Introduction
Iris Levin
Dan Zakay

CHAPTER 1

**The Role of Temporal Factors in
Infant Behavior and Development**

David J. Lewkowicz

Introduction
Intrinsic Biobehavioral Rhythms
Temporal Nature of Social Interactions

9
10
12

Learning of Temporal Information	17
Perception of Temporal Information	20
Conclusion	57
References	58

CHAPTER 2

Time Concepts in Language and Thought: Filling the Piagetian Void from Two to Five Years

Richard M. Weist

Introduction	63
The ST System and Object Permanence	69
The ET System and Displacement	72
Transition from the ET to the Restricted System	92
The Restricted RT System	96
The Transition from a Restricted to a Free RT System: Temporal Sequencing	105
Temporal Location: RT versus ET Systems	107
The Free RT System and Seriation and Reversibility	109
Conclusion: Temporal Systems and Conceptual Development	110
References	114

CHAPTER 3

Measuring Time via Counting: The Development of Children's Conceptions of Time as a Quantifiable Dimension

Iris Levin

Friedrich Wilkening

Introduction	119
Qualitative versus Quantitative Reasoning: Integration of Duration	120
Counting: A Time Measurement Strategy	131
Counting and Judging Time	137
Development of Time Measurement: Summary and General Conclusions	141
References	143

CHAPTER 4

Principles Underlying Time Measurement: The Development of Children's Constraints on Counting Time

Iris Levin

Introduction	145
Principles Underlying Time Measurement: Constancy and Arbitrariness	147
Comparison with Principles Proposed by Piaget	150
General Framework for the Reported Studies	151
Interview for Assessing Four Principles of Time Measurement	152
Constrained Task for Assessing Principles	157
Principles Underlying Time Counting and the Use of Counting to Measure Time	167
General Conclusions: Principles Underlying Time Measurement	171
References	181

CHAPTER 5

Strategy Choices in Children's Time-Telling

Robert S. Siegler

Kate McGilly

Introduction	185
A Short Review of the Literature on Strategy Choice and Time-Telling	187
The Development of Time-Telling Skills	194
An Empirical Study of Children's Time-Telling	197
Discussion	211
References	216

CHAPTER 6

Assessing Children's Understanding of Time, Speed and Distance Interrelations

Curt Acredolo

Introduction	219
What Understanding Entails	221
Judging Directly Perceived Relative Durations	223

Study 1: An Examination of the Concordance between Methods Claiming to Measure Children's Knowledge of Time, Speed and Distance Interrelations	232
Conclusions Thus Far and Introduction of a Fourth Method: Assessing the Possibility of Relative Time, Speed and Distance Combinations	238
Studies 2A, B and C: Children's Recognition of the Necessary Interrelations between Relative Times, Speeds and Distances	246
Summary and Conclusions	255
References	256

CHAPTER 7

The Representation of Temporal Structure in Children, Adolescents and Adults

William J. Friedman

Introduction	259
Models of the Representation of Time Structures	260
Research on Adults' Representations	264
Conclusion	284
Research on Children's and Adolescent's Representations	285
Summary	300
References	302

CHAPTER 8

Judging the Duration of Time Intervals: A Process of Remembering Segments of Experience

Douglas Poynter

Inferring Time's Passage	305
Models of Duration Judgment	307
A Comparison of the Predictive Utility of Three Models	314
The Relationship between Perceived Time and Distance	326
Summary	328
References	329

CHAPTER 9**Experiencing and Remembering
Time: Affordances, Context, and
Cognition***Richard A. Block*

Introduction	333
A Contextualistic Model of Temporal Experience	334
Temporal Judgment Methods	335
Characteristics of the Time Period	338
Characteristics of the Experiencer	345
Activities During the Time Period	349
Two-Factor Interactions	351
Three-Factor Interactions	355
Four-Factor Interactions	355
Development of Temporal Experiences and Concepts	357
Adult Beliefs about Time and Temporal Experiences	358
Conclusions	360
References.	360

CHAPTER 10**Subjective Time and Attentional
Resource Allocation: An Integrated
Model of Time Estimation***Dan Zakay*

Introduction	365
Theories of Short Interval Duration Estimation	366
Resource Allocation Model of Time Estimation	371
Study 1 – Immediate and Remote Time Estimation	372
Study 2 – the Influence of Task Difficulty and External Tempo on Prospective Time Estimation	376
Study 3 – A Comparison of Time Estimation as a Primary or a Secondary Task	381
Study 4 – Latent Inhibition and Time Estimation	386
Summary and General Conclusions	393
References	395
