Introduction

1

A Definition of Cognition **2**

The Nature and Development of the Human Cognitive
System: Four Views **3**

An Overview of the Book **19**

Summary **20**

two

Infancy

22

Infant Perception **23**

Infant Cognition **46**

Summary **71**

three	<i>Early Childhood</i>	76
	Symbolic-Representational Skills: Pictures, Models, and Pretend Play	78
	Event Knowledge and Scripts	85
	Concepts and Categories	88
	Theory of Mind: Children as Mind Readers	100
	Basic Numerical Abilities	116
	Summary	127
four	<i>Middle Childhood and Adolescence</i>	131
	Piaget's View of Middle Childhood and Adolescence	132
	Other Developmental Trends during Middle Childhood and Adolescence	142
	Scientific Thinking	159
	Summary	169
five	<i>Social Cognition</i>	173
	The Nature of Social Cognition: Three Models	175
	Similarities and Differences between Social and Nonsocial Cognition	179
	Social-Cognitive Development during Infancy	183
	Understanding Emotions	189
	Understanding Percepts	196
	Knowledge about Personal Attributes	201
	Knowledge about the Causes of Behavior	208
	Understanding Social Relationships	216
	Summary	223
six	<i>Memory</i>	228
	Some Concepts and Distinctions	230

	Infant Memory	231	
	Strategies	235	
	Knowledge	248	
	Metamemory	255	
	Capacity	262	
	Current Issues in Memory Development		265
	Summary	270	
seven	<i>Language</i>		273
	Preverbal Developments	276	
	One-Word Utterances	285	
	Two-Word Utterances	288	
	Later Developments	290	
	Explaining Language Development		300
	Summary	316	
eight	<i>Questions and Problems</i>		319
	Diagnosis	320	
	Patterns	328	
	Cognitive Change	335	
	Summary	346	
	<i>References</i>		350
	<i>Name Index</i>		396
	<i>Subject Index</i>		403
	<i>About the Authors</i>		407
