Preface vii

I

Neurobiologic Considerations in Memory Function

1

Experience and the Biochemistry of Information Storage
in the Nervous System 3

*Ira B. Black, Joshua E. Adler, Cheryl F. Dreyfus, Wilma F. Friedman,
Edmund F. LaGamma, and Arthur H. Roach*

2

Structure-Function Relationships in the Organization
of Memory 23

Gary Lynch and Michel Baudry

3

A Basic Circuit of Cortical Organization 93

Gordon M. Shepherd

4

Learning and Representation in Connectionist Models 135

Terrence J. Sejnowski and Charles R. Rosenberg

II

Psychological Dimensions of Memory Function in Humans

5

Review of Event-Related Potential Studies of Memory 181

Marta Kutas

6

Improving Memory 219

William Hirst

7

Imagery in Learning 245

Stephen M. Kosslyn

III

Present and Future of Memory Research and Its Applications 275

William Hirst and Michael S. Gazzaniga

Index 309
