

Chapter 1	Introduction	
	The Importance of Remembering	1
	The Approach of This Book	2
	Experimental Research on Memory	4
	Sequence of the Chapters	7
Chapter 2	Storing information in human memory	
	Ways of Storing Information	9
	Experimental Research Strategies	12
	An Example of Experimental Method	16
Chapter 3	Short-term memory systems	
	Introduction	20
	Evidence That There Is More Than One Way of Storing Information in Memory	21
	1. <i>Experimental evidence</i>	21
	2. <i>Clinical evidence</i>	26
	A System for Very Brief Visual Storage	28
	The Short-Term Store	30
Chapter 4	Some processes in short-term memory	
	Retention in the Short-Term Store	36
	Interference Versus Decay	38
	The Nature of Interference	39
	Rehearsal and Number of Presentations	40
	Presentation Time	42
	Models of Human Memory	43

Chapter 5	Retrieval	
	Locating Stored Information	47
	Recognition and Recall	48
	Retrieval Cues	50
	Recall and Measurement	53
Chapter 6	Organization in memory	
	Introduction	55
	Primary Organization	55
	Chunking and Memory	56
	Secondary Organization	59
	Recall and Number of Categories	63
	Subjective Organization	64
Chapter 7	Sequence and serial organization	
	Serial Organization and Human Behavior	67
	Approximations to English	68
	Explaining Sequential Organization	71
Chapter 8	Remembering over long periods	
	Some General Remarks	76
	Research on Long-Term Memory	78
	Perception, Interpretation, and Remembering	80
	Forgetting from Long-Term Memory	83
Chapter 9	Human memory and learning	
	Learning and Remembering	86
	Thought Processes and Memory	87
	Eidetic Imagery	89
	Mnemonic Devices and Systems	90
	Practical Considerations in Remembering	92
	References	97
	Index of names	107
	Index of subjects	110
