Foreword by Don Bannister	xix
Acknowledgments	xxi
General introduction: the self-organised learner and the repertory grid	xxii
Prospects for learning: strategies for survival	xxii
Personal meaning and self-organised learning	xxiii
Who the book is for	xxiv
The need for a conversational methodology	xxv
Conversations for self-organised learning	xxvii
The scope of the book	xxix
1 The personal nature of self-organised learning	1
What is learning? that we may reflect upon it	1
T-C as the management of self-organised learning	4
Experience as a resource for learning	5
Personal myths of learning	10
The disabled learner and impersonal learning	14
The universal need for self-organised learning	16
2 Introducing the repertory grid: elements and constructs	18
A prelude to the repertory grid	18
On the meaning of meaning	19
A technology of the psyche	20
Content-free procedures	23
Bill Shard's view of learning	25
Adam Stewart's view of learning	27
The 'introducing a topic' technique	28

3 The construction of personal meaning	38
The power of a conversational technology	38
To represent a system of personal constructs	39
Eliciting a repertory grid	42
Identifying the meaning hidden in the grid	49
4 FOCUSing: the emergent pattern	57
Introduction	57
The hand-FOCUSing technique	58
FOCUSing the elements: (a) Identifying similarities	
FOCUSing the elements: (b) Element re-ordering	
FOCUSing the constructs: identifying similarities and re-ordering the constructs	62
The FOCUSED grid	66
The SPACEd FOCUSED grid	68
Dimensions of personal judgment: using a FOCUSED grid to raise awareness in staff appraisal	70
5 Talkback through a FOCUSED grid	77
The FOCUSED repertory grid as a mirror of constructions of experience	77
Understanding the pattern of meaning in a FOCUSED grid	79
An outline guide to interpreting a FOCUSED grid	81
The major steps in a 'talkback conversation'	81
Extracts from 'real' talkback conversations	82
Introduction	82
Conversation 1: An Open University student	84
Conversation 2: A production manager	86
6 Grid conversations for achieving self-awareness	92
On the nature of conversation	92
On the dangers of offering elements and/or constructs	93
Stage 1: need negotiation and purpose definition	96
Stage 2: the topic: deciding upon the nature of the elements	98
Reflecting stage 2 back on to stage 1	99
Stage 3: eliciting a repertory grid	101
(a) Selecting specific elements	101
(bi) Eliciting constructs: on the nature of construing	102
(bii) Eliciting constructs: conversational methods	104
(c) Assigning the elements to the constructs	107
Reflecting stage 3 back on to stage 2 and stage 1	110
Stage 4: analysing the grid	112
Stage 5: talkback through an analysed grid	113
Stage 6: revising the grid, the topic and/or the purpose	113
Stage 7: beyond the grid	116

7 The space within which personal meaning may be represented	117
The limitations of the FOCUSed display	117
Learning to read the TRIGRID display	123
FOCUSing a grid containing rated (or ranked) responses	127
Calculating the matrix of difference scores	132
Clustering the elements	132
Clustering the constructs	133
SPACE-ing a FOCUSed grid containing ratings or rankings	135
The TRIGRID display showing difference matrices	136
Alternative methods for analysing a grid	139
Principal component analysis	139
POLE-MAPS: how construct poles relate to each other	142
'Spaces for meaning': beyond the scope of the grid	145
The use or mis-use of 'Not Applicables' (NAs)	146
Sub-grids and super-grids: an alternative to laddering	147
Sets, networks, hierarchies and heterarchies	148
8 A PCP approach to perception	156
<i>Part 1 Perception, skill and learning</i>	156
An apology	156
Perception – a new idea?	156
The perceptual components of all human activity	158
Perception	160
Perception and competence	163
Conversational elicitation of a perceptual grid	164
Skilled and unskilled perceptions: a T-C problem	168
Conclusions	170
The Indian miniature	170
The authors' construing of skill, competence and creativity	173
<i>Part 2 Perceptual grids</i>	174
Learning to perceive: perceiving to learn	174
Levels in perceptual experience: robots and hierarchical organisation	176
A partial taxonomy of perceptual processes	177
The perceptual grid: three grids in one	179
The sense-datum grid	180
The public perception grid	181
The inferential grid	182
The mythologies of skill	183
Using the three perceptual grids	185
PAIRS: a method for re-combining the perceptual grids	185

9 The critical self: conversational self-assessment	187
Perceiving from within	187
The critical self	188
Referents and comment from the outside world	189
The knotted ones: human components of self-evaluation	191
The identification of feedback	192
Self-assessment as a perceptual process	193
Self-evaluation of the reading process	195
Moving from the private to the public world of evaluation	199
Extending the use of the PAIRS technique	200
DIFF. and CORE	201
The CHANGE grid: a conversational heuristic for self-development	213
The CHANGE grid conversation	218
Conversational examples	219
Conversation: the mind's construction of the mind	224
Self-assessment: additional grid techniques	226
Critical selves	236
10 Grid conversations for the sharing of meaning	237
<i>Part 1 EXCHANGE grids and the process of conversation</i>	237
Articulating a conversation both as content and process	237
Agreement, understanding and judgment as exchange of meaning	243
EXCHANGE grids: a basic tool for enabling conversation	246
The detailed procedure	247
Introspective reports	253
Refinements in the EXCHANGE grid technique	253
General comment	254
A systematic approach to the creative encounter	260
<i>Part 2 Assessment and examinations: a peculiar form of conversation</i>	264
Examinations and assessment	264
Examination performance and the examiner's and the learner's grids	266
On the meaning of the mathematics exam questions	270
The monitoring of tutor-marked assignments	275
The implications of EXCHANGE of meaning	277

11 Groups and institutions as personal learning systems	282
The construction, exchange and negotiation of meaning in a group	282
SOCIO-GRIDS: in which elements are shared and constructs are personal	283
The structure of the individual feedback session	288
Results and conclusions	289
Follow-up	290
Negotiating shared elements and shared constructs for a group topic	290
POOL, REFINE and CONSENSUS FRAME	292
Personal interpretations of the shared language: individual CONSENSUS FRAME grids	293
Exploring and comparing the views of the management group	295
Comparing two managers' usage of the shared language	295
SOCIO-NETS in which elements and constructs are shared	298
The individual as a community of selves	302
12 The theory and practice of conversational science: tools for the T-C practitioner	307
Learning as an inference from behaviour and experience	307
Appreciative perspectives on learning	308
The teaching/learning contract	315
The seven faces of teaching and learning	318
Increasing the human capacity for learning	322
Beyond the grid	325
STRUCTURES OF MEANING	326
Conducting LEARNING CONVERSATIONS	328
Challenging the robot	329
The need for three related dialogues	329
The management of learning	331
Learning managers	332
Grid tricks: an accessing system to the CSHL reflective learning technology	333
Introduction	333
Section I On the nature of construing systems	333
Section II The grid as a conversational tool	335
Section IIA Conversational grids for self-awareness	335
Section IIB Grids for conviviality	338
Section III Beyond the grid	340
Section IV The CSHL computer programs	341

Appendix A Applications of the repertory grid	344
A1.1 A classification of items of personal experience	344
A1.2 Purposes for which grids have been elicited	350
Appendix B The Centre for the Study of Human Learning	353
The Centre	353
Aims	353
The CSHL reflective learning technology and methodology	354
Research projects and applications	356
Workshops and courses	357
CSHL publications	358
Glossary: The personal structure of meaning of the authors	359
Glossary	359
Major Themes	364
Bibliography	372
Index	385

Activities

Activity 1.1	Reflecting on how topics influence learning	7
Activity 1.2	Reflecting on how clients influence learning	8
Activity 1.3	Reflecting on how institutions influence learning	8
Activity 1.4	Reflecting on how methods influence learning	9
Activity 1.5	Reflecting on how pedagogic authorities influence learning	9
Activity 1.6	Identifying your personal myths about your capacity for learning	12
Activity 2.1	Eliciting personal constructs	21
Activity 2.2	Constructing personally significant learning events	23
Activity 2.3	Elements and constructs	37
Activity 3.1	Completing a repertory grid	53
Activity 4.1	Hand-FOCUSing a grid	76
Activity 4.2	SPACE-ing a FOCUSed grid	76
Activity 4.3	Eliciting a grid of your own	76
Activity 4.4	Hand-FOCUSing with some talkback	76
Activity 5.1	Talkback through a FOCUSed grid	90
Activity 6.1	Negotiating needs and defining a topic and a purpose	98
Activity 6.2	Selecting the element type and revising the topic and purpose if necessary	100
Activity 6.3	Eliciting specific elements	102
Activity 6.4	Eliciting constructs	109
Activity 6.5	Reviewing the raw grid	111
Activity 6.6	Talking back through the analysed grid	113
Activity 6.7	A grid conversation	116
Activity 7.1	Add TRIGRID matrices to a FOCUSed grid	139
Activity 7.2 to 7.x	Explore the patterns revealed by TRIGRID matrices	139
Activity 8.1	Exploring perception	158
Activity 8.2	Eliciting perceptual constructs — auditory	162
Activity 8.3	Eliciting perceptual constructs — tactile	162
Activity 8.4	Exercising non-verbal constructs	162

xviii Activities

Activity 8.5	FOCUSing non-verbal constructs	163
Activity 8.6	Talkback through a non-verbal grid	163
Activity 8.7	Exploring the descriptive and control functions of perception	164
Activity 8.8	Identifying a system of perceptual constructs	168
Activity 8.9	A taste panel	169
Activity 8.10	An Indian miniature grid	170
Activity 10.1	Conceptual analysis of conversations	241
Activity 10.2	Observational analysis of conversations	242
Activity 10.3	Carl Rogers's conditions of learning	246
Activity 10.4	Revealing an 'examiners' construct system	276
Activity 10.5	Comparing assessors	277
Activity 10.6	Exchanging evaluative systems	277
Activity 10.7	Improving performance by knowing how to evaluate it	277
Activity 11.1	Exploring the different selves within	304
Activity 11.2	Exploring topics from different points of view	305
