

I. Introduction 98
II. Experiment 1. Interaction of semantic context and stimulus quality 102

III. Experiment 2. Effects of graphemic and phonemic relations on visual word-recognition 107
IV. Experiment 3. Comparison of performance in lexical-decision and pronunciation tasks 109
V. Conclusion. Toward a theory of visual word-recognition . . 112
References 116

9. A data base for theories of selective listening (*N. Moray*)
I. Introduction 119
II. Experimental methods 120
III. Data 120
IV. Discussion 129
V. Conclusion 133
Acknowledgements 134
References 134

10. The effects of set on the tachistoscopic recognition of pictures (*R. G. Pachella*)
I. General information 137
II. Experiment 1 141
III. Experiment 2 148
IV. Experiment 3 151
V. Summary 154
References 155

11. Multiple attention in continuous verbal tasks (*L. H. Shaffer*)
I. Introduction 157
II. Apparatus 158
III. Text effects 159
IV. Modality effects 161
V. What is attention? 165
References 166

12. The locus and role of attention in memory systems (*R. M. Shiffrin*)
I. Introduction 168
II. Experiments 171
III. General discussion 189
IV. Concluding remarks 191
References 191

13. Generalization of conditioned GSRs in dichotic listening (*J. M. Von Wright, K. Anderson and U. Stenman*)
I. Introduction 194
II. Pilot experiment 196
III. Main experiment 198
IV. Discussion 202
Acknowledgement 203
References 203

Part II Immediate Memory

14. Imagery and visual working memory (*A. D. Baddeley S. Grant, E. Wight and N. Thomson*)
I. Introduction . . . 205
II. Experiment 1 . . . 207
III. Experiment 2 . . . 210
IV. Experiment 3 . . . 213
Acknowledgement . . . 217
References . . . 217

15. Inferential problems in echoic memory (*R. G. Crowder*)
I. Introduction . . . 218
II. The sampling approach . . . 219
III. The interference approach . . . 221
IV. Other evidence . . . 222
V. Critique of sampling and interference methods . . . 223
VI. Stop consonants . . . 225
VII. Short and long vowels . . . 226
VIII. Echoic memory and speech perception . . . 227
References . . . 228

16. Some studies on the retention of order information (*S. Dornic*)
I. Introduction . . . 230
II. The experiments . . . 231
III. Comments on experiments 1–4 . . . 234
IV. Phonological coding and order information . . . 236
V. Concluding remarks . . . 238
References . . . 239

17. Some remarks on short-term memory (*A. F. Sanders*)
I. Introduction . . . 241
II. Effect of proactive interference (P1) . . . 242
III. Rapid forgetting and the recency effect . . . 246
IV. Effects of retroactive interference . . . 248
V. Retention, recoding, and positional cues . . . 249
VI. Retrieval cues and STM paradigms . . . 253
VII. The nature of retrieval rules . . . 254
VIII. Phonemic v. semantic similarity . . . 256
IX. Modality effects . . . 258
X. Epilogue . . . 261
References . . . 262

18. On the contents of primary memory (*T. Shallice*)
I. Introduction . . . 269
II. Experiment 1 . . . 270
III. Experiment 2 . . . 273
IV. General discussion . . . 277
Acknowledgements . . . 279
References . . . 279

Part III: Information Transmission; times for the identification of signals and the selection of responses

19. Reaction time exchange functions in choice tasks (*R. J. Audley, D. J. Caudrey, P. Howell and D. J. Powell*)
I. Introduction . . . 281
II. Experiment . . . 282
III. Results . . . 284
IV. Discussion . . . 292
References . . . 294

20. Two-choice reactions as an ordered memory scanning process (*J. C. Falmagne, S. P. Cohen and A. Dwivedi*)
I. Introduction . . . 296
II. A serial, two-choice reaction time experiment . . . 298
III. A two-state model . . . 305
IV. Model II . . . 327
V. Concluding remarks . . . 339
Appendix . . . 341
References . . . 343

21. Naming latencies to mixed sequences of letters and digits (*B. Forrin*)
I. Introduction . . . 345
II. Experiment 1 . . . 346
III. Experiment 2 . . . 348
References . . . 355

22. The representation of motor programmes (*S. W. Keele*)
I. Introduction . . . 357
II. Method . . . 360
III. Results and discussion . . . 361
References . . . 365

23. An invariance in choice reaction time with varying numbers of alternatives and constant probability (*S. Kornblum*)
I. Introduction . . . 366
II. Objectives . . . 367
III. Method . . . 368
IV. Results and discussion . . . 371
V. Sequential analysis . . . 373
VI. Concluding remarks . . . 380
References . . . 381

24. Saccadic eye-movements and the refractory period (*E. D. Megaw*)
I. Introduction . . . 383
II. Experiment 1 . . . 386
III. Experiment 2 . . . 390
IV. Discussion . . . 391
References . . . 394

25. Programming sequences of complex responses (*P. M. A. Rabbitt, S. M. Vyas and S Feamley*)

I. Introduction 395
II. Experiment 1 397
III. Experiment 2 400
IV. Experiment 3 401
V. Experiment 4 408
VI. Experiment 5 414
References 416

26. The components of response latency in simple human information processing tasks (*J. Theios*)

I. Introduction 418
II. Stimulus input time 419
III. Stimulus identification time 419
IV. Response determination time 424
V. Response programme selection time 433
VI. Response output time 436
VII. Overall response latency 437
Acknowledgements 438
References 438

27. Drugs, time uncertainty, signal modality and reaction time (*D. A. Trumbo and A. W. K. Gaillard*)

I. Introduction 441
II. Method 444
III. Results 446
IV. Discussion 450
References 454

28. Where Angell feared to tread: response time and frequency in three-category discrimination (*D. Vickers*)

I. Introduction 455
II. Experiment 1 461
III. Experiment 2 463
IV. Experiment 3 464
V. Experiment 4 465
VI. Discussion 466
References 467

29. Display layout, strategy and reaction time: tests of a model (*A. T. Welford*)

I. Introduction 470
II. Method 474
III. Results and discussion 474
IV. Problems and prospects 481
Acknowledgements 484
References 484

Part IV Long Term Memory and Conceptual Organization

30. Some remarks on long-term memory (*R. C. Atkinson and K. T. Wescourt*)

I. Introduction 485
II. Structural aspects of the memory system 487
III. Representations of information in memory 488
IV. Structure of knowledge and events in memory 492
V. Concluding remarks 495
References 496

31. Memory storage and retrieval: some limits on the reach of attention and consciousness (*G. Mandler*)

I. Introduction 499
II. Retrieval from organized memory 501
III. The hierarchical model of memory and some possible bases of fundamental retrieval limitations 509
IV. The limited reach of consciousness 512
References 514

32. Organization in the kitchen (*J. Morton and R. Byrne*)

I. Introduction 517
II. Verification—two kinds of knowledge 518
III. Multiple classification 522
IV. Ingredients—a different kind of list 524
V. Menus—retrieval and construction 525
VI. The task 526
Appendix 527
References 528

33. Cognitive organization and learning (*D. A. Norman*)

I. Memory and learning 530
II. The learning of complex material 533
III. What should we teach? 542
IV. Toward a new learning theory 545
References 545

34. Phonemic organization and search through long-term memory (*P. T. Smith and K. F. Jones*)

I. Introduction 547
II. Method 551
III. Results 553
IV. Discussion 560
Acknowledgement 562
References 562

Part V Perception and Comparison of Complex Stimuli

35. Successive stages in word recognition (*J. Baron*)

I. Introduction . . . 563
II. Experiment 1 . . . 564
III. Experiment 2 . . . 567
IV. Experiment 3 . . . 569
V. Experiment 4 . . . 569
VI. Experiment 5 . . . 571
VII. Experiment 6 . . . 571
VIII. Discussion . . . 572
References . . . 574

36. The recognition of words which cannot be recalled (*D. E. Broadbent and M. H. P. Broadbent*)

I. Introduction . . . 575
II. The basic finding . . . 576
III. Effects of practice . . . 581
IV. Effects of list categorization . . . 585
V. An attempted resolution of paradoxes . . . 587
References . . . 589

37. Access to memory: an analysis of recognition times (*M. C. Corballis*)

I. Introduction . . . 591
II. Search theory . . . 592
III. Direct-access strength theory . . . 602
IV. Theories combining serial scanning with strength theory . . . 606
References . . . 610

38. Application of the Posner technique to the study of size and brightness irrelevancies in letter pairs (*D. W. J. Corcoran and D. Besner*)

I. Introduction . . . 613
II. Experiment 1 . . . 616
III. Experiment 2 . . . 623
IV. Discussion of experiments 1 and 2 . . . 626
References . . . 628

39. Gradients and schema in pattern recognition (*R. Hyman and N. H. Frost*)

I. Introduction . . . 631
II. Experiment 1 . . . 634
III. Experiment 2 . . . 637
IV. Experiment 3 . . . 645
V. Experiment 4 . . . 649
VI. Experiments 5, 6 and 7 . . . 652
VII. General discussion . . . 653
References . . . 654

40. Effects of correlated and uncorrelated noise on visual pattern matching (*R. S. Nickerson*)

I. Introduction 655
II. Correlated versus uncorrelated noise 657
III. Noise level 659
IV. Sequential versus simultaneous stimulus presentation . . 659
V. "Same" versus "different" RT 660
VI. Method 661
VII. Results 662
VIII. Discussion 664
References 667

41. Facilitation and inhibition in the processing of signals (*M. I. Posner and C. R. R. Snyder*)

I. Theories of attention 669
II. Matching experiments 671
III. Classification 675
IV. Conclusions 680
References 681

42. Encoding and memory processes for visual displays (*D. L. Scarborough and H. Scarborough*)

I. Introduction 683
II. Method 685
III. Results 688
IV. Discussion 690
V. Conclusion 695
References 696

43. Brief visual storage of shape and movement (*A. Treisman, R. Russell and J. Green*)

I. Introduction 699
II. Method 704
III. Results 708
IV. Discussion 715
References 721

44. Information processing in absolute and comparative judgement tasks (*I. D. John*)

I. Introduction 722
II. First experiment 723
III. Second experiment 725
IV. Third experiment 728
References 731
