

Table of contents

List of contributors	ix
Foreword	xiii
Introduction by D. Vaitl and R. Schandry	xv
Section I: Neuroanatomical and physiological basis of cardiovascular interoception	
Introduction to Section I	2
1. Visceral afferent neurones: Neuroanatomy and functions, organ regulations and sensations by W. Jänig	5
2. Arterial baroreceptor reflexes by K. Dembowsky and H. Seller	35
3. Sympathetic afferents and neural control of the circulation by M. Pagani, O. Rimoldi, M.R. Pagani, P. Pizzinelli, F. Lombardi S. Cerutti and A. Malliani	61
Section II: Cortical effects of cardiovascular processes	
Introduction to Section II	84
4. CNS modulation induced by hemodynamic changes by D. Vaitl and H. Gruppe	89
5. Cortical evoked potentials and heartbeat perception by R. Weitekunat and R. Schandry	105
6. Cardiac cycle effects: A key to the understanding of neural heart-brain interactions by M. Velden and C. Wölk	121
7. What goes up (from heart to brain) must calm down (from brain to heart)! Studies on the interaction between baroreceptor activity and cortic excitability by T. Elbert and H. Rau	133

8. Baroreceptor activity and nociception
by H. Rau, T. Elbert and N. Birbaumer 151

Section III: Cardiac perception: Peripheral influences and quantification

- Introduction to Section III 169
9. Constitutional and physiological factors in heartbeat perception
by G.E. Jones 173
10. Sensory and perceptual factors in heart beat detection
by J. Brener and C. Ring 193
11. The association between parameters of cardiovascular function and
heartbeat perception 223
by R. Schandry and M. Bestler
12. A clinical approach to cardiac perception 251
by L. Hartl

Section IV: Cardiac perception and emotions

- Introduction to Section IV 266
13. The relationship between visceral perception and emotion 269
by M.L. Ferguson and E.S. Katkin
14. Dissociation between actual and expected cardiac changes:
Interoception and emotional experience 283
by D. Palomba and L. Stegagno
15. Cardiac perception, panic attacks, and phobias 299
by A. Ehlers

Section V: Cardiac perception and cardiological problems

- Introduction to Section V 316

16. Emotional arousal, pain, and ECG changes during ambulatory monitoring in patients with cardiac neurosis and controls: Methodological considerations and first results
by M. Myrtek, W. Stiehls, J.M. Herrmann, G. Brünger, W. Müller, V. Höppner and A. Fichtler 319
17. Functional cardiac disorder and cardiac perception: Attempts of quantification
by O.W. Schonecke 335
18. Neuropsychological approach to cardiac anxiety
by F. Strian 351
19. An experimental approach to symptomatic and asymptomatic myocardial ischemia
by C. Droste 367

Section VI: Symptom perception

20. Beyond laboratory-based cardiac perception: Ecological interoception
by J.M. Pennebaker 389
