Introduction	1
1 Tax Competition Model	7
1.1 Basic Model	8
1.1.1 Private Sector	8
1.1.2 Government	11
1.2 Model Extensions	17
1.2.1 Multiple Tax Instruments	17
1.2.2 Asymmetric Regions: Factor Endowment Differences	23
1.2.3 Asymmetric Regions: Taste Differences	28
1.2.4 Household Mobility	35
1.3 Summary	37
A Appendix to Chapter 1	41
A.1 Comparative Static Analysis	41
A.2 Proof of Proposition 1.2	42
A.3 Labor Income Taxation	44
2 Capital Taxation in a Federal System	47
2.1 Introduction	47
2.2 Fiscal Externalities: An Overview	50
2.2.1 Horizontal Fiscal Externalities	52
2.2.2 Vertical Fiscal Externalities	56
2.3 Boadway and Keen (1996) - A Neutrality Result	61
2.4 Fiscal Externalities: A Model	64
2.4.1 Introduction	64
2.4.2 The Model Set-Up	68
2.4.3 The Unitary Nation	71
2.4.4 The Federal State: Nash Behavior	72
2.4.5 The Federal State: Federal Government as Stackelberg Leader	78
2.4.6 The Federal State: States as Stackelberg Leaders	85
2.4.7 Conclusion	95
2.5 Summary	99

A	Appendix to Chapter 2	103
A.1	Slope of the Reaction Functions	103
A.2	Proof of Lemma 2.2	104
3	Capital Tax Coordination	107
3.1	Introduction	107
3.2	Tax Coordination	110
3.2.1	Capital Taxation	113
3.2.2	Capital and Labor Taxation	118
3.3	Tax Coordination and Asymmetric Information: An Overview	119
3.4	Tax Coordination and Asymmetric Information: A Model	124
3.4.1	Introduction	124
3.4.2	The Model	127
3.4.3	Centralized Taxation, Capital Mobility, and Symmetric Information	129
3.4.4	Centralized Taxation with Capital Immobility	133
3.4.5	Centralized Taxation with Capital Mobility	137
3.4.6	Conclusion	141
3.5	Tax Coordination and Commitment	144
3.5.1	Revelation Principle	145
3.5.2	Degrees of Commitment	148
3.5.3	Optimal Tax Coordination	150
3.5.4	Welfare Implications	154
3.5.5	Conclusion	161
3.6	Extension: Tax Coordination and Participation	163
3.7	Summary	167
A	Appendix to Chapter 3	171
A.1	Proof of Proposition 3.2	171
A.2	Proof of Proposition 3.5	172
	Concluding Remarks	174

List of Figures

1.1	Interregional capital allocation with symmetric regions.	13
1.2	Capital taxation in a small open economy.	16
1.3	Asymmetric tax competition: tax rate structure.	32
1.4	Asymmetric tax competition: policy outcome.	34
2.1	Fiscal externalities.	51
2.2	Sequence of decisions: unitary nation.	72
2.3	Sequence of decisions: federal state with both-sided Nash behavior.	73
2.4	Sequence of decisions: federal state and Stackelberg leadership by a federal government.	79
2.5	Stackelberg leadership by the federal government: policy variables.	80
2.6	Stackelberg leadership by the federal level: choice of tax rate.	82
2.7	Sequence of decisions: federal state with Stackelberg leadership by states.	86
2.8	Stackelberg leadership by states: policy variables.	86
2.9	Stackelberg leadership by states: choice of tax rate.	94
3.1	Resource allocation with a transfer scheme: symmetric information and capital mobility.	132
3.2	Capital tax differential $t^h - t^l < 0$ under capital immobility.	134
3.3	Resource allocation: asymmetric information and capital immobility.	137
3.4	Resource allocation with a transfer scheme: asymmetric information and capital mobility.	141
3.5	Coordination game: no commitment.	149
3.6	Resource allocation without a transfer scheme: symmetric information and capital mobility.	153
3.7	Preference revelation: no commitment.	154
3.8	Tax coordination without a transfer scheme: no commitment.	157
3.9	Tax coordination with a transfer scheme: no commitment.	158

List of Tables

2.1	Stackelberg leadership by states: comparative static analysis.	88
2.2	Tax structure in a federal state under different behavioral assumptions.	96
2.3	Local public good provision under different behavioral assumptions. .	99
3.1	Tax coordination: local public good provision and tax rates.	142
3.2	Welfare comparison: full commitment versus no commitment.	159
3.3	Welfare comparison: summary.	167
