

Contents

Preface xii

1 LEARNING IN THE HUMAN SPECIES 1

Overview 2

The Importance of Learning 2

Human and Animal Learning 5

Limitations of Unlearned Behavior 6

Learning in Humans and Other Species:
Some Differences 9

The Emergence of the Human Learner 12

Using Tools and Implements 13

Retaining Information in Memory 15

Analytic Procedures in the Study of Learning 16

Cumulative Aspects of Human Learning and Development 19

An Illustration of Learning in Human Life 21

Summary 25

Suggestions for Further Reading 26

2 THE SCIENTIFIC INVESTIGATION OF HUMAN LEARNING 27

Overview 28

Beginning to Study Learning 28

The Concept of Association 30

Ebbinghaus and the First Empirical Inquiries	33
An Unsolved Problem	36
The Influence of Behaviorism	39
Thorndike and Skinner	43
Pavlov and Watson	48
The Stimulus-Response Approach	52
Behaviorism Today	55
Cognition and Learning: The Return to Mental Life	56
Human Learning and Contemporary Cognitive Psychology	60
Summary	62
Suggestions for Further Reading	63

3 SIMPLE LEARNING AND CONDITIONING 64

Overview 65

Classical Conditioning in Young Children	65
Findings of Experimental Research into Conditioning	70
Does Conditioning Take Place in Newborns?	73
Mixed Forms of Conditioning in Infants	75
Operant (Instrumental) Conditioning	77
Operant Conditioning in Infants	80
The Concept of Reinforcement in Psychology	83
Motivation	90
Habituation Phenomena	92
Attention	94
Summary	97
Suggestions for Further Reading	98

4 SOME GENERAL ISSUES 99

Overview 100

The Transferability of Learning	100
Continuity Between Simple and Complex Forms of Learning	105
Discriminative Learning	108
Preparedness, Biological Constraints, and the Generality of Laws of Learning	110
Problems of Defining Learning	115
Summary	117
Suggestions for Further Reading	118

5 SOCIAL LEARNING IN CHILDHOOD 119

	Overview	120
	Introduction	120
Operant Principles in Early Social Learning	Observation and Human Learning	123
Explaining Observational Learning and Imitation		135
The Mother's Role in Early Social Learning	Attachment	139
	Bonds	148
	Identification	152
Learning and Human Aggression		154
	Summary	159
	Suggestions for Further Reading	160

6 THE MODIFICATION OF SOCIAL BEHAVIOR 161

	Overview	162
	Social Learning After Childhood	162
	Principles of Behavior Modification	163
Social Learning of Normal and Abnormal Behavior	Behavior Modification in the School Classroom	164
	The Influence of the Classroom Teacher	170
	Shaping Procedures	176
Behavior Modification and Intellectual Skills		179
Using Negative Reinforcement and Punishment	Social Learning and Serious Deficiencies	180
	Reinforcement Techniques for Severe Disorders	181
	Desensitization	182
	Self-control	183
	Conclusion	193
	Summary	200
	Suggestions for Further Reading	201

7 ASPECTS OF PERCEPTUAL AND MOTOR LEARNING 203

	Overview	204
Perception and Movement		204
Learning to Discriminate		205
Perceptual Integration		208

Adaptation to Perceptual Distortions	210
Motor Learning	214
Foundations of Motor Abilities	217
Observation and Practice in Learned Movements	221
Summary	223
Suggestions for Further Reading	224

8

THE CONTRIBUTION OF LEARNING TO LANGUAGE ACQUISITION 225

Overview	226
Introduction	226
Rules and Structure in Language Acquisition	227
The Possibility of Innate Language Structures	228
Continuity Between Language and Prelinguistic Abilities	230
Learning Rules and Meanings	233
Reinforcement and the Acquisition of Speech	235
Observational Learning of Language Skills	237
Talking with the Mother	239
Language Acquisition in Primates	243
Summary	247
Suggestions for Further Reading	248

9

SIMPLE VERBAL LEARNING AND THE FUNCTIONS OF IMAGERY 249

Overview	250
Introduction	250
Measures of Item Meaningfulness	251
Evidence for Mediating Processes	256
Mental Processes in Verbal Learning	258
Contributions of Language to Human Learning	260
Speech and Behavior	267
Imagery and Learning	269
Functions of Visual Imagery	273
Eidetic Imagery	283
Exceptional Ability to Remember	284
Summary	286
Suggestions for Further Reading	286

10 LEARNING AND HUMAN MEMORY 288**Overview 289**

Learning and Remembering	289
Attributes of Human Memory	292
Multi-process Models of Memory	297
Organization of Retained Information	301
Individual Schemes of Organization	307
Subjective Organization	310
Retrieval	314
The Representation of Knowledge in Semantic Memory	315
Rehearsal	323
Summary	326
Suggestions for Further Reading	327

11 LEARNING FROM PROSE 328**Overview 329**

Knowledge in Language Form	329
Approximations to English	331
The Representation of Structured Knowledge in Memory	334
The Influence of Bartlett	339
Effects of Context	342
Repeated Presentation and Recall of Prose Passages	346
Retroactive Interference in Prose Learning	349
Learners' Activities in Acquiring Knowledge	350
Studies of Student Note Taking	357
Assessing the Difficulty of Prose Materials	358
Summary	362
Suggestions for Further Reading	363

12 INDIVIDUAL DIFFERENCES IN HUMAN LEARNING 364**Overview 365**

Introduction	365
Learning and Mental Ability	366
Individual Differences in the First Months of Life	368
Differences in Processing Information	370
Evidence from Comparisons Between Normal and Mentally Retarded People	376

Evidence from Social Class Research	382
Cultural Differences in Learning	391
Conclusion	397
Summary	397
Suggestions for Further Reading	398

13 SOME CONCLUDING REMARKS 399

Overview	400
Learning and Theories of Learning	400
Helping the Learner	402
Learning Aids and Devices	404
Compensatory Learning	405
The Individual and the Environment	406
Summary	409
