**Preface**    xi

**1. Mechanisms of Skill Acquisition and the Law of Practice**

<i>Allen Newell and Paul S. Rosenbloom</i> .....	1
Introduction	1
The Ubiquitous Law of Practice	3
Basics About Power Laws	17
Fitting the Data To a Family of Curves	23
Possible Explanations	34
Conclusion	51

**2. Knowledge Compilation: Mechanisms for the Automatization of Cognitive Skills**

<i>David M. Neves and John R. Anderson</i> .....	57
Introduction	57
Encoding	60
Proceduralization	65
Composition	67
Effects of Practice	72
Conclusion	82

<b>3. Skill In Algebra</b>		
<i>Clayton Lewis</i> .....		<b>85</b>
Abstract	85	
Introduction	85	
Framework	86	
Hypotheses About Skilled Performance	87	
Subjects	89	
The Problems	90	
Procedure	90	
Length of Solutions	91	
Stategic Choices	91	
Powerful Operators	96	
The Formation of Combined Operations	98	
Combining Transposing and Collecting	104	
Experts Make Mistakes	106	
Why Do They Make Mistakes?	107	
Reflections	107	
<b>4. The Development of Automatism</b>		
<i>Richard M. Shiffrin and Susan T. Dumais</i> .....		<b>111</b>
Introduction	111	
Automatism and Control in Search-Detection Tasks	112	
A Definition of and Test for Automatism	115	
The Development of Automatism	125	
What is Learned During Automatization?	131	
The Loss of Automatism	138	
Automatization in Skill Development	138	
<b>5. Skilled Memory</b>		
<i>William G. Chase and K. Anders Ericsson</i> .....		<b>141</b>
Introduction	141	
The Learning Curve	143	
The Mnemonic System	146	
The Retrieval Structure	168	
On the Speedup of Encoding and Retrieval Operators	180	
Concluding Remarks	186	
<b>6. Acquisition of Problem-Solving Skill</b>		
<i>John R. Anderson, James G. Greeno, Paul J. Kline and David M. Neves</i> .....		<b>191</b>
Introduction	191	
A Model of the Skill Underlying Proof Generation	192	
Learning from the Text	200	
Subsumption: Learning With Understanding	205	

Knowledge Compilation	214
Knowledge Optimization	221
Summary	227
<b>7. Advice Taking and Knowledge Refinement: An Iterative View of Skill Acquisition</b>	
<i>Fredrick Hayes-Roth, Philip Klahr, and David J. Mostow</i> .....	<b>231</b>
Abstract	231
What is Learned?	231
What is Advice?	235
How Can a Learner Operationalize Advice?	237
What Kinds of Events Trigger Learning?	243
What Can Be Learned, and How is This done?	244
Conclusions	249
<b>8. The Processes Involved in Designing Software</b>	
<i>Robin Jeffries, Althea A. Turner, Peter G. Polson, and Michael E. Atwood</i> .....	<b>255</b>
Introduction	255
Research on Design and Planning	256
A Theory of Problem Solving in Software Design	261
A Comparison of Expert and Novice Design Processes	268
Discussion	279
<b>9. Mental Models of Physical Mechanisms and Their Acquisition</b>	
<i>Johan de Kleer and John Seely Brown</i> .....	<b>285</b>
Introduction	285
The Motivation for Defining Some Esthetic Principles	287
The No-Function-In-Structure Principle	287
The Weak Causality Principle	288
Methodology	288
Technical Issues	289
A Simple Qualitative Model for the Buzzer	291
A Time Model of the Buzzer	292
A Causal Model for the Buzzer	294
No-Function-In-Structure and the Locality Principles	296
Connections and Device Topology	297
A Mythical Time Model	301
A Representation For Causal Attribution	302
Causality Principles and Environment	305
A Critique of the Rieger and Grinberg's Approach	306
Deletion Principle	307
Discontinuity	308
The Role of Momentum in Qualitative Reasoning	308

10.	<b>Enriching Formal Knowledge: A Model for Learning to Solve Textbook Physics Problems</b>	311
	<i>Jill H. Larkin</i> .....	
	Introduction 311	
	Learning in Formal Domains 312	
	A Model for Problem Solving in Physics 318	
	Human Solvers 323	
	The Reality of the Model 332	
	Summary 333	
11.	<b>Analogical Processes in Learning</b>	335
	<i>David E. Rumelhart and Donald A. Norman</i> .....	
	Introduction 335	
	Some Characteristics of the	
	Human Knowledge Representation System 336	
	New Schemata By Analogy With Old 343	
	Analogical Processes in Learning a Text Editor 350	
	Conclusions 357	
12.	<b>The Central Role of Learning in Cognition</b>	361
	<i>Pat Langley and Herbert A. Simon</i> .....	
	Introduction 361	
	Characteristics of a Good Explanation 364	
	Learning In Complex Systems 367	
	Are There General Principles of Learning? 373	
	Is Learning Really Invariant? 375	
	A Research Strategy 378	
	<b>Author Index</b> 381	
	<b>Subject Index</b> 385
