

TABLE OF CONTENTS.

Human Assessment: An Overview. Stephen E. Newstead, Sidney H. Irvine & Peter L. Dann.	XVII
--	------

Contributors to this Volume.	XXV
------------------------------	-----

PART 1.

APPROACHES TO THE ASSESSMENT OF COGNITION, MOTIVATION
AND PERSONALITY. LECTURE SUMMARIES.

SECTION 1.

Psychometric approaches to the assessment of cognitive abilities.

John B. Carroll.

Lecture 1: Factor-analytic investigations of cognitive abilities.	3
---	---

Lecture 2: Defining abilities through the person-characteristic function.	8
---	---

Lecture 3: Cognitive components and psychological processes.	12
--	----

Hans Eysenck.

Lecture 1: The biological basis of intelligence.	17
--	----

Sidney H. Irvine.

Approaching the LIQ: new waves and old problems in individual differences.	21
--	----

VIII

SECTION 2.

Information processing approaches.

Earl Hunt.

Lecture 1: The information processing approach to intelligence. 27

Lecture 2: Verbal comprehension. 32

Lecture 3: Attention. 36

Robert J. Sternberg.

Lecture 1: Overview of the triarchic theory of human intelligence. 43

Lecture 2: The componential subtheory. 44

Lecture 3: The experiential and contextual subtheories. 46

SECTION 3.

Cross-cultural perspectives.

Philip E. Vernon.

Cognitive and motivational differences between Asian and other cultures. 51

John M. Verster.

Speed of cognitive processing: cross-cultural findings. 53

John Berry.

Lecture 1: The comparative study of cognitive abilities: historical and contemporary issues. 57

Lecture 2: Organisation and ecology of cognitive abilities. 63

Lecture 3: Indigenous and universal cognitive functioning. 69

Z.L. Klich.

Australian Aboriginal cognition in context. 75

SECTION 4.

Non-standard approaches to assessment.

Robert F. Peck.

Lecture 1: Methods of assessing competence. 83

Lecture 2: Assessing high order cognitive skills. 87

Lecture 3: Assessing motivation, values and coping skills that affect competence. 91

Louis Herman.

Contributions of animal cognition to the understanding of human cognition. 95

SECTION 5.

Personality.

Hans Eysenck.

Lecture 2: The biological basis of personality. 101

Lecture 3: The biological basis of neurosis. 104

Paul Kline.

Lecture 1: Personality inventories. 109

Lecture 2: Projective and objective tests. 113

Lecture 3: Measuring unconscious processes. 117

SECTION 6.

Aptitudes and learning.

Richard E. Snow.

Lecture 1: A framework for aptitude theories. 125

Lecture 2: Toward a theory of cognitive aptitude for learning from instruction. 128

Lecture 3: Cognitive and motivational process analysis of tests, tasks and treatments. 132

PART 2.

ASSESSMENT: PRACTICAL IMPLICATIONS FOR EDUCATION AND
OTHER FIELDS.

SECTION 1.

Cognitive abilities.

- Reanalyses of factor-analytic studies of mathematical abilities. 139
Linda DeGuire.
- Metacognition, social context and personal factors in arithmetic problem solving. 155
Harry Osser & F. Rudmin.
- The role of word familiarity in word recognition. 179
Sylvia M. Hains.
- Intellectual, memory and neuropsychological assessment: a clinical survey. 201
Reg Morris, Anthony Wilson & John McCullough.

SECTION 2.

Personality, cognitive style and concentration.

- The interaction of cognition and motivation in performance on tests of field dependence-independence. 217
Cees J. Groot.
- Current theoretical considerations of the trait concept: empirical facts and implications for personality inventory construction. 231
Manfred Amelang & Peter Borkenau.
- A life-span study of liberal arts and professional groups on personal and intellectual growth. 249
Donald R. Brown.
- Concentration ability of students in education: construction and validity of a questionnaire. 259
L. De Leeuw, J.A. Feij & F. van der Zee.
- Student attention during instruction and achievement. 273
Andreas Helmke.

- Personality and test performance. 287
Arnold Bohrer & Stefan van den Broucke.

SECTION 3.

Environmental and social factors.

- Assessing the role of intelligence, motivation and 301
coping skills in explaining the Latin-Americans'
intellectual competence in school.
Robert F. Peck, Arrigo Angelini and Rogelio
Diaz-Guerrero.
- Performance based assessment of depriving environments: 319
comparison of context/response interactions within
inner-city and suburban school settings. Charles R.
Greenwood, Joseph C. Delquadri, Sandra O. Stanley,
Barbara Terry & R. Vance Hall.
- Achievement motivation and socialisation. 341
Saburo Iwawaki.
- Females in technical apprenticeship: development of 351
aptitudes, performance and self-concept.
Heinz Schuler.
- The effects on performance of the congruence between 359
goal-setting strategies and socio-cultural values.
Miriam Erez.

PART 3.

APPROACHES TO ASSESSMENT: SEMINAR ABSTRACTS.

SECTION 1.

Computerised assessment.

- Validation of the Micropat battery of pilot aptitude 371
tests.
D. Bartram.
- Measures of thirty cognitive tasks: intercorrelations 372
and correlations with aptitude battery scores.
B.A. Fairbank, W. Tirre & N. Anderson.

XII

- Analysing cognitive learning strategies through
micro-computer based problem-solving tasks. 374
G.M. Mills.
- Computers in instructional testing: some considerations. 375
M. Ferraris.
- Programming for computer controlled tasks. 376
P.L. Dann.
- Using qualitative data to test computer models of
children's word problem solving. 377
E. De Corte & L. Verschaffel.
- Computerised assessment and remediation of perceptual
skill. 378
G.J. Boggs.
- SECTION 2.
Psychometric and clinical assessment.
- Measuring of spatial visualising ability. 383
R.D. Bock & M. Zimowski.
- Components of spatial ability. 384
J.W. Pellegrino.
- Attitudes: their relationship with intelligence and
achievement and their evaluation. 385
J. Vachon.
- Possibilities and problems of program-independent
achievement testing. 386
W.H. Wijnen.
- The motivation induction method: a technique to identify
the content and to measure the future time perspective
of motivational goal objects. 388
W. Lens.
- Personality assessment: projective techniques and
psychopathology. 389
A. Montenegro.
- Body image assessment and its clinical application. 390
R. Koide.

Assessing the motivation and cognition of physically handicapped by a simulator. H.S. Ranu.	391
SECTION 3.	
Testing and item bias.	
Conceptual implications of bias. Y.H. Poortinga.	395
Explaining item bias. G.J. Mellenbergh.	396
Latent class representation of systematic patterns in test responses. J.A. Paulson.	397
Approaches for identifying and understanding bias in test items. R.K. Hambleton & H.J. Rogers.	398
Group differences in structured tests. F.J.R. van der Vijver.	399
Individual response hierarchies: a neglected issue in the assessment of states and traits. J. Asendorpf.	400
Applying appropriateness measures in achievement and personality assessment. M. Birenbaum.	402
An IP approach towards a structural theory of item-equivalence. M.J. Ippel.	403
A holistic problem-solving approach to reasoning personality and intelligence. A. Bohrer.	404
Cognition and motivation - bringing them together. N. Busch-Jensen.	405

XIV

SECTION 4.

Educational implications.

The construction and use of a learning process test. 409
L. De Leeuw, H. van Daalen & J.J. Beishuizen.

Potential applications of the new research arena with 411
the Positron Emission Tomographer (PET) to the field of
learning and its disorders.
G. Schwartz.

Motivation and information processing in learning 412
experiments.
G. D'Ydewalle.

Assessing creative use of learning. 413
J.H. Durnin.

SECTION 5.

Cognition and skill.

Trait anxiety and cognitive task performance. 417
M.W. Eysenck.

Constraints on cognitive skill. 418
P.A. Kollers.

Direct temporal analysis of individual differences in 419
cognitive skill.
G.R.J. Hockey & A. MacLean.

Covariation of video game cognitive effort and pupil 420
diameter.
S.A. Metalis.

Conscious and unconscious processes in motivation. 422
N. Brody.

Attunement of encoding affect, attention and their 423
effect on memory of mood of narrative.
H. Cook.

Goals and strategies for portraying cognitive 424
structures.
R.A. Yackulic.

Quantifiers and context.
S.E. Newstead & P. Pollard.

426

SECTION 6.

Development, social and cross-cultural factors.

Temperamental individuality and behaviour problems in
childhood.

431

A.M. Torgerson.

Nigerian field research with infants and mothers:
studies of perception, communication and interaction.

432

A.C. Mundy-Castle, P. Bundy & H.Nwanze.

Operationalisation of various conceptions of the
emic-etic distinction.

433

B.J. Starr.

Explanation of structural cerebral asymmetries.

434

D. McShane.

Studies of the factor structure and external validity of
social intelligence tests.

435

M. Amelang.

Effects of self-control ad payment manipulation on the
performance of complex tasks under time-sharing
conditions.

436

M. Erez.
