

Contents

List of Contributors	xi
Introduction, Sharon Rounds and Norbert Voelkel	xvii
SECTION I: NORMAL PULMONARY ENDOTHELIUM. STRUCTURE, FUNCTION, CELL BIOLOGY	1
1: Development of the Pulmonary Endothelium in Development of the Pulmonary Circulation: Vasculogenesis and Angiogenesis, Margaret A. Schwarz and Ondine B. Cleaver	3
2: Anatomy of the Pulmonary Endothelium, Radu V. Stan	25
3: Cadherins and Connexins in Pulmonary Endothelial Function, Kaushik Parthasarathi and Sadiqa K. Quadri	33
4: Pulmonary Endothelial Cell Interactions with the Extracellular Matrix, Katie L. Grinnell and Elizabeth O. Harrington	51
5: Pulmonary Endothelial Cell Calcium Signaling and Regulation of Lung Vascular Barrier Function, Nebojsa Knezevic, Mohammad Tauseef and Dolly Mehta	73
6: Pulmonary Endothelium and Nitric Oxide, Yunchao Su and Edward R. Block	89
7: Pulmonary Endothelial Cell Surface Metabolic Functions, Usamah S. Kayyali and Barry L. Fanburg	105
8: Cell Biology of Lung Endothelial Permeability, Guochang Hu and Richard D. Minshall	113
9: Lung Endothelial Phenotypes: Insights Derived from the Systematic Study of Calcium Channels, Donna L. Cioffi, Songwei Wu and Troy Stevens	129
10: Pulmonary Endothelial Interactions with Leukocytes and Platelets, Rosana Souza Rodrigues and Guy A. Zimmerman	143

11: Mesenchymal–Endothelial Interactions in the Control of Angiogenic, Inflammatory, and Fibrotic Responses in the Pulmonary Circulation, Kurt R. Stenmark, Evgenia V. Gerasimovskaya, Neil Davie and Maria Frid	167
12: Pulmonary Endothelium and Vasomotor Control, Nikki L. Jernigan, Benjamin R. Walker and Thomas C. Resta	185
13: Pulmonary Endothelial Progenitor Cells, Bernard Thébaud and Mervin C. Yoder	203
14: Bronchial Vasculature: The Other Pulmonary Circulation, Elizabeth Wagner	217
15: Mapping Protein Expression on Pulmonary Vascular Endothelium, Kerri A. Massey and Jan E. Schnitzer	229
 SECTION II: MECHANISMS AND CONSEQUENCES OF PULMONARY ENDOTHELIAL CELL INJURY	 241
16: Pulmonary Endothelial Cell Death: Implications for Lung Disease Pathogenesis, Qing Lu and Sharon Rounds	243
17: Oxidant-Mediated Signaling and Injury in Pulmonary Endothelium, Kenneth E. Chapman, Shampa Chatterjee and Aron B. Fisher	261
18: Hypoxia and the Pulmonary Endothelium, Matthew Jankowich, Gaurav Choudhary and Sharon Rounds	287
19: Viral Infection and Pulmonary Endothelial Cells, Norbert F. Voelkel	303
20: Effects of Pressure and Flow on the Pulmonary Endothelium, Wolfgang M. Kuebler	309
21: Therapeutic Strategies to Limit Lung Endothelial Cell Permeability, Rachel K. Wolfson, Gabriel Lang, Jeff Jacobson and Joe G. N. Garcia	337
22: Targeted Delivery of Biotherapeutics to the Pulmonary Endothelium, Vladimir R. Muzykantov	355
 SECTION III: PULMONARY ENDOTHELIUM IN DISEASE	 379
23: Endothelial Regulation of the Pulmonary Circulation in the Fetus and Newborn, Yuansheng Gao and J. Usha Raj	381
24: Genetic Insights into Endothelial Barrier Regulation in the Acutely Inflamed Lung, Sumegha Mitra, Daniel Turner Lloveras, Shwu-Fan Ma and Joe G. N. Garcia	399

25: Interactions of Pulmonary Endothelial Cells with Immune Cells and Platelets: Implications for Disease Pathogenesis, Mark R. Nicolls, Rasa Tamosiuniene, Ashok N. Babu and Norbert F. Voelkel	417
26: Role of the Endothelium in Emphysema: Emphysema – A Lung Microvascular Disease, Norbert F. Voelkel and Ramesh Natarajan	437
27: Pulmonary Endothelium and Pulmonary Hypertension, Rubin M. Tuder and Serpil C. Erzurum	449
28: Collagen Vascular Diseases and Pulmonary Endothelium, Pradeep R. Rai and Carlyne D. Cool	461
29: Pulmonary Endothelium in Thromboembolism, Irene M. Lang	471
30: Pulmonary Endothelium and Malignancies, Abu-Bakr Al-Mehdi	485
Epilogue, Norbert F. Voelkel	491
Index	495
