Contents

List of Contributors ix

Preface xi

1. Introduction: Cognitive Neuropsychology and Visual Object Processing 1
Glyn W. Humphreys and *M. Jane Riddoch*
1. Introduction 1
2. Cognitive Neuropsychology and Visual Object Processing 2
3. The Book 11

2. Visual Object Perception from a Computational Perspective 17
Kent A. Stevens
1. Introduction 17
2. Modularity in Vision 19
3. Survey of Computational Problems 21
4. Concerning Visual Defects 35
5. Conclusion 39

3. Normal and Pathological Processes in Visual Object Constancy 43
Glyn W. Humphreys and *Philip T. Quinlan*
1. Introduction 43
2. The Problem of Visual Object Constancy 44
3. Approaches to Object Constancy 48
4. Animal Work 82
5. Neurological Impairments of Human Vision 88
6. Some Conclusions 95

4. Picture Naming 107
M. Jane Riddoch and *Glyn W. Humphreys*
1. Introduction 107
2. Studies of Picture Naming in Normal Subjects 108
3. Data from Brain Damaged Subjects 127
4. Conclusions 139

5. Information Processing and Laterality Effects for Object and Face Perception 145
Justine Sergent
1. Introduction 145
2. Information Processing 148
3. Some Properties of the Visual System and their Implications 153
4. Hemispheric Processing Assymetry 162
5. Conclusion 167

6. The Clinical Spectrum and Localisation of Visual Agnosia 175
Andrew Kertesz
1. Introduction 175
2. Varieties of Visual Agnosia 176
3. Agnosia and Cortical Blindness 182
4. Associated Deficits 183
5. The Lesions Producing Visual Agnosia 189
6. The Functions of Visual Recognition 191

7. Apperceptive Agnosia: The Specification and Description of Constructs 197
John Campion
1. Introduction 197
2. A Neuropsychological Framework for Vision 198
3. Sensory Loss Theory and Agnosia 200
4. A Case of Apperceptive Agnosia 206
5. Two Other Patients 221
6. Conclusions 227

8. Object Concepts and Object Names: Some Deductions from Acquired Disorders of Word Processing 233
Elaine Funnell
1. Modularity and the Division of Labour 233
2. Conceptual Representations of Objects 236
3. Levels of Object Recognition 239
4. Semantic Processing and Imageable/Concrete Word Concepts 243
5. Shared Conceptual Information for Object Names and Objects 253

9. Dementia and Visual Agnosia 261
Oscar S. M. Marin
1. Dementia: Definition and Nosology 261
2. Perceptual Disorders in Dementia 264

3. Dementias as a Model for Neuropsychological Research 265
4. The Nature of Perceptual Disorders in Dementia 268
5. The Spectrum of Visual Agnosic Syndromes 275

10. The Fractionation of Visual Agnosia 281
Glyn W. Humphreys and *M. Jane Riddoch*
1. Introduction 281
2. Apperceptive Agnosia 282
3. Associative Agnosia 292
4. Classification and Lesion Sites 294
5. Re-classifying Visual Agnosia 299
6. Conclusions 304
