Preface ix

PART I: PROBLEM SOLVING	1
1 Facilitation of Problem Solving	
<i>Stephen K. Reed</i>	3
Analogy	4
Subgoals	9
Computer Simulation	12
Overview	16
Summary	19
References	19
2 Psychological Differences among Problem Isomorphs	
<i>J. R. Hayes, H. A. Simon</i>	21
Problem Materials	22
Experiment 1	23
Experiment 2	27
Experiment 3	37
References	40
3 Process of Understanding in Problem Solving	
<i>James G. Greeno</i>	43
What it Means to Understand	44
Goodness of Understanding in Problem Solving	45
Solving by Generating a Coherent Pattern	48

A System That Solves Problems by Pattern Generation	57
Solutions by Human Subjects of a Problem of Parallel Lines	67
Representation of Understanding in Perdix	72
Conclusion	80
References	82

PART II: DECISION PROCESSES 85

4 Processing Information for Decisions	
<i>Thomas S. Wallsten</i>	87
A Process Theory	89
The Algebraic Model	91
The Experiments and Their Implications	96
Summary and Conclusions	114
References	115
5 Decision Making with Multiple Probabilistic Cues	
<i>N. John Castellan, Jr.</i>	117
Nonmetric Multiple-Cue Probability Learning: Task Description	119
Probabilistic Discrimination Learning	121
Concept Learning With Misinformative Feedback	126
Miscellaneous Environments and Tasks	131
Multiple-Cue Probability Learning	133
Summary	141
References	143
6 The Behavioral Richness of Cascaded Inference Models: Examples in Jurisprudence	
<i>David A. Schum</i>	149
Introductory Comment	149
Cascaded or Hierarchical Inference	151
Adjusted Likelihood Ratio and the Inferential Value of Testimony	155
Revelations about Cascaded Inference in Jurisprudence	162
The Adjusted Likelihood Ratio and Grounds For Impeachment and Support of Witness Credibility	164
Summation	171
References	172

Juridical References on Credibility, Impeachment, and
Support 173

PART III: COGNITIVE DEVELOPMENT	175
7 Motherese: The Speech of Mothers to Young Children	
<i>Elissa L. Newport</i>	177
Method 183	
Description of Motherese 190	
Adjustment of Motherese to Listeners 199	
Implications of the Structure of Motherese for Language Acquisition 209	
References 216	
8 How Young Children Reason about Small Numbers	
<i>Rochel Gelman</i>	219
Introduction 219	
The Reasoning Principles 225	
Summary 237	
References 238	
9 Retrieval in the Development of Learning	
<i>Herman Buschke</i>	239
Analysis of Individual Learning 240	
Consistent Retrieval and List Learning 244	
Stages of Retrieval 245	
Accounting for Differences in Recall 247	
Differences in Learning by Children, Young Adults, and Older Adults 250	
Why Does Children's Recall Improve With Age? 253	
Presentations as Instructions 262	
Concluding Comments: Retrieval, Performance, and Competence 264	
References 266	
PART IV: READING	269
10 One Second of Reading Again	
<i>Philip B. Gough, Michael J. Cosky</i>	271

Word Comprehension 275
References 287

11 The Word Identification Process in Reading

John Theios, J. Gerard Muise 289

Is a Word Processed Serially Letter by Letter or in
Parallel? 292
Effect of Word Uncertainty on Reading Latencies 296
Effect of Orthography, Phonology, and Semantics on Word
Identification 300
Effect of Word Frequency on Reading Latencies 304
Effect of Spelling on Reading Latencies 307
The Word Identification Process in Reading 310
A Tentative Model for Word Identification in
Reading 316
Summary and Conclusions 317
References 318
Appendix A 322
Appendix B 326

Author Index 329
Subject Index 335
