INTRODUCTION	1
I CLASSICAL CONDITIONING	
<i>The Sauce Bearnaise phenomenon</i>	8
1 Relation of Cue to Consequence in Avoidance Learning: <i>John Garcia and Robert A. Koelling</i>	10
<i>Very long CS-US intervals in taste-aversion learning</i>	15
2 Learning with Prolonged Delay of Reinforcement: <i>John Garcia, Frank R. Ervin, and Robert A. Koelling</i>	16
<i>A theory of taste-aversion learning</i>	20
3 Biological Constraints on Conditioning: <i>John Garcia, Brenda K. McGowan and Kenneth F. Green</i>	21
<i>Novelty in taste-aversion learning</i>	44
4 Association of Illness with Prior Ingestion of Novel Foods: <i>S. H. Revusky and E. W. Bedarf</i>	45
<i>Specific hungers</i>	50
5 Specific Aversions as a Component of Specific Hungers: <i>Paul Rozin</i>	51
<i>Conditioning of tastes to recovery from illness</i>	59
6 Appetitive Conditioning with Recovery from Thiamine Deficiency as the Unconditional Stimulus: <i>Donna M. Zahorik and Steven F. Maier</i>	60
<i>A theory of specific hungers and implications for ethology and comparative psychology</i>	65
7 Learning as a Situation-Specific Adaptation: <i>Paul Rozin and James W. Kalat</i>	66
<i>Preparedness and physiological substrata</i>	97
8 Conditioned Taste Aversion in Anesthetized Rats: <i>David L. Roll and James C. Smith</i>	98

<i>Robustness of taste</i>	103
9 Limited Effects of Electroconvulsive Shock on Memory of Taste Stimulation: <i>Marvin Nachman</i>	104
<i>Preparedness and informational stimuli</i>	114
10 You Can Lead a Rat to Poison, but You Can't Make Him Think: <i>James W. Kalat and Paul Rozin</i>	115
II INSTRUMENTAL LEARNING	
<i>Thorndike's founding of the general-process view of learning</i>	124
11 Animal Intelligence: <i>Edward L. Thorndike</i>	125
<i>Polish experimental psychology</i>	130
12 Qualitative versus Directional Cues in Two Forms of Differentiation: <i>Czeslawa Dobrzecka, Genowefa Szwejkowska, and Jerzy Konorski</i>	131
<i>Competing responses and contrapreparedness</i>	135
13 Punishing and Reinforcing Effects of Noise Onset and Termination for Different Responses: <i>Robert C. Bolles and Sally E. Seelbach</i>	136
<i>Key pecking for grain in the pigeon not an arbitrary operant</i>	145
14 Auto-shaping of the Pigeon's Key-Peck: <i>Paul L. Brown and Herbert M. Jenkins</i>	146
<i>Preparedness and the "law" of extinction</i>	157
15 Auto-maintenance in the Pigeon: Sustained Pecking Despite Contingent Non-reinforcement: <i>David R. Williams and Harriet Williams</i>	158
<i>Autoshaping as classical conditioning</i>	174
16 A Comparison of Learning Based on Social or Non-social Discriminative Stimuli: <i>Vaughn E. Stimbert</i>	175
<i>Rats versus pigeons in DRL</i>	180
17 The Misbehavior of Organisms: <i>Keller Breland and Marian Breland</i>	181
III AVOIDANCE LEARNING	
<i>Laboratory avoidance paradigms</i>	188
18 Species-Specific Defense Reactions and Avoidance Learning: <i>Robert C. Bolles</i>	189

<i>Preparedness and the choice of response in avoidance</i>	212
19 Escape and Avoidance of Shock by Pigeons Pecking a Key: <i>Philip N. Hineline and Howard Rachlin</i>	213
<i>Discriminative control of avoidance by natural cues</i>	222
20 Acquired Fear, Brightness Preference, and One-Way Shuttlebox Performance: <i>James Allison, Daniel Larson, and Donald D. Jensen</i>	223
<i>Punishment of drinking and fear conditioning controlled by different cues</i>	227
21 Conditioning of Domestic Chicks to Visual and Auditory Stimuli: Control of Drinking by Visual Stimuli and Control of Conditioned Fear by Sound: <i>Sara J. Shettleworth</i>	228
<i>Perceived causation versus signalization in avoidance</i>	237
22 Cue Properties versus Palatability of Flavors in Avoidance Learning: <i>John Garcia, Richard Kovner, and Kenneth F. Green</i>	238
 IV ETHOLOGY AND COMPARATIVE PSYCHOLOGY	
<i>Lorenz, Tinbergen, and ethology</i>	244
23 The Innate Disposition to Learn: <i>Niko Tinbergen</i>	245
<i>The new comparative psychology</i>	251
24 Illness-Induced Aversions in Rat and Quail: Relative Salience of Visual and Gustatory Cues: <i>Hardy C. Wilcoxon, William B. Dragoin, and Paul A. Kral</i>	252
<i>Ethology and learning</i>	259
25 The Development of Behavior: <i>A. Manning</i>	260
<i>Imprinting and preparedness</i>	278
26 Imprinting in Relation to Parental and Species Identification by Avian Neonates: <i>Gilbert Gottlieb</i>	279
<i>Migration and imprinting</i>	299
27 Celestial Rotation: Its Importance in the Development of Migratory Orientation: <i>Stephen T. Emlen</i>	300
<i>Species differences in learning</i>	309
28 Phyletic Differences in Learning: <i>M. E. Bitterman</i>	310

<i>Song learning and preparedness</i>	335
29 A Comparative Approach to Vocal Learning: Song Development in White-Crowned Sparrows: <i>Peter Marler</i>	336
V HUMAN FUNCTIONING: LANGUAGE, DEVELOPMENT AND PSYCHOPATHOLOGY	
<i>Animal models of human functioning</i>	378
30 On Explaining Language: <i>Eric H. Lenneberg</i>	379
<i>The language of Washoe</i>	397
31 Teaching Sign Language to a Chimpanzee: <i>R. Allen Gardner and Beatrice T. Gardner</i>	398
<i>Learning in the neonate</i>	418
32 Can Conditioned Responses Be Established in the Newborn Infant: 1971? <i>Arnold J. Sameroff</i>	419
<i>Human intelligence as an organ for dealing with unprepared contingencies</i>	435
33 Biology and Knowledge: <i>Jean Piaget</i>	436
<i>Psychopathology</i>	445
34 Aversion Techniques in Behavior Therapy: Some Theoretical and Metatheoretical Considerations: <i>G. Terence Wilson and Gerald C. Davison</i>	446
<i>Acquisition of phobias</i>	450
35 Phobias and Preparedness: <i>Martin E. P. Seligman</i>	451
SUMMARY AND AFTERWORD	463
