

PROCEEDINGS OF THE EIGHTH ANNUAL CONFERENCE
 OF THE
 COGNITIVE SCIENCE SOCIETY
 Amherst, Massachusetts
 August 15-17, 1986

PRESENTED PAPERS

FRIDAY, AUGUST 15

Learning Distributed Representations of Concepts.....	1
Geoffrey E. Hinton	
Representing Causal Schemata in Connectionist Systems.....	13
Richard M. Golden	
Skill Learning and Repetition Priming in Symmetry Detection: Parallel Studies of Human Subjects and Connectionist Models.....	23
Neal J. Cohen, Irene T. Abrams, Walter S. Harley, Lisa Tabor, and Terrence J. Sejnowski	
Adaptive Resonance Theory: Stable Self-organization of Neural Recognition Codes in Response to Arbitrary Lists of Input Patterns.....	45
Gail A. Carpenter and Stephen Grossberg	
Representing Magnitude by Memory Resonance.....	63
Marten J. den Uyl	
The Spacing Effect on Nettalk, a Massively-Parallel Network.	72
Charles R. Rosenberg and Terrence J. Sejnowski	
Processing Verb Phrase Anaphors.....	90
Michael K. Tanenhaus and Greg N. Carlson	
The Effect of the Discourse Center on the Local Coherence of a Discourse.....	96
Susan B. Hudson, Michael K. Tanenhaus, and Gary S. Dell	
The Time Course of Pronoun Comprehension.....	102
Rosemary J. Stevenson	
The Comprehension of Conceptual Anaphora in Discourse.....	110
Morton Ann Gernsbacher	
Conditioning and Categorization: Some Common Effects of Informational Variables in Animal and Human Learning.....	126
Mark A. Gluck and Gordon H. Bower	
Simultaneous Configural Classical Conditioning.....	141
Jeffrey C. Schlimmer and Richard H. Granger, Jr.	
A Layered Network Model for Learning-to-Learn and Configuration in Classical Conditioning.....	154
E. James Kehoe	
Simulation of the Classically Conditioned Nictitating Membrane Response by a Neuron-Like Adaptive Element: a Real-time Variant of the Sutton-Barto Model.....	176
Diane E. J. Blazis, John E. Desmond, John W. Moore, and Neil E. Berthier	
SATURDAY, AUGUST 16	
Introspection and Reasoning about the Beliefs of Other Agents.....	187
Anthony S. Maida	

Causal Reasoning about Quantities.....	196
Kenneth D. Forbus and Dedre Gentner	
Neither Pictures Nor Propositions: The Intentionality of Mental Imagery.....	208
Daniel Reisberg and Deborah Chambers	
Methods for Evaluating the Validity of Hypothesized Analogies.....	223
John Clement	
Using Frequency- and Orientation-Tuned Channels to Determine Surface Slant.....	235
Paul Kube	
Adaptation, Brightness Perception and Their Correlation with Photoreceptor Responses.....	245
K.N. Lelovic	
Midbrain Mechanisms for Orienting Visual Attention.....	260
Robert D. Rafal and Albrecht W. Ihhoff	
Repetition-Sensitive Components of Neural Activation: Evidence from Intracranial Recordings from the Human Temporal Lobe.....	272
Michael E. Smith, Eric Halgren, and Gary Heit	
Default Defeaters in Explanation-Based Reasoning.....	283
Gilbert Harman, Richard Cullingford, Marie Bienkowski, Ken Salem, and Ian Pratt	
Sphexishness, Epistemic Bounds, and a Priori Psychology.....	293
M. P. Smith	
Counterfactual Conditionals and the Conjunction Fallacy.....	308
John M. Miyamoto and Emily Dibble	
Should We Use Probability in Uncertain Inference Systems?... Max Henrion	320
Specificity of Expertise in Clinical Reasoning.....	331
Guy-Marie Joseph and Vimla L. Patel	
Reflexibility in Problem Solving: The Social Context of Expertise.....	346
James A. Levin, Margaret Riel, Moshe Cohen, Michael Goeller, Marcia Boruta, and Naomi Miyake	
Intelligent Tutoring Systems for Scientific Inquiry Skills..	353
Valerie Shute and Jeffrey Bonar	
Focus and Learning in Program Design.....	371
Robert S. Rist	
Towards Completely Integrated Parsing and Inferencing.....	381
Christopher K. Riesbeck and Charles E. Martin	
Speak of the Devil: Representing Delictic and Speech Act Knowledge in an Integrated Lexical Memory.....	388
Michael Gasser and Michael G. Dyer	
Repertory Actors' Memory for Their Parts.....	399
William L. Oliver and K. Anders Ericsson	
A Computational Model which Addresses Errors of Over-Generalization and their Subsequent Disappearance In Early Child Language Acquisition.....	407
Jane C. Hill	
Remarks on the Psychological Reality of the Subset Principle: Its Relation to Universal Grammar as a Model of the Initial State.....	420
Barbara Lust	

SUNDAY, AUGUST 17

Invited Address: A Theory of Discourse Structure.....	432
Barbara J. Grosz	
The Use of Remindings In Planning.....	442
Kristian Hammond	
Knowing What to Ask Next and Why: Asking Pertinent Questions Using Cases and Hypotheticals.....	452
Kevin D. Ashley	
Towards a Memory Architecture that Supports Reminding.....	467
Janet L. Kolodner and Richard E. Cullingford	
Application of Cognitive Science Methods to Psychotherapeutic Problem Solving: A Case Study and Some Theory.....	478
Rolf Pfeifer and Marianne Leuzinger-Bohleber	
Encoding Planning Knowledge for Recognition, Construction, and Learning.....	488
Charles Dolan and Michael Dyer	
The Law as a Learning System.....	500
Edwina L. Rissland and Robert T. Collins	
Solving Puzzles with a Connectionist Network Using a Hill-Climbing Heuristic.....	514
Alan H. Kawamoto	
BoltzCONS: Reconciling Connectionism with the Recursive Nature of Stacks and Trees.....	522
David S. Touretzky	
Attractor Dynamics and Parallelism in a Connectionist Sequential Machine.....	531
Michael I. Jordan	
The Representation of Objects for Grasping.....	547
Thea Iberall	
A Connectionist Learning Model for 3-Dimensional Mental Rotation, Zoom, and Pan.....	562
Bartlett W. Mel	
Seeing-More-Than-is-There: A Probe of Retinoid Networks.....	572
Arnold Trebus and Alexander Pollatsek	

POSTER PRESENTATIONS**FRIDAY, AUGUST 17**

An Architecture for Mathematical Cognition.....	585
Kurt Ammon	
Cluster: An Approach to Modeling Context.....	595
Yigal Arens	
Effects of Focal Brain Damage on Categorization of Visual and Haptic Features.....	601
Bruce Bolster, Jane Honeyman, Valerie Gillis, and Martha Wilson	
Belief Maintenance with Uncertainty.....	607
A. Julian Craddock and Roger A. Browse	
Some Factors Influencing the Comprehension of Pronouns in Text.....	613
Rosalind A. Crawley	

A Psychological Investigation Into the Deictic Center.....	621
Joyce H. Daniels	
Towards a Comparative Psychology of Cognitive Content:	
Exploring Tree Preference Asymmetries in Humans,	
Pigeons and Monkeys.....	627
Michael R. Dawson, Dwight S. Mazmanian, and William A. Roberts	
Is Distributed Connectionism Compatible with the	
Physical Symbol System Hypothesis?.....	639
Mark Derthick and David C. Plaut	
Topological and Dynamical Aspects of a Neural Network	
Model for Generation of Pursuit Motor Programs.....	645
R. Eckmiller	
Three Constructive Algorithms for Network Learning.....	652
Stephen I. Gallant	
A Neural Simulation of Classical Conditioning In Aplysia....	661
Howard N. Henry	
Putting Affect Into Text.....	669
Eduard H. Hovy	
Illusory Conjunctions of Objects and Forms: Integration	
Errors in a Very Short-term Store.....	676
Helene Intraub	
The Literate Listener: Effects of Spelling on Syllable	
Judgments.....	684
Jola Jakimik and Rebecca Treiman	
Modifying Explanations to Understand Stories.....	691
Alex Kass	
Computer Strategy of Decision Making Under Time Pressure....	697
Daniel Lacombe, Claude Sarrazin, and Claude Alain	
Organizing Memory for Explanation.....	710
David B. Leake and Christopher C. Owens	
A Neural Network Theory of Frontal Lobe Function.....	716
Daniel S. Levine	
Views From a Kill.....	728
James H. Martin	
Operating Principles and Personal Theories: An Outline of	
their Roles In Early Lexical Development.....	734
Carolyn B. Mervis	
Studying the Problem Solving Behavior of Experts and	
Novices in Physics Via Computer-Based Problem-Analysis	
Environments.....	741
Jose Mestre and William Gerace	
Cognitive Control of Autonomous Mobile Robots: Nested	
Hierarchical Intelligent Module.....	747
A. Meystel	
Self-supervised Learning: A Scheme for Discovery	
of "Natural" Categories by Single Units.....	765
Paul Munro	
Anatomising Lexical Decision In Phrasal Contexts: When	
Does Truck Not Prime Car?.....	773
Padraig G. O'Seaghda	
Strategy Selection and Degree of Expertise In Medical	
Reasoning.....	780
Vimla L. Patel, Jose F. Arocha, and Guy J. Groen	

A Real-time Attentional-associative Network for Classical Conditioning of the Rabbit's NMR.....	794
Nestor A. Schmajuk and John W. Moore	
Using Mental Schemata: An Experimental Analysis of Computer Skill Acquisition.....	808
Marc M. Sebrechts and Charlotte T. Furstenberg	
A Model of Attention Focussing During Problem Solving.....	817
Jude W. Shavlik and Gerald F. DeJong	
Two Problems with Backpropagation and other Steepest-descent Learning Procedures for Networks.....	823
Richard S. Sutton	
Interest when Nothing Happens: A Note on Narrative Retardation.....	832
Ed S. H. Tan	
A Model for Parsing, Learning and Recognizing Objects in a Complex Environment.....	843
Arnold Trehub	
Mental Representation of Spatial Information:	
A Production System Model for Priming and Verification.....	852
Karl F. Wender, Monica Wagener, and Bernd Wittmann	
Inverting a Connectionist Network Mapping by Back-Propagation of Error.....	859
Ronald J. Williams	
Complement Selection and the Lexicon in Japanese.....	866
Toshiyuki Yamamoto	
From Structure to Process.....	876
M. Zock
