

TABLE OF CONTENTS

1. SHORT-TERM MEMORY LIMITS IN HUMAN PERFORMANCE	S. T. Klapp	1
1.1. INTRODUCTION		1
1.1.1. Statement Of The Problem		1
1.1.2. Short-Term Memory As A Separate System		2
1.2. DISTRACTION		3
1.2.1. The Brown-Peterson Effect		3
1.2.2. Early vs. Late Rehearsal and Distraction		3
1.3. CAPACITY LIMIT		4
1.3.1. A Particular View of Working Memory		5
1.3.2. Concurrent Memory Load Method: A Critical Analysis		7
1.3.3. Review of Memory Load Experiments		8
1.3.4. Types of Memory Which Have Been Proposed		11
1.3.4.1. Auditory		11
1.3.4.2. Spatial (visual)		12
1.3.4.3. Motor program		12
1.3.4.4. Actively-formed hypotheses		13
1.3.4.5. Priming of long-term memory as a code in immediate memory		13
1.3.4.6. Distinct codes for item and order information		14
1.3.4.7. Central executive with slave systems		14
1.3.5. Evaluation		15
1.4. HUMAN FACTORS APPLICATIONS		15
1.4.1. Distraction		16
1.4.2. Capacity Limit		17
1.4.3. Workload		18
1.4.4. Conclusion		19
2. ATTENTION	C. D. Wickens	29
2.1. METAPHORS OF ATTENTION		30
2.2. SELECTIVE ATTENTION		31

2.2.1. Optimality Of Selection	31
2.2.2. Implications For System Design	33
2.2.3. Visual Dominance And Sensory Interaction	37
2.3. DIVIDED ATTENTION	39
2.3.1. Spatial Separation	40
2.3.2. Object Integrality	43
2.3.3. Task Similarity	49
2.3.4. Micro Level Similarity	49
2.3.5. Macro Level Similarity: Multiple Resource Theory	50
2.4. RESOURCES, PRACTICE, AND DIFFICULTY	56
2.5. ATTENTION AND HUMAN ERROR	60
2.6. CHANGES IN ATTENTIONAL FUNCTION	62
2.6.1. Stress And Attentional Narrowing	63
2.6.2. Attention Changes With Skill Development	64
2.6.3. Attention Differences As An Ability	67
2.7. CONCLUSION	70
3. MENTAL WORKLOAD B. H. Kantowitz	81
3.1. WHY PEOPLE ASK "WHAT IS MENTAL WORKLOAD"	82
3.2. HEURISTICS FOR STUDYING MENTAL WORKLOAD	84
3.3. ATTENTION AND MENTAL WORKLOAD	85
3.3.1. Spare Capacity	88
3.3.2. Kantowitz-Knight Hybrid Model	91
3.3.3. Summary	93
3.4. TASK DIFFICULTY VERSUS TASK COMPLEXITY	94
3.4.1. Summary	96
3.5. MULTI-DIMENSIONAL ASPECTS OF MENTAL WORKLOAD	97
3.5.1. Feelings	97
3.5.2. Effort	98
3.5.3. Biocybernetics	100
3.5.4. Stress and Strain	101
3.5.5. Other Aspects	101
3.6. MEASURING MENTAL WORKLOAD	102
3.6.1. Subjective Ratings	102
3.6.1.1. Cooper-Harper Scales	103

3.6.1.2. SWAT Ratings.	103
3.6.1.3. Weighted Bi-Polar Ratings.	104
3.6.2. Secondary Tasks	108
3.6.3. Biocybernetic Measures	111
3.6.4. Other Measures	113
3.7. CONCLUSIONS	114
4. HUMAN DECISION PROCESSES: HEURISTICS AND TASK STRUCTURE D. N. Kleinmuntz	123
4.1. INTRODUCTION	123
4.2. JUDGMENT UNDER UNCERTAINTY	124
4.2.1. Heuristics	124
4.2.2. The Prevalence of Biased Judgments	125
4.3. CHOICE STRATEGIES AND TASK STRUCTURE	127
4.3.1. Task Determinants	128
4.3.2. Cognitive Effort and Strategy Selection	130
4.4. DYNAMIC DECISION ENVIRONMENTS	131
4.4.1. Feedback in Continuous Tasks	132
4.4.2. Dynamic Decision Making From a Continuous Perspective	133
4.5. METHODS FOR EXPLORING DECISION STRATEGIES	135
4.5.1. Observed Judgment and Choice	136
4.5.2. Input-Output Models	136
4.5.3. Process Tracing Methods	138
4.5.3.1. Verbal protocols	138
4.5.3.2. Information search records	139
4.5.4. Simulation of Decision Strategies	140
4.5.5. Multimethod Approaches	142
4.6. IMPLICATIONS FOR HUMAN-MACHINE SYSTEMS	143
4.6.1. Problem Decomposition as a Basic Approach	143
4.6.2. Alternate Approaches	144
4.6.3. Evaluating Decision Aiding Systems	146
4.7. CONCLUSION	147

5. AUTOMATIC AND CONTROLLED PROCESSING THEORY AND ITS APPLICATIONS TO HUMAN FACTORS PROBLEMS . . . A. D. Fisk, P. L. Ackerman, and W. Schneider	159
5.1. INTRODUCTION	159
5.2. REVIEW OF THE RESEARCH	162
5.2.1. Basic Laboratory Paradigm	162
5.2.2. Multiple Frame Procedure	162
5.2.3. Basic Results of the Multiple Frame Experiment	163
5.3. FURTHER QUALITATIVE DIFFERENCES	165
5.3.1. Reversal Experiments	166
5.3.2. Inability to Ignore CM Trained Items	166
5.3.3. Degree of Consistency	167
5.3.4. Searching Versus Detecting	169
5.3.5. When Will Learning Occur?	169
5.3.6. Component Consistency	170
5.4. ATTENTIONAL RESOURCE REQUIREMENTS OF AUTOMATIC/CONTROLLED PROCESSING	170
5.4.1. Metaphor - How Is Capacity Limited?	171
5.4.1.1. Office Metaphor for VM Dual Task	172
5.4.1.2. Office Metaphor with Automatic Processing	173
5.4.2. Metaphor Summary	174
5.4.3. Dual Task Experiments	174
5.5. COMPLEX STIMULI - GENERALIZABILITY OF THE VISUAL SEARCH RESEARCH	178
5.6. RELIABILITY OF AUTOMATIC PROCESSES	180
5.7. INDIVIDUAL DIFFERENCES IN AUTOMATIC/CONTROLLED PROCESSING	183
5.7.1. The Performance-Resource Function (PRF)	183
5.7.2. Modeling Individual Differences in Automatic/Controlled Processing	185
5.7.3. Resources and Processes: How Do They Relate to Human Abilities?	186
5.7.4. A Theory of Performance-Ability Relations	188
5.7.5. A Final Issue - Task Complexity and Mode of Processing	191
5.8. CONCLUSION AND FUTURE DIRECTION	192

6. DESCRIBING MOVEMENT CONTROL AT TWO LEVELS OF ABSTRACTION	R. J. Jagacinski, B. D. Plamondon, and R. A. Miller	199
6.1. ARGUMENTS FOR MULTIPLE LEVELS OF BEHAVIORAL ORGANIZATION		199
6.2. ACTIVITY MODULES FOR DESCRIBING TRACKING AND OTHER SKILLED MOVEMENTS		202
6.3. A REACTIVE TARGET ACQUISITION TASK		211
6.4. METHOD		213
6.5. RESULTS		216
6.5.1. State Definitions		216
6.5.2. Markov Descriptions		222
6.5.3. Activity Module Simulation		226
6.6. DISCUSSION		238
7. HUMAN COMPUTER INTERACTION	R. Eberts	249
7.1. INTRODUCTION		249
7.2. THE EMPIRICAL APPROACH		252
7.2.1. Programming		254
7.2.2. Information Display		256
7.2.3. Input Devices		258
7.2.4. Advantages		259
7.2.5. Disadvantages		260
7.3. THE ANTHROPOMORPHIC APPROACH		262
7.3.1. Human-Human Interaction As A Source Of Data		265
7.3.2. Technology Of "Naturalness"		266
7.3.3. Experiments On "Naturalness"		268
7.3.4. The Influence Of CAI		269
7.3.5. Advantages		271
7.3.6. Disadvantages		272
7.4. THE COGNITIVE APPROACH		273
7.4.1. Analogical Reasoning		274
7.4.2. Spatial Reasoning		277
7.4.3. Problem Solving		279
7.4.4. Scripts, Plans, Goals		279
7.4.5. Mental Models		281
7.4.6. Attentional Resources		282

7.4.7. Advantages and Disadvantages	283
7.5. THE PREDICTIVE MODELING APPROACH	284
7.5.1. The GOMS Model	284
7.5.2. State Transition Networks	287
7.5.3. Advantages and Disadvantages	288
7.6. THE ROLE OF HUMAN FACTORS	289
8. ADAPTIVE CONTROL IN HUMAN-MACHINE SYSTEMS	305
..... P. A. Hancock and M. H. Chignell	
8.1. INTRODUCTION	305
8.1.1. Overview of the Chapter	305
8.1.2. Increasing Complexity of Human-Machine Systems	306
8.1.3. Increasing Knowledge-Based Nature Of Tasks	306
8.1.4. Task Allocation	307
8.1.5. The Human as an Adaptive System	308
8.2. STRESS AND ADAPTIVE FUNCTIONING	309
8.2.1. The Origins of Investigations into Stress Effects	309
8.2.2. Competing Views of the Action of Stress	310
8.2.3. An Emerging Synthesis	312
8.2.4. The Task as a Stress	315
8.3. USE OF MENTAL WORKLOAD MEASURES AS INPUT TO AN ADAPTIVE SYSTEM	317
8.3.1. Current Workload Assessment	317
8.3.2. Time As A Factor in Mental Workload	318
8.3.3. An Integration: Stress and Mental Workload	318
8.3.4. The Cost of Adaptation and Its Place in Cooperative Human-Machine Systems	319
8.4. THE ROLE OF ARTIFICIAL INTELLIGENCE IN HUMAN-MACHINE SYSTEMS.	320
8.4.1. Artificial Intelligence Inputs to an Adaptive Interface	322
8.4.2. Horn Clause Representation of the Human- Machine System	323
8.4.3. Implications for Human-Machine Systems Design	325
8.5. ADAPTIVE SYSTEMS	326
8.5.1. The Necessity For And Development Of Adaptive Human-Machine Systems	326

8.5.2. Task Structuring	326
8.5.3. Task Allocation	328
8.5.4. Task Description and Task Performance	328
8.5.5. Fluctuations in Task Definition and System Response	331
8.6. A KNOWLEDGE-BASED ADAPTIVE MECHANISM	332
8.6.1. The Error Signal	332
8.6.2. Task Demands, Available Resources, Task Allocation, and Load Leveling	334
8.6.3. Knowledge Systems Development	338
8.7. CONCLUSION	339
9. HUMAN FACTORS IN ORGANIZATIONAL DESIGN AND MANAGEMENT H. W. Hendrick	347
9.1. THE CONCEPT OF ORGANIZATIONAL STRUCTURE AND DESIGN	349
9.1.1. Organizational Structure	350
9.1.2. Organizational Design	351
9.2. ORGANIZATIONAL GOALS	351
9.2.1. Classification by Criteria	352
9.2.2. Classification by Focus	353
9.2.3. Classification by Time Frame	353
9.2.4. Hierarchical Nature of Goals	354
9.3. DESIGNING THE COMPONENTS OF STRUCTURE	355
9.3.1. Complexity	355
9.3.1.1. Horizontal Differentiation	356
9.3.1.2. Vertical Differentiation	358
9.3.1.3. Spatial Dispersion	359
9.3.1.4. Relation of Horizontal, Vertical, and Spatial Differentiation	359
9.3.1.5. Integration	360
9.3.2. Formalization	360
9.3.3. Centralization	361
9.3.4. Relation of Centralization, Complexity, and Formalization	363
9.4. MODERATING ORGANIZATIONAL DESIGN	364
9.4.1. Technology	365

9.4.2. Environment	371
9.4.3. Personnel Subsystem	376
9.4.3.1. Degree of Professionalism	377
9.4.3.2. Demographic Characteristics	377
9.4.3.3. Psycho-Social Characteristics	379
9.4.4. Convergence of Personnel Subsystem Data Design Implications	381
9.5. SELECTING THE TYPE OF ORGANIZATIONAL STRUCTURE	381
9.5.1. Classical or Machine Bureaucracy	382
9.5.2. Professional Bureaucracy	386
9.5.3. Adhocracy Designs	388
9.5.4. The Matrix Design	390
9.5.5. Free-Form Designs	392
9.5.6. Human Factors Challenges from the Different Forms of Organization	393
Index	401
