CONTENTS

Preface v

GENERAL INTRODUCTION

Learning environments: An introduction
J.M. Pieters, K. Breuer & P.R.J. Simons 3

Part I: CLASSROOM ENVIRONMENTS

Facilitating adults' learning by coaching: Development and evaluation of an andragogical model of continuing vocational education within industrial companies
J. Reischmann 19

Concepts of schooling and the learning environment: A relationship tested in law faculties
J.K. Oosthoek 31

Work simulation: A natural environment for learning job skills and job attitudes
M.J. Treep & J.M. Pieters 45

Teacher enthusiasm: Congruence between ratings and behaviour
C. Schwarzer & W. Schreiber-Neumann 55

Teacher praise and classroom climate: Another paradoxical relation
P.C. van der Sijde, S. Dijkstra & E.A.M.M. Bennink 67

PART II: EVALUATION OF LEARNING ENVIRONMENTS

Assessing the quality of kindergarten environments with the Early Childhood Environment Rating Scale
H.G. Roßbach 77

School-provided measures against truancy and drop-out
B.J. van Kesteren & K.Tj. Bos 91

Some school effectiveness indicators and their relation to school characteristics
K.Tj. Bos, A.M. Ruijters & A.J. Visscher 105

PART III: COMPUTER-BASED ENVIRONMENTS

The use of a computer microworld as a learning environment to develop conceptual change in the field of mechanics
F.E. van 't Hul, P.L. Lijnse & A. Moes 121

Intelligent tutoring system for learning English
G. Kanselaar, H. Wichmann, M. Giezeman, J. Zuidema, J. van der Veen & L. Koster 133

A genetic model for tutoring addition and subtraction skills in an adaptive computer program
M. Beishuizen, E. Felix & J.J. Beishuizen 151

A production system explaining errors in long division of learning disabled students in junior vocational education
C.M. van Putten & M.A. de Ronde 163

A computer simulation of the acquisition of a computational skill in a discovery-oriented microworld
M.J. Ippel & C.J.M. Meulemans 177

A systematic problem approach in business administration: A methodology to make knowledge explicit for Computer-Assisted Instruction
A.T.J. Vernooij 193

On the surplus of computerized traffic education
M. Wierda, A. van den Burg & P. Tromp 207

PART IV: ENVIRONMENTS FOR META-LEARNING

Metacognition: Learning to learn and learning to think
M.A. Wolters 221

General and differential effectiveness of
learning-to-learn programs
F.P. Büchel 235

Teaching problem solving in higher education:
From field regulation to self-regulation
C. Terlouw & A. Pilot 253

Executive control, self-regulation trained in mathematics
F.P.C.M. de Jong 267

Children's reflection on text-coherence during reading
J.H. Boonman 279

The Leittext method: Learning to learn in commerce
and industry
C.C.J. Teurlings 287

Training self-regulation in several educational fields
B.H.A.M. van Hout Wolters 299

PART V: THEORETICAL ISSUES OF LEARNING
ENVIRONMENTS

Measuring individual differences in cognitive processes:
How a speed-accuracy methodology can improve the results
D.F. Lohman 307

The influence of topic interest, prior knowledge
and cognitive capabilities on text comprehension
U. Schiefele 323

Instructional implications of recent research and empirically-
based theories on the effect of prior knowledge on learning
F.J.R.C. Dochy 339

Contributors' addresses 357
