List of Contributors and Participants xviii

Preface xxi

Group Photo xxiv

1. Association Lecture: Functional Aspects of Information Processing

<i>W. R. Garner</i>	1
Introduction	1
Functional Processing	2
Function as Experimental Presupposition	12
Functional Measurement	19
Conclusion	23
References	24

PART I: PREPARATORY PROCESSES AND MOTOR PROGRAMMING

2. Information Processing in Movement Organization and Execution

<i>Ronald G. Marteniuk and Christie L. MacKenzie</i>	29
The Idea of the "Motor Program" Critiqued	29
Neurophysiological Considerations in Movement Organization and Execution	30
Time Demands and Interference Effects in Movement Organization and Execution	38
Summary and Conclusions	51
References	53

3. Some Effects of Instructed Muscle Tension on Choice Reaction Time and Movement Time	
<i>A. F. Sanders</i>	59
Introduction	59
Experiment 1: Instructed Muscle Tension and Foreperiod Duration	62
Experiment 2: Instructed Muscle Tension, Foreperiod Duration, and Relative Signal Frequency	65
Experiment 3: Instructed Muscle Tension, S-R Compatibility, and Signal Degradation	68
Discussion	70
References	73
4. Cortical Correlates of Motor Preparation	
<i>Anthony W. K. Gaillard</i>	75
Introduction	75
Methods	81
Results	84
Discussion	86
References	89
5. Time to Time in the Human Motor System	
<i>David A. Rosenbaum and Oren Patashnik</i>	93
Introduction	93
Experiment 1	97
Experiment 2	101
General Discussion	104
References	105
6. Response Planning and the Organization of Speed Movements	
<i>D. J. Glencross</i>	107
Introduction	107
Experiment 1	111
Experiment 2	115
Experiment 3	117
Experiments 4 and 5	119
General Discussion	122
References	125

PART II: STIMULUS CLASSIFICATION AND IDENTIFICATION**7. Models of Identification**

<i>J. E. Keith Smith</i>	129
Introduction	130
Mathematical Models	132
Conclusion	157
References	157

8. Effect of Prior Context on Two-Choice Absolute Judgments Without Feedback

<i>John Long</i>	159
Introduction	160
Experiments 1 and 2	161
Experiment 3	166
General Discussion	175
Conclusions	177
References	177

9. Multiple Regression Analyses of Sequential Effects in Loudness Judgments

<i>D. McNicol</i>	179
Experiment 1: Absolute Judgments	182
Experiment 2: Two-Stimulus Identification with Confidence Judgments	186
Experiments 3 and 4: Two-Stimulus \times Two-Response Identification Task	189
Discussion	193
References	195

10. Selectivity in Character Classification

<i>Wolfgang Prinz</i>	197
A Framework for Asking Questions	197
A Method for Finding Answers	200
Preliminary Applications	203
Conclusions	207
References	208

PART III: MEASUREMENT OF ATTENTION AND EFFORT

- 11. The Measurement of Attention**
R. A. Kinchla 213
 Introduction 213
 Studying Information Tradeoffs 215
 Some Illustrative Theoretical Processes 222
 Conclusion 236
 References 237
- 12. The Structure of Attentional Resources**
Christopher D. Wickens 239
 Structure, Capacity,
 and Structure-Specific Resources 239
 Summary of Dual-Task Literature and Implications for
 Processing Structures 244
 Experiment 249
 Results 251
 Discussion 252
 References 254
- 13. Does Oculomotor Readiness Mediate Cognitive Control
 of Visual Attention?**
Raymond Klein 259
 Introduction 259
 Experiment 1 264
 Method 265
 Experiment 2 268
 Method 269
 Results and Discussion 270
 General Discussion 272
 References 274
- 14. Identifying Attentional and Decision-Making
 Components in Information Processing**
Marilyn L. Shaw 277
 Introduction 277
 Experimental Paradigm 278
 The Formal Model 280
 References 295
 Appendix 296

15. Task Difficulty, Resources, and Dual-Task Performance	
<i>David Navon and Daniel Gopher</i>	297
Performance and Resources	298
Predictions for Dual-Task Performance	304
Task Difficulty and Multiple Resources	307
An Experimental Example	310
References	314

PART IV: VISUAL INFORMATION PROCESSING

16. Recent Themes in Visual Information Processing: A Selected Overview	
<i>Lynn A. Cooper</i>	319
Structural and Organizational Factors in Visual Information Processing	323
Qualitative Differences in Modes of Visual Information Processing	332
Concluding Remarks	340
References	341
17. Measuring the Reaction Time of A Shift of Visual Attention	
<i>George Sperling and Adam Reeves</i>	347
Introduction	348
Procedure	348
Results	350
Theory	355
References	360
18. The Observer's Use of Perceptual Dimensions in Signal Identification	
<i>David J. Getty, Joel B. Swets, and John A. Swets</i>	361
Introduction	361
The Identification Model	363
Method	364
Derivation of the Perceptual Space	367
Prediction of Identification Confusion Matrices	371
A Test of Dimensional Decomposability	372
Adaptive Tuning of Dimension Salience Weights	376
Conclusions	379
References	379

19. Retrieval of Information from a Mental Map

*Pekka K. Lehtiö, Laila Poikonen,
and Kirsti Tuunainen* **381**

Introduction 381

Experiments 1 and 2 383

Experiment 3 385

Experiment 4 387

Discussion 389

References 391

PART V: LANGUAGE COMPREHENSION

20. Comprehension and Memory in Rapid Sequential Reading

*Mary C. Potter, Judith F. Kroll,
and Carol Harris* **395**

Introduction 396

RSVP Sentences 396

RSVP Paragraphs 399

Experiment 1: Role of a Topic Sentence in
Comprehension of RSVP Paragraphs 401

Experiment 2: Fast Conventional Reading 408

Experiment 3: Spoken Paragraphs 411

General Discussion 413

References 416

Appendix: Paragraphs Used In Experiments 1-3 417

**21. Priming and the Passive/Active Model
of Word Recognition**

*Donald E. Broadbent and
Margaret H. P. Broadbent* **419**

Introduction 419

A Version of Passive/Active Theory 420

Priming and Blurred Words 423

Experiment 3: The Interaction of Reliability
and Stimulus Degradation 427

Conclusions and Problems 430

References 433

- 22. Conscious and Preconscious Recognition of Polysemous Words:
Locating the Selective Effects of Prior Verbal Context**
- Tony Marcel* 435
- Introduction 436
- Method 440
- Results and Discussion 446
- General Discussion: Conscious and Nonconscious
Perception and Comprehension of Polysemy 450
- References 456
- 23. Memory and Attention in Text Comprehension:
The Problem of Reference**
- A. J. Sanford and S. Garrod* 459
- Introduction 459
- Anaphora: Measuring the Bridging Process 461
- Anaphora: Origins of Specificity Effect 463
- An Experiment on Specificity 464
- Discussion of the Specificity Effect 468
- Introducing New Individuals 470
- General Conclusion 472
- References 473
- 24. Speech as Eyes See It**
- Ronald A. Cole and Victor W. Zue* 475
- Experiment 1 480
- Experiment 2 483
- Experiment 3 488
- Discussion 491
- References 493

PART VI: SHORT-TERM MEMORY

- 25. Short-Term Recognition Memory**
- Bennet B. Murdock, Jr.* 497
- Introduction 497
- Basic Empirical Effects 498
- Models and Theories 508
- Conclusion 517
- References 518

26. Spatial Working Memory	
<i>A. D. Baddeley and K. Lieberman</i>	521
Introduction	521
Visual or Spatial Working Memory?	523
Experiment 1	523
Experiment 2	525
Spatial Memory and Imagery Mnemonics	527
Experiment 3	527
Experiment 4	530
Experiment 5	532
Implications for the Structure of the Memory System	534
References	538
27. Short-Term Recall of Linear and Curvilinear Movements by Blind and Sighted Subjects	
<i>V. K. Kool</i>	541
Introduction	541
Experiment 1	543
Experiment 2	547
General Discussion and Conclusions	551
References	553
28. Repeated Negatives in Item Recognition: Nonmonotonic Lag Functions	
<i>Roger Ratcliff and William E. Hockley</i>	555
Introduction	555
Experiment 1	556
Experiment 2	560
Experiment 3	566
Summary and General Discussion	570
References	573
29. The Octave Illusion and the What-Where Connection	
<i>Diana Deutsch</i>	575
Introduction	575
The Octave Illusion	576
The Scale Illusion	578
Parametric Studies of Ear Dominance	579
Localization by Frequency	586
A Proposed What-Where Connection	587

Discussion	588
Conclusion	590
References	591

PART VII: SEMANTIC MEMORY

30. Semantic Memory: A Tutorial

<i>Walter Kintsch</i>	595
Introduction	595
Ten Years of Semantic Memory: Data, Models, and Issues	597
References	617

31. Some Characteristics of Word Sequences Retrieved from Specified Categories

<i>Tarow Indow</i>	621
Introduction	621
General Properties of Cumulative Time Course Curve: $n(t)$	622
Retrieval Sequence as a Poisson Process	626
On the Monitoring Mechanism	629
Direct Access in Memory and in Visual Perception	632
References	635

32. Interaction of Intrinsic and Extrinsic Knowledge in Sentence Recall

<i>Gregory V. Jones</i>	637
Introduction	637
Direct-Access Retrieval	639
Configural Effects in Memory	640
Generative Processes at Encoding and Retrieval	642
References	648

33. Memory for Personally and Socially Significant Events

<i>Janice M. Keenan and Susan D. Baillet</i>	651
Introduction	651
Experiment 1	654
Experiment 2	661
Conclusions	667
References	668

34. Method for Exploring Retrieval Processes Using Verbal Protocols

Michael David Williams and Stephanie Santos-Williams 671

Introduction 671

The Experiment 673

The Locations Strategy 682

Appendix A: *Strategy Comments* 688

References 689

PART VIII: REASONING, PROBLEM SOLVING, AND DECISION PROCESSES

35. Reasoning, Problem Solving, and Decision Processes: The Problem Space as a Fundamental Category

Allen Newell 693

Introduction 693

Problem Spaces and Problems 697

The Categorical Syllogism: A Reasoning Task 705

Discussion 712

Conclusion 716

References 717

36. A Proposed Resolution of Curious Conflicts in the Literature on Linear Syllogisms

Robert J. Sternberg 719

Introduction 719

Models of Linear Syllogistic Reasoning 720

Conflicts in Data Sets Testing the Models 724

Experiment 725

Appendix 741

References 743

37. Inductive Deductions and Deductive Inductions

Marilyn Jager Adams 745

Introduction 745

Experiment I 748

Experiment II 752

Discussion 754

References 761

38. Individual Differences in General Abilities Useful in Solving Problems

<i>Jonathan Baron, Jennifer Freyd, and Judith Stewart</i>	763
Introduction	763
Experiment 1: Incidental Learning and Weak-Cue Retrieval	765
Experiment 2: The Discovery of Rules	772
Experiment 3: Statements of Principles in Everyday Problems	775
Summary and Conclusions	776
References	777

39. A Little Learning ...: Confidence in Multicue Judgment Tasks

<i>Baruch Fischhoff and Paul Slovic</i>	779
Introduction	780
Experiment 1—Handwriting Analysis	781
Experiment 2—Ulcers	783
Experiment 3—Stocks	785
Experiment 4—Horse Racing	788
Experiment 5—Children's Drawings	790
Experiment 6—Discouraging Instructions	792
Experiment 7—Bellwether Precincts	792
Experiment 8—Amount of Study	795
Concluding Discussion	797
References	800
