Preface	xi
Motivation .....	xi
Objective .....	xii
Outline .....	xiv
<b>Part One: Process Design and Verification</b>	
1 Introduction of Workflow management system	1
1.1 Basic Workflow Terminology .....	1
1.2 The Espresso Workflow Management System .....	4
1.2.1 The ProcessModeler .....	5
1.2.2 The Application Database .....	7
1.2.3 The Organizational Model .....	9
1.3 Process Examples .....	10
1.4 Conclusion .....	12
2 Process Definition	14
2.1 Activity and Link .....	14
2.2 Start Activity .....	15
2.3 Algorithms for <u>Keeping a Process Definition</u> .....	17
2.4 Conclusion .....	18
3 Routing Options	20
3.1 Routing Option Definition .....	20
3.2 Algorithm for <u>Getting Invalid IT Resource Activities</u> .....	23
3.3 End Activity .....	23
3.4 Conclusion .....	25
4 Path and Cycle	26
4.1 Paths .....	26
4.1.1 Elementary Path .....	28
4.1.2 Algorithm for <u>Finding an Elementary Path*</u> .....	30
4.2 Reachability and Criticality .....	31
4.2.1 Reachability .....	31
4.2.2 Criticality .....	32
4.2.3 Algorithm for <u>Determining Reachable and Critical</u> .....	33
4.3 Cycles .....	36
4.3.1 Algorithm for <u>Determining Activity Reachable to End</u> ..	37
4.3.2 Algorithm for <u>Getting Elementary Cycles</u> .....	40
4.3.3 Algorithm for <u>Getting Infinite Elementary Cycles</u> .....	41
4.4 Algorithm for <u>Determining Potential Start Activities</u> .....	43
4.5 Conclusion .....	45
5 Split and Join	47
5.1 Split Activity .....	47
5.1.1 Algorithm for <u>Updating Split Activities</u> .....	48
5.1.2 Ancestor of a Split Activity .....	49

5.1.3	Algorithm for <u>Getting Ancestors of a Split Activity</u> .....	50
5.2	Join Activity .....	51
5.2.1	Potential Join Activity .....	52
5.2.2	Ancestor Join Activity .....	52
5.2.3	Examples of Join Activities .....	53
5.2.4	Algorithm for <u>Getting Ancestor Joins</u> .....	59
5.2.5	Algorithm for <u>Determining Joins</u> .....	60
5.3	Parallel Activity .....	61
5.4	Workflow Control Data .....	64
5.4.1	Algorithm for <u>Getting the First Split Activity</u> .....	64
5.4.2	Algorithm for <u>Determining Workflow Control Data</u> .....	65
5.5	Conclusion .....	68
6	Deadlock .....	70
6.1	Deadlock Situation and Deadlock Cycle .....	70
6.2	Join Priority and Deadlock Release .....	71
6.2.1	Algorithm for <u>Getting Elementary Deadlocks</u> .....	72
6.2.2	Algorithm for <u>Grouping Deadlocks</u> .....	74
6.2.3	Example: Deadlock Release .....	76
6.2.3.1	Join Priority Order 1 .....	77
6.2.3.2	Join Priority Order 2 .....	78
6.2.3.3	Join Priority Order 3 .....	79
6.2.3.4	Join Priority Order 4 .....	79
6.2.3.5	Join Priority Order 5 .....	80
6.2.3.6	Join Priority Order 6 .....	81
6.3	Algorithms for Handling Deadlock Situations .....	81
6.3.1	Algorithm for <u>Getting One Deadlock</u> .....	81
6.3.2	Algorithm for <u>Routing Work to Activity</u> .....	83
6.3.3	Algorithm for <u>Getting Parallel Waiting Work Items</u> .....	84
6.3.4	Algorithm for <u>Releasing a Deadlock</u> .....	85
6.3.5	Algorithm for <u>Detecting Deadlocks</u> .....	86
6.4	Conclusion .....	86
7	Summary .....	88
7.1	Definitions and Algorithms .....	88
7.2	Constraints in Process Design and Enactment .....	89
7.3	Further Work* .....	89
<b>Part Two: Basic Simulation Knowledge</b>		
8	Introduction of Simulation .....	92
8.1	Simulation .....	92
8.1.1	Disadvantages of Simulation .....	92
8.1.2	Why Simulation .....	93
8.2	Basic Simulation Terminology .....	95
8.2.1	System Categorization .....	95
8.2.2	Simulation Model .....	95
8.2.2.1	Next-Event Approach .....	97
8.2.2.2	Algorithm of Next-Event Approach .....	99

8.2.2.3	Data Structure of the Eventlist .....	99
8.2.2.3.1	Algorithm for <u>Inserting an Event into the Eventlist</u> .....	100
8.2.2.3.2	Algorithm for <u>Removing the First Event from the Eventlist</u> .....	101
8.2.3	Variables .....	102
8.2.3.1	Decision Variables .....	103
8.2.3.2	System Parameters .....	104
8.2.3.3	State Variables .....	104
8.2.3.4	Statistic Variables .....	105
8.2.3.5	System Performance Criterion .....	106
8.3	Conclusion .....	107
9	Statistic Theory and Methods .....	109
9.1	Random Variable .....	109
9.2	Distribution Functions .....	110
9.2.1	Uniform Distribution .....	110
9.2.2	Normal Distribution .....	112
9.2.3	Exponential Distribution .....	113
9.2.4	Gamma Distribution .....	115
9.2.4.1	Algorithm for <u>Drawing Gamma Distribution</u> ...	116
9.2.5	Empirical Distribution .....	117
9.2.6	Student's <i>t</i> -Distribution* .....	118
9.2.7	$\chi^2$ Distribution* .....	119
9.2.8	<i>F</i> -Distribution* .....	120
9.3	Estimation and Hypothesis .....	121
9.3.1	Mean and Standard Deviation .....	121
9.3.2	Distribution Function .....	122
9.4	Tests of Hypotheses* .....	123
9.4.1	Introduction .....	123
9.4.2	<i>t</i> -Test .....	125
9.4.3	<i>N</i> (0, 1) Test .....	126
9.4.4	$\chi^2$ Test .....	127
9.4.5	<i>F</i> -Test .....	128
9.5	An Example of Estimation and Test* .....	128
9.6	Conclusion .....	132
10	Random Variate Generation .....	134
10.1	Introduction .....	134
10.2	Generating Random Numbers .....	135
10.2.1	The Power Residue Method .....	135
10.2.2	Algorithm for <u>Generating Random Numbers</u> .....	137
10.2.3	Generating Random Numbers in Basic Language .....	138
10.3	Testing and Validating Random Numbers .....	140
10.3.1	Frequency Test .....	140
10.3.2	Increasing and Decreasing Runs .....	141
10.3.3	Other Tests .....	144

10.4	Generating Random Variates .....	144
10.4.1	General Methods for Generating a Variate .....	145
10.4.1.1	The Inverse Transformation Method .....	145
10.4.1.2	The Rejection Method* .....	147
10.4.2	Uniformly Distributed Random Variates .....	147
10.4.3	Normally Distributed Random Variates .....	149
10.4.3.1	Algorithm for <u>Generating a Normal Variate</u> ...	149
10.4.4	Exponentially Distributed Random Variates .....	150
10.4.4.1	Algorithm for <u>Generating an Exponential Variate</u> .....	150
10.4.4.2	Exponential Variates Greater than Zero* .....	150
10.4.5	Gamma Distributed Random Variates .....	151
10.4.5.1	Algorithm for <u>Generating a Gamma Variate</u> ...	151
10.4.5.2	Algorithm for <u>Generating a Gamma Variate with Non-Integer Valued Shape Parameter*</u> ..	152
10.4.6	Empirical Distributed Random Variates .....	153
10.4.6.1	Algorithm for <u>Generating an Empirical Variate</u> .....	154
10.4.7	The $\chi^2$ , $t$ - and $F$ -Distributions* .....	154
10.5	Conclusion .....	155
<b>Part Three: WfMS Simulation</b>		
11	Simulating Business Processes .....	157
11.1	Process Settings .....	157
11.1.1	Process Life Period Settings .....	157
11.1.2	Process Creation Settings .....	158
11.1.3	Routing Probability Settings .....	162
11.1.4	Variable Settings .....	163
11.1.5	Process Stop Settings .....	165
11.2	Graphic Process States .....	166
11.3	Data Structure of Simulated Work Items .....	167
11.3.1	Work Record .....	167
11.3.2	Work Protocol .....	169
11.3.3	Algorithms Relevant to Simulated Work Items .....	170
11.3.3.1	Algorithm for <u>Connecting a Parallel Work</u> ....	171
11.3.3.2	Algorithm for <u>Disconnecting a Parallel Work</u> .....	171
11.3.3.3	Algorithm for <u>Copying a Work Protocol</u> .....	172
11.3.3.4	Algorithm for <u>Eliminating Protocol Records</u> ..	173
11.3.3.5	Algorithm for <u>Checking an Activity Split in a Protocol</u> .....	174
11.3.3.6	Algorithm for <u>Getting All Split Activities in Protocols</u> .....	174
11.3.3.7	Algorithm for <u>Eliminating a Work Record</u> ....	175
11.3.3.8	Algorithm for <u>Getting Process Critical Paths</u> ..	178
11.4	Conclusion .....	179

12 Simulating Resources	180
12.1 Resource Specification	180
12.1.1 Workflow Participant Specification	181
12.1.1.1 Simulating Editor “Computed”	183
12.1.1.2 Team Editor	184
12.1.1.2.1 Activity Completion Specification	184
12.1.1.2.2 Simulating Work Allocation among a Team	185
12.1.1.3 Simulating the Worklist of a Workflow Participant	186
12.1.2 Activity Execution Time and Delay Time	187
12.1.3 Material Resource Specification	189
12.1.4 Resource Costs and Fixed Costs	191
12.1.5 Simulating Multiple Workflow Participants	192
12.2 Dummy Participant	193
12.3 Organizational Settings	195
12.3.1 Distribution Function Settings	196
12.3.2 Participant Settings	197
12.3.3 Team Work Assignment Settings	199
12.3.4 Public Holiday Settings	201
12.4 Graphic States of Resources	203
12.5 Data Structure of a Queue	206
12.5.1 Algorithm for <u>Adding Work to Queue</u>	208
12.5.2 Algorithm for <u>Removing Work from Queue</u>	209
12.6 Conclusion	211
13 Overall Simulation Model	213
13.1 Experimental Modes	213
13.1.1 Animation	214
13.1.2 Simulation	217
13.2 Simulation Settings	217
13.2.1 Experimental Settings	218
13.2.1.1 Simulation Beginning/Ending Conditions	218
13.2.1.2 Process Protocol Settings	220
13.2.1.3 Database Settings	221
13.2.1.4 Queuing Rule for Worklist	222
13.2.2 Simulation View Settings	223
13.3 Simulation Reports	225
13.3.1 Process Protocol	225
13.3.2 Simulation Summary Report	228
13.3.3 Activity Report	229
13.3.4 Resource Report	232
13.3.5 Work Allocation Report	234
13.4 Events in the Espresso Simulation Model	236
13.4.1 Scheduled Events	236
13.4.2 Conditional Events	238

13.5 Conclusion .....	240
13.6 Further Work* .....	241
14 General Simulation Phases .....	244
14.1 History Data Collection .....	244
14.2 Distribution Function Selection .....	246
14.3 Validation of the Simulation Model* .....	248
14.3.1 Determination of Expected System Performances .....	248
14.3.2 Some Theoretical Results for the Single-channel Single-station Queue .....	250
14.3.2.1 The M/M/1 Queue .....	250
14.3.2.2 The M/G/1 Queue .....	251
14.4 Evaluation of Simulation Results* .....	253
14.4.1 Determination of Sample Size .....	255
14.4.2 Blocking .....	256
14.5 Conclusion .....	260
Summary .....	262
References .....	263
Appendices .....	268
Symbols in Definitions and Algorithms .....	268
DTD of XML for PAVONE Process Definition .....	269
Table 1. Selected Values of the $t$ -Distribution .....	275
