

CONTENTS

<i>Introduction</i>	ix
1. A Historical Perspective on Visual Form	
1. Philosophical Antecedents and the Nineteenth Century	2
2. The Gestalt School	10
3. Contemporary Psychophysics of Form	12
References	14
2. Contemporary Theory of Visual Form Perception: I. The Psychophysiology of Contour Perception	
1. Contours and Edges	17
2. Neuroanatomy and Neurophysiology of Form Perception	20
3. The Cortical Correlates of Contour	34
4. Neural Interaction and Contour Perception	38
References	54
3. Contemporary Theory of Visual Form Perception: II. Discrimination and Recognition	
1. The Algebra and Geometry of the Physical Form	59
2. The Theoretical Brain	69
3. Comparative Theories of the Physiology and Psychology of Contour Perception and Form Discrimination	85
References	103
4. Contemporary Theory of Visual Form Perception: III. The Global Theories	
1. The Gestalt Viewpoint	108

2. Form in Hebb's Neuropsychological Theory	135
3. The Perception of Visual Form in J. J. Gibson's Theory	142
4. The Fidelity of Contour Perception	150
References	167

5. Variables of the Distal Stimulus

1. Types of Experimental Forms and Their Construction	176
2. Enclosed Area and Grain	189
3. The Description of Contours	191
4. Parameters of the Single Stimulus and Their Measurement	195
5. Relational Parameters	223
6. The Material Form	241
References	243

6. The Perceptual Tasks

1. Form Perception and Eye Movements	247
2. Response versus Perception	257
3. Varieties of Perceptual Tasks	259
4. Detection	263
5. Discrimination	269
6. Scaling	277
References	288

7. Memory for Form

1. Recognition and Identification	297
2. Reproduction	309
3. Association	316
References	321

8. Form Discrimination in Animals

1. Methodology and Methodological Issues	327
2. Form-Discrimination Experiments with Animals	335
References	347

9. Development of the Perception of Visual Form

1. Development of the Visual Perception of Form in Children	353
2. Clinical Data	373
3. Animal Studies	376
References	381

10. Applications and Aesthetics

1. Military and Industrial Applications	389
2. Reading	392
3. Form-Perception Tests	393
4. Experimental Aesthetics of Visual Form	396
References	405

Bibliography	409
