

C O N T E N T S

PREFACE xvii

1. THE SCIENCE OF COGNITION 1

MOTIVATIONS 2

Intellectual Curiosity 2

Implications for Other Fields 3

Practical Applications 4

How to Study This Book 5

THE HISTORY OF COGNITIVE PSYCHOLOGY 6

Early History 6

Psychology in Germany 7

Psychology in America 8

The Reemergence of Cognitive Psychology 10

Information-Processing Analyses 12

Controversy: The Role of the Environment 14

Controversy: The Role of Physiology 15

THE NERVOUS SYSTEM 18

The Neuron 19

Neural Representation of Information 21

Organization of the Brain 24

Localization of Function 26

Topographic Organization 28

CONNECTIONISM 31

REMARKS AND SUGGESTED READINGS 34

2. PERCEPTION 36

VISUAL INFORMATION PROCESSING 38

Early Visual Information Processing 38

Information Coding in Visual Cells 40

Perceiving Depth and Surfaces 43

Object-Centered Perception 44

VISUAL PATTERN RECOGNITION 48

Template-Matching Models 48

Feature Analysis 50

Object Recognition 51

SPEECH RECOGNITION 55

Feature Analysis of Speech 57

Categorical Perception 58

CONTEXT AND PATTERN RECOGNITION 61

Effects of Sentence Context 62

Context and Speech 64

Context and the Recognition of Faces and Scenes 65

Massaro's FLMP Model for Combination of Context and Feature Information 67

A PDP Model of Letter Recognition 69

CONCLUSIONS 72

REMARKS AND SUGGESTED READINGS 73

3. ATTENTION AND PERFORMANCE 75

AUDITORY ATTENTION 76

The Filter Theory 77

The Attenuation Theory and Late Selection Theory 78

VISUAL ATTENTION 81

The Spotlight Metaphor 82

Visual Sensory Memory 84

Pattern Recognition and Attention 87

Neglect of the Visual Field 90

AUTOMATICITY 92

Automaticity and Visual Search 93

Attention and Pattern Recognition 95

The Stroop Effect 96

DUAL-TASK PERFORMANCE 100

Double-Stimulation Studies 101

Multiple-Resource Theory 103

CONCLUSIONS 104

REMARKS AND SUGGESTED READINGS 104

✕ 4. PERCEPTION-BASED KNOWLEDGE REPRESENTATIONS 106

DIFFERENT KNOWLEDGE REPRESENTATIONS 107

Comparisons of Verbal versus Visual Processing 107

Nature of Knowledge Representations 110

MENTAL IMAGERY 111

Mental Rotation 112

Image Scanning 114

Interference and Image Scanning 116

Two Types of Imagery 119

Are Visual Images Like Visual Perception? 120

Comparison of Visual Quantities 122

Hierarchical Structure of Images 123

Mental Maps 125

Conclusions about Mental Imagery 127

REPRESENTATION OF SERIAL ORDER 129

Hierarchical Encoding of Serial-Order Information 130

Judgments of Serial Order 132

Verbal Nature of Serial-Order Information 134

CONCLUSIONS ABOUT PERCEPTUAL KNOWLEDGE REPRESENTATIONS 135

REMARKS AND SUGGESTED READINGS 135

5. MEANING-BASED KNOWLEDGE REPRESENTATIONS 136

MEMORY FOR MEANINGFUL INTERPRETATIONS OF EVENTS 137

Memory for Verbal Information 137

Memory for Visual Information 139

Retention of Detail versus Meaning 142

Implications of Good Memory for Meaning 144

PROPOSITIONAL REPRESENTATIONS 145

Propositional Networks 148

CONCEPTUAL KNOWLEDGE 151

Semantic Networks 152

Schemas 154

Psychological Reality of Schemas 156

Degree of Category Membership 157

Event Concepts 159

Controversy: Abstraction versus Instance Theories 164

Learning Schemas in a Neural Network 165

SUMMARY 167

REMARKS AND SUGGESTED READINGS 168

6. HUMAN MEMORY: ENCODING AND STORAGE 169

THE RISE AND FALL OF THE THEORY OF SHORT-TERM MEMORY 171

REHEARSAL AND WORKING MEMORY 175

Frontal Cortex and Primate Working Memory 179

ACTIVATION AND LONG-TERM MEMORY 180

Spreading Activation 183

PRACTICE AND STRENGTH 186

Long-Term Potentiation and the Power Law 188

LEVELS OF PROCESSING 190

Elaborative Processing 190

Meaningful versus Nonmeaningful Elaborations 191

Incidental versus Intentional Learning 193

Elaborative Processing and Text Material 194

ENCODING VERSUS RETRIEVAL 196

REMARKS AND SUGGESTED READINGS 196

✓ 7. HUMAN MEMORY: RETENTION AND RETRIEVAL 198

THE RETENTION FUNCTION 200

INTERFERENCE EFFECTS 204

The Fan Effect 205

Interference with Preexperimental Memories 207

Interference and Decay 209

Interference and Redundancy 209

RETRIEVAL AND INFERENCE 211

Plausible Retrieval 213

The Interaction of Elaboration and Inferential Reconstruction 215

Use of Schemas 217

Inference at Study versus Test: A Summary 220

ASSOCIATIVE STRUCTURE AND RETRIEVAL 220

Organization and Recall 220

The Method of Loci 223

The Effects of Encoding Context 224

Effects of Other Materials in the Context 228

IMPLICIT VERSUS EXPLICIT MEMORY 229

Implicit Memory Spared in Amnesics 229

Implicit versus Explicit Memory in Normal Subjects 231

Procedural Memory 233

REMARKS AND SUGGESTED READINGS 235

8. PROBLEM SOLVING 236

PROCEDURAL KNOWLEDGE AND PROBLEM SOLVING 237

The Problem Space and Search 239

PROBLEM-SOLVING OPERATORS 242

Acquisition of Operators 242

Analogy 245

Production Rules 248

OPERATOR SELECTION 250

The Difference-Reduction Method 250

Means-Ends Analysis 255

The Tower of Hanoi Problem 257

Subgoal Interactions 260

PROBLEM REPRESENTATION 262

The Importance of the Correct Representation 262

Functional Fixedness 263

SET EFFECTS 265

Incubation Effects and Insight Problems 268

SUMMARY 270

REMARKS AND SUGGESTED READINGS 270

APPENDIX 271

9. DEVELOPMENT OF EXPERTISE 272

GENERAL CHARACTERISTICS OF SKILL ACQUISITION 273

Three Stages of Skill Acquisition 273

Power-Law Learning 275

THE NATURE OF EXPERTISE 280

Proceduralization 280

Tactical Learning 283

Strategic Learning 285

Problem Representation 289

Pattern Learning and Memory 292

Long-Term Memory and Expertise 294

TRANSFER OF SKILL 296

Theory of Identical Elements 298

EDUCATIONAL IMPLICATIONS 300

Intelligent Tutoring Systems 300

REMARKS AND SUGGESTED READINGS 304

10. REASONING AND DECISION MAKING 305

REASONING ABOUT CONDITIONALS 306

Evaluation of Conditional Syllogisms 308

Alternatives to the Logical Model 310

The Wason Selection Task 312

Permission Interpretation of the Conditional 314

Conclusions 316

REASONING ABOUT QUANTIFIERS 316

The Categorical Syllogism 317

The Atmosphere Hypothesis 318

Limitations of the Atmosphere Hypothesis 319

Process Explanations 321

INDUCTIVE REASONING 323

Bayes's Theorem 323

Deviations from Bayes's Theorem 326

Implicit Correspondence to Bayes's Theorem 329

Judgments of Probability 331

DECISION MAKING 335

Framing Effects 338

CONCLUSIONS 341

REMARKS AND SUGGESTED READINGS 342

11. LANGUAGE STRUCTURE 343

THE FIELD OF LINGUISTICS 344

Productivity and Regularity 344

Linguistic Intuitions 346

Competence versus Performance 347

SYNTACTIC FORMALISMS 348

Phrase Structure 348

Rewrite Rules 350

Pause Structure in Speech 353

Speech Errors 354

Transformations 356

THE RELATIONSHIP BETWEEN LANGUAGE AND THOUGHT 358

The Behaviorist Proposal 358

The Whorfian Hypothesis of Linguistic Determinism 359

Does Language Depend on Thought? 362

Modularity of Language 363

LANGUAGE ACQUISITION 364

The Issues of Rules and the Case of Past Tense 367

Lack of Feedback 369

A Critical Period for Language Acquisition 370

Language Universals 372

The Constraints on Transformations 374

Parameter Setting 375

The Uniqueness of Language: A Summary 376

REMARKS AND SUGGESTED READINGS 376

12. LANGUAGE COMPREHENSION 378

PARSING 379

Sentence Patterns 379

The Psychological Reality of Constituent Structure 381

Immediacy of Interpretation 383

The Use of Syntactic Cues 385

Semantic Considerations 387

Integration of Syntax and Semantics 388

Modularity versus Interactive Processing 390

Ambiguity 391

Lexical Ambiguity 393

Propositional Representation 394

UTILIZATION 395

Inference of the Unstated 396

Inference of Reference 397

Pronominal Reference 400

Negatives 401

TEXT PROCESSING 404

Text Structure and Memory 406

Kintsch and van Dijk's Text Comprehension Model 409

CONCLUSION 411

REMARKS AND SUGGESTED READINGS 412

✕ 13. INDIVIDUAL DIFFERENCES IN COGNITION 413

COGNITIVE DEVELOPMENT 414

Piaget's Stages of Development 415

Conservation 416

What Develops? 421

Increased Mental Capacity 422

Increased Knowledge 425

Cognition and Aging	428
Summary	431
PSYCHOMETRIC STUDIES OF COGNITION	431
Intelligence Tests	432
Factor Analysis	434
Reasoning Ability	438
Verbal Ability	440
Spatial Ability	442
Conclusions from Information-Processing Studies	444
Gardner's Multiple Intelligences	444
CONCLUSIONS	446
