

# Table of Contents

The Seventeenth Annual Conference of  
the Cognitive Science Society  
University of Pittsburgh  
Pittsburgh, Pennsylvania 15260  
July 22-25, 1995

Conference Organizers .....	xiii
Electronic Index Access Information .....	xiv
Preface .....	xv
Reviewers .....	xvii

## PLENARY ADDRESSES

Names and Titles .....	1
------------------------	---

## SYMPOSIA

<i>Anchors, Cases, Problems, and Scenarios as Contexts for Learning</i> .....	5
Organizers: Cindy E. Hmelo and N. Hari Narayanan	
Participants: Ray Bareiss, Janet Kolodner, Vimla Patel, and Susan Williams	
<i>Production System Models of Complex Cognition</i> .....	9
Organizer: John R. Anderson	
Participants: Patricia A. Carpenter, Bonnie E. John, Marcel Adam Just, David Kieras, and David E. Meyer	
<i>Using High-Dimensional Semantic Spaces Derived from Large Text Corpora</i> .....	13
Organizers: Curt Burgess and Garrison W. Cottrell	
Participants: Dan Clouse, Thomas Landauer, Kevin Lund, and Hinrich Schuetze	
<i>Brain Imaging and its Impact on the Development of Cognitive Science</i> .....	15
Organizer: Walter Schneider	
Participants: Todd S. Braver, Cameron S. Carter, Jonathon D. Cohen, Jon Jonides, Robert Koeppel, Mark Mintun, Edward E. Smith, Keith R. Thulborn, and Michael Worden	

## PAPER PRESENTATIONS

### Language: Word Recognition

<i>Modeling the Perception of Spoken Words</i> .....	19
M. Gareth Gaskell and William D. Marslen-Wilson	
<i>Eye-movements Accompanying Language and Action in a Visual Context: Evidence Against Modularity</i> .....	25
Michael Spivey-Knowlton, Michael Tanenhaus, Kathleen Eberhard, and Julie Sedivy	
<i>Using Non-Cognate Interlexical Homographs to Study Bilingual Memory Organization</i> .....	31
Robert M. French and Clark Ohnesorge	
<i>Semantic and Associative Priming in a Distributed Attractor Network</i> .....	37
David C. Plaut	

## **Vision I**

<i>Evidence for Subitizing as a Stimulus-Limited Processing Phenomenon</i> .....	43
Tony J. Simon and Ángel Cabrera	
<i>A Capacity Approach to Kinematic Illusions: The Curtate Cycloid Illusion in the Perception of Rolling Motion</i> .....	49
Matthew I. Isaak	
<i>A Model of Scan Paths Applied to Face Recognition</i> .....	55
Keiji Yamada and Garrison W. Cottrell	
<i>The ACT-R Theory and Visual Attention</i> .....	61
John R. Anderson, Michael Matessa, and Scott Douglass	

## **Case-Based Reasoning**

<i>Meta-Cognitive Attention: Reasoning about Strategy Selection</i> .....	66
Ruediger Oehlmann	
<i>Case-Based Comparative Evaluation in TRUTH-TELLER</i> .....	72
Bruce M. McLaren and Kevin D. Ashley	
<i>Opportunistic Reasoning: A Design Perspective</i> .....	78
Marin D. Simina and Janet L. Kolodner	
<i>Combining Rules and Cases to Learn Case Adaptation</i> .....	84
David B. Leake	

## **Foundations**

<i>Time-Accuracy Data Analysis: Separating Stimulus-limited and Post-stimulus Processes</i> .....	90
Ángel Cabrera and Tony J. Simon	
<i>Cognitive Science and Two Images of the Person</i> .....	96
Andrew Brook	
<i>Is Cognitive Science Truly Interdisciplinary? The Case of Interdisciplinary Collaborations</i> .....	100
Christian D. Schunn, Takeshi Okada, and Kevin Crowley	
<i>A 4-Space Model of Scientific Discovery</i> .....	106
Christian D. Schunn and David Klahr	

## **Language: Lexical Semantics**

<i>Angle, Distance, Shape, and their Relationship to Projective Relations</i> .....	112
Klaus-Peter Gapp	
<i>An Approach to the Semantics of some English Temporal Constructions</i> .....	118
Ian Pratt and David S. Brée	
<i>Material Object Transfer and Communication of Ideas: Analogy of Naive Theories and its Linguistic Manifestation</i> .....	124
Arthur Merin	
<i>Predicating Nominal Compounds</i> .....	130
Bernard Jones	

## **Cognitive Neuroscience & Neuropsychology**

<i>A Model of Practice Related Shifts in the Locus of Brain Activity During Verbal Response Selection Tasks</i> .....	136
Vijaykumar Gullapalli, Jack J. Gelfand, and Douglas L. T. Rohde	
<i>A Connectionist Model of Hemispheric Interaction in Unilateral Visuospatial Neglect</i> .....	142
Richard Shillcock and Paul Cairns	
<i>The Interaction of Spatial Reference Frames and Hierarchical Object Representations:</i>	
<i>A Computational Investigation of Drawing in Hemispatial Neglect</i> .....	148
Jeffrey Beng-Hee Ho, Marlene Behrmann, and David C. Plaut	
<i>A Model of Visually Guided Plasticity of the Auditory Spatial Map in the Barn Owl</i> .....	154
Andrea Haessly, Joseph Sirosh, and Risto Miikkulainen	

## **Vision II**

<i>Mandatory Scale Perception Promotes Flexible Scene Categorizations</i> .....	159
Aude Oliva and Philippe G. Schyns	
<i>Ecological Robotics: Controlling Behavior with Optical Flow</i> .....	164
Andrew P. Duchon, William H. Warren, and Leslie Pack Kaelbling	
<i>Developing Object Permanence: A Connectionist Model</i> .....	170
Denis Mareschal, Kim Plunkett, and Paul Harris	

## **Concept Learning I**

<i>Belief Revision in Models of Category Learning</i> .....	176	
Evan Heit		
<i>The “Rational” Number <math>e</math>: A Functional Analysis of Categorization</i> .....	182	
Ángel Cabrera		
<i>Consistency is the Hobgoblin of Human Minds: People Care but Concept Learning Models Do Not</i> .....		188
Dorrit Billman and David Dávila		
<i>The Abstraction of Relevant Features by Children and Adults:</i>		
<i>The Case of Visual Stimuli</i> .....	194	
Jean-Pierre Thibaut		

## **Visual, Spatial, and Diagrammatic Reasoning**

<i>Preferred Mental Models in Qualitative Spatial Reasoning:</i>	
<i>A Cognitive Assessment of Allen’s Calculus</i> .....	200
Markus Knauff, Reinhold Rauh, and Christoph Schlieder	
<i>Diagram-Based Problem Solving: The Case of an Impossible Problem</i> .....	206
N. Hari Narayanan, Masaki Suwa, and Hiroshi Motoda	
<i>Complementary Strategies: Why We Use Our Hands When We Think</i> .....	212
David Kirsh	
<i>A Computational Model of Diagram Reading and Reasoning</i> .....	218
Anthony M. Leonardo, Hermina J. M. Tabachneck, and Herbert A. Simon	

## **Language: Acquisition and Change**

<i>Multiple Determinants of the Productive Use of the Regular Past Tense Suffix</i> .....	224
Virginia A. Marchman and Daniel E. Callan	
<i>Inducing a Grammar Without an Explicit Teacher: Incremental Distributed Prediction Feedback</i> .....	230
Michael Spivey-Knowlton and Jenny R. Saffran	
<i>Connectionist Rules of Language</i> .....	236
Gert Westermann and Rainer Goebel	
<i>Lexical Change as Nonlinear Interpolation</i> .....	242
Whitney Tabor	

## **Problem Solving**

<i>How Misconceptions Affect Formal Physics Problem Solving: Model-Based Predictions and Empirical Observations</i> .....	248
Rolf Ploetzner	
<i>The Effects of Self-Explanation on Studying Examples and Solving Problems</i> .....	253
William A. Sandoval, J. Gregory Trafton, and Brian J. Reiser	
<i>Effects of Background on Subgoal Learning</i> .....	259
Richard Catrambone	
<i>Making Heads or Tails out of Selecting Problem-Solving Strategies</i> .....	265
Marsha C. Lovett and John R. Anderson	

## **Reasoning: Explanation and Expertise**

<i>Explanation and Evidence in Informal Reasoning</i> .....	271
Sarah Brem and Lance J. Rips	
<i>Integration of Anomalous Data in Multicausal Explanations</i> .....	277
Josef Krems and Todd R. Johnson	
<i>Are Experts Unbiased? Effects of Knowledge and Attitude on Memory for Text</i> .....	283
Jennifer Wiley	
<i>Complex Decision Making in Providing Surgical Intensive Care</i> .....	287
Andre W. Kushniruk, Vimla L. Patel, and David M. Fleischer	

## **Concept Learning II**

<i>A Connectionist Model for Classification Learning - The IAK Model</i> .....	293
Martin Heydemann	
<i>Implicit Learning in the Presence of Multiple Cues</i> .....	298
Axel Cleeremans	
<i>Training Regimens and Function Compatibility: Implications for Understanding the Effects of Knowledge on Concept Learning</i> .....	304
Sheldon J. Tetewsky, Thomas R. Shultz and Yoshio Takane	
<i>The Spontaneous Use of Perceptual Representations during Conceptual Processing</i> .....	310
Karen L. Olseth and Lawrence W. Barsalou	

## **Language: Sentence-level Phenomena I**

<i>Indirect Speech Acts and Politeness: A Computational Approach</i> .....	316
Liliana Ardissono, Guido Boella, and Leonardo Lesmo	
<i>Considering Explanation Failure during Content Planning</i> .....	322
Ingrid Zukerman and Richard McConachy	
<i>Structural Focusing, Thematic Role Focusing and the Comprehension of Pronouns</i> .....	328
Rosemary J. Stevenson and Agnieszka J. Urbanowicz	
<i>Question Answering in the Context of Illustrated Expository Text</i> .....	334
William B. Baggett and Arthur C. Graesser	

## **Collaborative Problem Solving**

<i>Collaborative Discovery in a Scientific Domain</i> .....	340
Takeshi Okada and Herbert A. Simon	
<i>Collaborative Processing of Incompatible Information</i> .....	346
Carol Chan	
<i>A Theory of the Multiple Roles of Diagnosis in Collaborative Problem Solving Discourse</i> .....	352
Cynthia S. Gadd	

## **Language: Sentence-level Phenomena II**

<i>Strong Semantic Systematicity from Unsupervised Connectionist Learning</i> .....	358
Robert F. Hadley and Michael B. Hayward	
<i>Pragmatic Effects in Zero Anaphor Resolution: Implications for Modularity</i> .....	364
Mark Durrant-Peatfield and William Marslen-Wilson	
<i>A Connectionist Model of Instruction Following</i> .....	369
David C. Noelle and Garrison W. Cottrell	
<i>Using Intonationally-Marked Presuppositional Information in On-line Language Processing: Evidence from Eye Movements to a Visual Model</i> .....	375
Julie C. Sedivy, Michael K. Tanenhaus, Kathleen Eberhard, Michael Spivey-Knowlton, and Gregory N. Carlson	

## **Reasoning: Mental Models**

<i>How to Make the Impossible Seem Probable</i> .....	381
Philip N. Johnson-Laird and Fabien Savary	
<i>The Temporality Effect in Thinking about What Might Have Been</i> .....	385
Ruth M. J. Byrne, Ronan Culhane, and Alessandra Tasso	
<i>Gestures Reveal Mental Models of Discrete and Continuous Change</i> .....	391
Martha Wagner Alibali, Sharon Syc, Miriam Bassok, Susan Goldin-Meadow, and Karen L. Olseth	
<i>A Cognitive Analysis of the Task Demands of Early Algebra</i> .....	397
Hermina J. M. Tabachneck, Kenneth R. Koedinger, and Mitchell J. Nathan	

## **Intelligent Tutoring Systems and Educational Methods**

<i>Problem-Based Learning: Development of Knowledge and Reasoning Strategies</i> .....	403
Cindy E. Hmelo	

<i>Can Middle-School Students Learn to Reason Statistically Through Simulation Activities?</i> .....	409
Helena P. Osana, Sharon J. Derry, and Joel R. Levin	
<i>Calculation and Strategy in the Equation Solving Tutor</i> .....	413
Steven Ritter and John R. Anderson	
<i>Using a Well-Structured Model to Teach in an Ill-Structured Domain</i> .....	419
Vincent Aleven and Kevin D. Ashley	

### **Reasoning: Causality and Induction**

<i>Causal Paradox: When a Cause Simultaneously Produces and Prevents an Effect</i> .....	425
Michael R. Waldmann and York Haggmayer	
<i>Alternative Approaches to Causal Induction: The Probabilistic Contrast Versus the Rescorla-Wagner Model</i> .....	431
Aaron S. Yarlas, Patricia W. Cheng, and Keith J. Holyoak	
<i>Biases in Refinement of Existing Causal Knowledge</i> .....	437
Woo-kyoung Ahn and Raymond J. Mooney	
<i>More Than Feature Comparison: Processes Underlying Similarity and Probability Judgment</i> .....	443
Valerie M. Chase and Miriam Bassok	

### **Analogy**

<i>On Order Effects in Analogical Mapping: Predicting Human Error Using IAM</i> .....	449
Mark T. Keane	
<i>A Metric for Situated Difficulty</i> .....	455
Carl Edlund and Michael Lewis	
<i>Structural and Thematic Alignments in Similarity Judgments</i> .....	460
Miriam Bassok and Douglas L. Medin	
<i>Retrieval and Learning in Analogical Problem Solving</i> .....	466
Randolph M. Jones and Pat Langley	

### **Non-Symbolic Models**

<i>Incorporating Real-Time Random Time Effects in Neural Networks: A Temporal Summation Mechanism</i> .....	472
Cheongtag Kim and In Jae Myung	
<i>Two Layer Digital RAAM</i> .....	478
Alan D. Blair	
<i>Learning to Count without a Counter: A Case Study of Dynamics and Activation Landscapes in Recurrent Networks</i> .....	482
Janet Wiles and Jeff Elman	
<i>Mere Exposure Effects—Merely Total Activation?</i> .....	488
Bruce F. Katz	

### **Reasoning: Dynamic Environments**

<i>Alarms: Heuristics for the Control of Reasoning Attention</i> .....	494
Timothy J. Norman and Derek Long	
<i>Developing User Model-Based Intelligent Agents</i> .....	500
Alonso H. Vera and Julio K. Rosenblatt	

<i>Components of Dynamic Skill Acquisition</i> .....	506
Frank J. Lee, John R. Anderson, and Michael P. Matessa	
<i>A Connectionist Formulation of Learning in Dynamic Decision-Making Tasks</i> .....	512
Faison P. Gibson and David C. Plaut	
 <b>POSTER PRESENTATIONS</b>	
<i>Causal Structure in Categorization</i> .....	521
Woo-kyoung Ahn and Mary E. Lassaline	
<i>Model-Based Indexing and Index Learning in Analogical Design</i> .....	527
Sambasiva R. Bhatta and Ashok K. Goel	
<i>The Relative Importance of Spaces and Meaning in Reading</i> .....	533
James R. Booth, Julie Epelboim, and Robert M. Steinman	
<i>The Convergence of Explanatory Coherence and the Story Model: A Case Study in Juror Decision</i> .....	539
Michael D. Byrne	
<i>Representing Dialectical Arguments</i> .....	544
Clark A. Chinn	
<i>A Scowl is Worth a Thousand Words: Positive and Negative Facial Expressions Automatically Prime Affectively Congruent Information in Memory</i> .....	550
Joseph V. Ciarrochi	
<i>Towards an Object-Oriented Language for Cognitive Modelling</i> .....	556
Richard Cooper	
<i>Learning New Spatially Oriented Game-Playing Agents through Experience</i> .....	562
Susan L. Epstein and Jack Gelfand	
<i>On the Roles of Search and Learning in Time-Limited Decision Making</i> .....	568
Susan L. Epstein	
<i>Discourse Processing in Situated Cognition: Learning through Tutorial Dialogue in Complex Domains</i> .....	574
Carl H. Frederiksen, Marguerite Roy, and Denis Bédard	
<i>The HUME Model-Driven Discovery System</i> .....	580
Adrian Gordon	
<i>Informal Reasoning and Literary Expertise</i> .....	585
Barbara Graves	
<i>Combining Analyses of Cognitive Processes, Meanings and Social Participation: Understanding Symbolic Representations</i> .....	591
James G. Greeno and Randi A. Engle	
<i>Complexity of Structure Mapping in Human Analogical Reasoning: A PDP Model</i> .....	597
Graeme S. Halford, William H. Wilson, and Matthew McDonald	
<i>Frequency, Competition and Lexical Representation</i> .....	602
Mary Hare, Lianne Older, Michael Ford, and William Marslen-Wilson	
<i>Exploring the Continuum of Unit Size in Word Identification</i> .....	607
Catherine L. Harris	

<i>Learning Sets of Related Concepts: A Shared Task Model</i> .....	613
Tim Hume and Michael J. Pazzani	
<i>Exploring the Variety and Use of Punctuation</i> .....	619
Bernard Jones	
<i>The Roles of Motion and Moving Parts in Noun and Verb Meanings</i> .....	625
Alan W. Kersten and Dorrit Billman	
<i>SOUL: A Cognitive Parser</i> .....	631
Lars Konieczny and Gerhard Strube	
<i>Evidence for Explanatory Patterns in Evolutionary Biology</i> .....	637
Jorge F. Larreamendy-Joerns and Stellan Ohlsson	
<i>Learning Statistics through Exemplars</i> .....	643
Nancy C. Lavigne and Susanne P. Lajoie	
<i>Parsing and Recovery</i> .....	648
Vincenzo Lombardo	
<i>Mutability and the Determinants of Conceptual Transformability</i> .....	654
Bradley C. Love and Steven A. Sloman	
<i>Semantic and Associative Priming in High-Dimensional Semantic Space</i> .....	660
Kevin Lund, Curt Burgess and Ruth Ann Atchley	
<i>Steps Toward Real-time Natural Language Processing</i> .....	666
Steven L. Lytinen and Noriko Tomuro	
<i>Speaking of Wine: Verbal and Perceptual Expertise Mediate Verbal Overshadowing in a Taste Recognition Task</i> .....	671
Joseph M. Melcher and Jonathan W. Schooler	
<i>Structure-Mapping vs. High-level Perception: The Mistaken Fight Over the Explanation of Analogy</i> .....	678
Clayton T. Morrison and Eric Dietrich	
<i>Why Semantics Lags Behind Phonology in Word Identification</i> .....	683
Charles A. Perfetti, Li Hai Tan, Sulan Zhang, and Mara C. Georgi	
<i>The Processing of Associations versus the Processing of Relations and Symbols: A Systematic Comparison</i> .....	688
Steven Phillips, Graeme S. Halford, and William H. Wilson	
<i>A Visual Routines Based Model of Graph Understanding</i> .....	692
Yusuf Pisan	
<i>A Model of Conversation Processing Based on Micro Conversational Events</i> .....	698
Massimo Poesio	
<i>The Statistics of the Environment Affect the Functional Architecture of Vision in Adulthood: A Reduced Alphanumeric Category Effect in Canadian Mail Sorters</i> .....	704
Thad A. Polk and Martha J. Farah	
<i>Skilled Like a Person: A Comparison of Human and Computer Game Playing</i> .....	709
Mary Jo Rattermann and Susan L. Epstein	
<i>A Dual-Route Model that Learns to Pronounce English Words</i> .....	715
Roger W. Remington and Craig S. Miller	

<i>Mental Models and Rule Rephrasing</i> .....	720
Juliet Richardson and Thomas C. Ormerod	
<i>How People Reason about Temporal Relations</i> .....	725
Walter Schaeken and Philip N. Johnson-Laird	
<i>Arguing and Reasoning in a Technology-Based Class</i> .....	731
Baruch Schwarz and Rina Hershkowitz	
<i>To Help or Not to Help</i> .....	736
Mahendra Sekaran and Sandip Sen	
<i>Attitudes to Logical Independence: Traits in Quantifier Interpretation</i> .....	742
Keith Stenning and Richard Cox	
<i>Arguments and Adjuncts: A Computational Explanation of Asymmetries in Attachment Preferences</i> .....	748
Suzanne Stevenson	
<i>Bridging the Conceptual Gap</i> .....	754
Hiroaki Suzuki	
<i>Representing the Bilingual's Two Lexicons</i> .....	760
Michael S. C. Thomas and Kim Plunkett	
<i>Gestalt Principles and Parallel Constraint Satisfaction Processes: The Parallels</i> .....	766
Eric J. Vanman, Stephen J. Read, and Lynn C. Miller	
<i>Does Hypothesis-Instruction Improve Learning?</i> .....	771
Regina Vollmeyer and Bruce D. Burns	
<i>Domains, Knowledge Structures, and Integration Strategies</i> .....	777
William D. Wattenmaker	
<i>Does Meta-space Theory Explain Insight?</i> .....	781
David F. Wolf II, Jonathan Beskin, and Eric Dietrich	
<i>Effects of Category-Learning on Categorization—An Analysis of Inference-Based and Classification-Based Learning</i> .....	786
Takashi Yamauchi and Arthur B. Markman	
<i>The Integration of Internal and External Information in Numerical Tasks</i> .....	791
Jiajie Zhang and Honbin Wang	
<b>AUTHOR INDEX</b> .....	797
