FOREWORD		11
1	INTRODUCTION	13
2	HYDROGEOLOGY	17
2.1	GEOLOGICAL CHARACTERISTICS	17
2.1.1	GENERAL AND LOCAL ROCK PARAMETERS	17
2.1.2	UNWEATHERED HARD ROCKS AND FRACTURING	17
2.1.2.1	General petrographic properties	17
2.1.2.2	Fracture porosity	19
2.1.2.3	Fractures originating from tectonic movements in the earth's crust	19
2.1.2.4	Non-tectonic fractures	30
2.1.2.5	Scale of fracture patterns	32
2.1.3	WEATHERED HARD ROCKS	33
2.1.3.1	General features	33
2.1.3.2	Weathering processes	33
2.1.3.3	Pedogenic regimes	35
2.1.3.4	Weathered layer profile	36
2.1.3.5	Extent and thickness of weathered layer	37
2.2	HYDROLOGICAL CHARACTERISTICS	44
2.2.1	GENERAL FEATURES	44
2.2.2	HYDROLOGICAL SIGNIFICANCE OF FRACTURES	45
2.2.2.1	Characteristic storage capacity of different types of rocks	46
2.2.2.2	Characteristic storage capacity of different types of fractures	48
2.2.3	WATER-BEARING CAPACITY AND WELL YIELD	50
2.2.3.1	Introduction	50
2.2.3.2	Typical well yields in hard rock areas	53
2.2.3.3	Types of fractures	53
2.2.3.4	Effect of fracturing on ground-water production	54
2.2.3.5	Relationship between well yield and well depth	54
2.2.3.6	Effect of rock type	57
2.2.3.7	Occurrence of ground water in hard rocks in various countries	59
2.3	HYDROCHEMICAL CHARACTERISTICS	60
2.3.1	ORIGIN OF CHEMICAL COMPONENTS	60
2.3.1.1	Main chemical elements	60
2.3.1.2	Minor chemical elements	60
2.3.2	CHANGES IN CHEMICAL COMPOSITION	60
2.3.2.1	Changes at the surface	60
2.3.2.2	Changes in the root zone	61
2.3.2.3	Chemical reactions and equilibria in the unsaturated zone	61
2.3.2.4	Reactions in the saturated zone	64

2.3.3	OTHER ASPECTS	64
2.3.3.1	Use of environmental isotopes	64
2.3.3.2	Chloride concentration patterns in ground water	65
2.3.3.3	Saline and brackish waters in hard rocks	65
2.3.4	ADEQUACY OF WATER QUALITY AND POSSIBLE PROBLEMS	65
2.3.4.1	Areal characteristics of ground-water quality	65
2.3.4.2	Fluoride concentration	66
2.3.4.3	Nitrate concentration	66
2.3.4.4	Iron and manganese concentration	67
2.3.4.5	Aggressive water	67
3	INVESTIGATION, ASSESSMENT AND DEVELOPMENT	69
3.1	INTRODUCTION	69
3.1.1	DIFFERENT LEVELS OF INVESTIGATION	69
3.1.2	RELATION BETWEEN PURPOSE OF STUDY AND FUNDING	69
3.1.3	EVALUATION AND SELECTION OF METHODS	70
3.2	INVESTIGATION OF GROUND WATER	71
3.2.1	REMOTE SENSING TECHNIQUES	71
3.2.1.1	Remote sensing systems	71
3.2.1.2	Photographic interpretation	75
3.2.1.3	Applications	77
3.2.2	GEOPHYSICAL TECHNIQUES	79
3.2.2.1	Scope of geophysical techniques	79
3.2.2.2	Airborne geophysical techniques	79
3.2.2.3	Ground geophysical techniques	83
3.3	ASSESSMENT AND DEVELOPMENT OF GROUND WATER	98
3.3.1	INTRODUCTION	98
3.3.1.1	Dug wells	99
3.3.1.2	Drilled wells	102
3.3.2	EXPLORATION STRATEGIES	105
3.3.2.1	Introduction	105
3.3.2.2	Standard field exploration techniques	105
3.3.2.3	Integrated plan of action	108
3.3.2.4	Application of the integrated approach	110
3.3.3	CONSTRUCTION METHODS AND POTENTIAL GROUND-WATER DEVELOPMENT	121
3.3.3.1	Dug wells	121
3.3.3.2	Drilled wells	124
3.3.4	DRILLING METHODS	125
3.3.5	GEOLOGICAL INTERPRETATION OF TEST DRILLING INFORMATION	127
3.3.5.1	Introduction	127
3.3.5.2	Direct subsurface geological information	128
3.3.5.3	Indirect subsurface geological information- Well logging	129
3.3.6	AQUIFER TESTING AND HYDRAULICS	134
3.3.6.1	Introduction	134
3.3.6.2	Practical considerations	134
3.3.6.3	Pump tests in theory and practice	139
3.3.6.4	Field applications	149
3.3.7	WELL EFFICIENCY	150
3.3.8	HYDROLOGICAL INTERPRETATION OF HYDROCHEMICAL INFORMATION	151
3.3.8.1	Water chemistry in relation to ground-water flow	152
3.3.8.2	Effects of long-term pumping	153
3.3.8.3	Pollution aspects	153

3.3.9	SOCIO-ECONOMIC FACTORS	154
3.3.9.1	Introduction	154
3.3.9.2	Cost of exploration	154
3.3.9.3	Equipment longevity	156
3.3.9.4	Ground-water systems cost analysis	157
3.3.9.5	Low-capacity systems	161
3.3.9.6	Test drilling philosophy	162
3.3.9.7	Well abandonment	163
4	CASE HISTORIES	165
4.1	Ground-water development in Upper Precambrian metamorphic rocks of the Alto Paraguai Basin, Mato Grosso, Brazil.	165
4.2	Ground-water exploration in Precambrian rocks of northern Cameroun.	171
4.3	Ground-water utilization in hard rock aquifers of the Pali region Jodhpur Division, Rajasthan, India.	174
4.4	Ground-water potential of hard rock areas in the Noyil, Amaravati and Ponnani Basins, South India.	178
4.5	Ground-water investigations in a granite area of Sardinia, Italy.	189
4.6	Ground-water development in Precambrian rocks of the Karamoja District, Uganda.	196
5	CONCLUSIONS	199
6	REFERENCES AND BIBLIOGRAPHY	201
APPENDIX		
	SELECTED HYDROGEOLOGIC TERMINOLOGY	219
SUBJECT INDEX		223
