

# CONTENTS

|  |      |
|--|------|
| Contributors   | xxi  |
| Preface to the Second Edition  | xxv  |
| Preface to the First Edition   | xxix |
| <br>   |      |
| <b>1. Dissociation of Intact Cells from Tumors and Normal Tissues</b>  |      |
| <i>Daniel W. Visscher and John D. Crissman</i>   |      |
| I. Introduction  | 1    |
| II. Application  | 2    |
| III. Methodology: Mechanical Cell Dispersion   | 5    |
| IV. Results  | 6    |
| V. Conclusion  | 10   |
| References   | 13   |
| <br>   |      |
| <b>2. Assays of Cell Viability: Discrimination of Cells Dying by Apoptosis</b>   |      |
| <i>Zbigniew Darzynkiewicz, Xun Li, and Jianping Gong</i>   |      |
| I. Introduction  | 16   |
| II. Changes in Light Scatter during Cell Death   | 20   |
| III. Cell Sensitivity to Trypsin and DNase   | 20   |
| IV. Fluorescein Diacetate (FDA) Hydrolysis and PI Exclusion  | 21   |
| V. Rh123 Uptake and PI Exclusion   | 22   |
| VI. PI Exclusion Followed by Counterstaining with Hoechst 33342  | 23   |
| VII. Hoechst 33342 Active Uptake and PI Exclusion  | 25   |
| VIII. Controlled Extraction of Low MW DNA from Apoptotic Cells   | 26   |
| IX. Sensitivity of DNA <i>in Situ</i> to Denaturation  | 29   |
| X. Detection of DNA Strand Breaks in Apoptotic Cells   | 29   |
| XI. A Selective Procedure for DNA Extraction from Apoptotic Cells Applicable to Gel Electrophoresis and Flow Cytometry | 31   |
| XII. Comparison of the Methods: Confirmation of the Apoptotic Mode of Cell Death                                       | 36   |
| References   | 37   |
| <br>   |      |
| <b>3. Cell Preparation for the Identification of Leukocytes</b>  |      |
| <i>Carleton C. Stewart and Sigrid J. Stewart</i>   |      |
| I. Introduction  | 40   |
| II. Antibodies   | 40   |

|   |     |
|---|-----|
| III. Titering Antibodies  | 50  |
| IV. Third Color Reagents  | 51  |
| V. Cell Preparation   | 52  |
| VI. Labeling Procedures   | 54  |
| VII. Lysing Erythrocytes  | 57  |
| VIII. Detecting Dead Cells  | 58  |
| IX. Fixation  | 58  |
| X. Solutions and Reagents   | 58  |
| References  | 59  |
| <br>  |     |
| <b>4. Multiparameter Analysis of Leukocytes by Flow Cytometry</b>               |     |
| <i>Carleton C. Stewart and Sigrid J. Stewart</i>                                |     |
| I. Introduction   | 61  |
| II. Correlated List-Mode Data   | 62  |
| III. Single-Label Analysis  | 63  |
| IV. Optical Filtration  | 65  |
| V. Compensation   | 66  |
| VI. Two-Color Fluorescence  | 71  |
| VII. Three-Color Immunophenotyping  | 73  |
| VIII. Fixing Cells  | 76  |
| IX. Detecting Dead Cells  | 76  |
| X. Summary  | 78  |
| References  | 78  |
| <br>  |     |
| <b>5. Immunophenotyping Using Fixed Cells</b>                                   |     |
| <i>George F. Babcock and Susan M. Dawes</i>                                     |     |
| I. Introduction   | 81  |
| II. Application   | 83  |
| III. Materials  | 83  |
| IV. Cell Preparation and Staining   | 85  |
| V. Critical Aspects of the Procedure  | 86  |
| VI. Results and Discussion  | 87  |
| References  | 92  |
| <br>  |     |
| <b>6. Simultaneous DNA Content and Cell-Surface Immunofluorescence Analysis</b> |     |
| <i>Paul P. T. Brons, Piet E. J. Van Erp, and Arie H. M. Pennings</i>            |     |
| I. Introduction   | 95  |
| II. Materials and Methods   | 96  |
| III. Instruments  | 97  |
| IV. Critical Aspects of the Method  | 98  |
| V. Results  | 98  |
| VI. Applications and Future Directions  | 99  |
| References  | 102 |

## 7. Flow Cytometry Crossmatching for Solid Organ Transplantation

*Robert A. Bray*

|                                      |     |
|--------------------------------------|-----|
| I. Introduction                      | 103 |
| II. Applications                     | 104 |
| III. Materials                       | 106 |
| IV. Cell Preparation and Staining    | 109 |
| V. Critical Aspects of the Procedure | 111 |
| VI. Standards                        | 114 |
| VII. Instruments                     | 115 |
| VIII. Results and Discussion         | 116 |
| References                           | 118 |

## 8. Cell Membrane Potential Analysis

*Howard M. Shapiro*

|   |     |
|---|-----|
| I. Introduction                                 | 121 |
| II. Materials and Methods                       | 125 |
| III. Improving Cytometry of Membrane Potentials | 130 |
| References                                      | 133 |

## 9. Measurement of Intracellular pH

*Michael J. Boyer and David W. Hedley*

|   |     |
|---|-----|
| I. Introduction                                   | 135 |
| II. Application                                   | 140 |
| III. Materials                                    | 140 |
| IV. Cell Preparation and Staining: BCECF or SNARF | 141 |
| V. Instruments                                    | 142 |
| VI. Critical Aspects                              | 144 |
| VII. Results and Discussion                       | 147 |
| References  | 148 |

## 10. Intracellular Ionized Calcium

*Carl H. June and Peter S. Rabinovitch*

|   |     |
|---|-----|
| I. Introduction   | 150 |
| II. Flow Cytometric Assay With Indo-1   | 152 |
| III. Use of Flow Cytometry and Fluo-3 to Measure $[Ca^{2+}]_i$                          | 161 |
| IV. Use of Flow Cytometry and Fluo-3/Fura-Red for Ratiometric Analysis of $[Ca^{2+}]_i$ | 163 |
| V. Cell Conjugate Assays Combined with Calcium Analysis and Flow Cytometry              | 165 |
| VI. Pitfalls and Critical Aspects   | 165 |
| VII. Limitations  | 170 |
| VIII. Results   | 172 |
| References  | 172 |

## 11. Cellular Protein Content Measurements

*Harry A. Crissman and John A. Steinkamp*

|                                      |     |
|--------------------------------------|-----|
| I. Introduction                      | 175 |
| II. Applications                     | 176 |
| III. Materials                       | 178 |
| IV. Cell Preparation and Staining    | 178 |
| V. Critical Aspects of the Procedure | 179 |
| VI. Controls and Standards           | 179 |
| VII. Instruments                     | 180 |
| VIII. Results and Discussion         | 181 |
| References                           | 183 |

## 12. Lysosomal Proton Pump Activity: Supravital Cell Staining with Acridine Orange Differentiates Leukocyte Subpopulations

*Frank Traganos and Zbigniew Darzynkiewicz*

|                                      |     |
|--------------------------------------|-----|
| I. Introduction                      | 185 |
| II. Applications                     | 186 |
| III. Materials                       | 187 |
| IV. Staining Procedures              | 188 |
| V. Critical Aspects of the Procedure | 188 |
| VI. Controls and Standards           | 190 |
| VII. Instruments                     | 190 |
| VIII. Results                        | 191 |
| References                           | 194 |

## 13. Staining of DNA in Live and Fixed Cells

*Harry A. Crissman and Gregory T. Hivons*

|  |     |
|--|-----|
| I. Introduction                                  | 196 |
| II. Applications with DNA-Specific Fluorochromes | 197 |
| III. Materials                                   | 202 |
| IV. Cell Preparation and Fixation                | 202 |
| V. Cell Staining                                 | 203 |
| VI. Critical Aspects                             | 204 |
| VII. Controls and Standards                      | 205 |
| VIII. Instruments                                | 205 |
| IX. Results and Discussion                       | 205 |
| References                                       | 208 |

## 14. High-Resolution Analysis of Nuclear DNA Employing the Fluorochrome DAPI

*Friedrich J. Otto*

|                  |     |
|------------------|-----|
| I. Introduction  | 211 |
| II. Applications | 212 |
| III. Materials   | 213 |

|   |     |
|---|-----|
| IV. Cell Separation and Fixation Method   | 213 |
| V. Staining Procedure   | 214 |
| VI. Instrument Setup  | 214 |
| VII. Standards  | 214 |
| VIII. Results and Discussion  | 215 |
| References  | 217 |
| <br>  |     |
| <b>15. Detergent and Proteolytic Enzyme-Based Techniques for Nuclear Isolation and DNA Content Analysis</b> |     |
| <i>Lars L. Vindeløv and Ib Jarle Christensen</i>  |     |
| I. Introduction   | 219 |
| II. Basic Principles of the Methods   | 221 |
| III. Applications   | 222 |
| IV. Materials   | 222 |
| V. Methods  | 224 |
| VI. Results   | 227 |
| References  | 229 |
| <br>  |     |
| <b>16. DNA Analysis from Paraffin-Embedded Blocks</b>   |     |
| <i>David W. Hedley</i>  |     |
| I. Introduction   | 232 |
| II. Application   | 232 |
| III. Methods  | 232 |
| IV. Critical Aspects of Technique   | 235 |
| V. Alternative Methods for Sample Preparation   | 238 |
| References  | 240 |
| <br>  |     |
| <b>17. Controls, Standards, and Histogram Interpretation in DNA Flow Cytometry</b>                          |     |
| <i>Lynn G. Dressler and Larry C. Seamer</i>   |     |
| I. Introduction   | 242 |
| II. Application   | 244 |
| III. Instrument Quality Control and Standardization   | 249 |
| IV. DNA Histogram Interpretation  | 253 |
| V. Methods  | 256 |
| VI. Summary of Criteria for Interpretation of DNA Histograms  | 259 |
| References  | 261 |
| <br>  |     |
| <b>18. DNA Content Histogram and Cell-Cycle Analysis</b>  |     |
| <i>Peter S. Rabinovitch</i>   |     |
| I. Introduction   | 264 |
| II. DNA Content Histogram Basic Principles  | 264 |
| III. Cell-Cycle Analysis of DNA Content Histograms  | 266 |
| IV. Critical Aspects of DNA Content and Cell-Cycle Analysis   | 269 |

|  |     |
|--|-----|
| V. Interpretation of DNA Content and Cell-Cycle Histograms   | 285 |
| VI. Conclusion   | 293 |
| References   | 294 |
| <b>19. Immunochemical Quantitation of Bromodeoxyuridine:<br/>Application to Cell-Cycle Kinetics</b>  |     |
| <i>Frank Dolbeare and Jules R. Selden</i>  |     |
| I. Introduction  | 298 |
| II. Applications   | 298 |
| III. Materials   | 299 |
| IV. Procedures   | 303 |
| V. Critical Aspects of the Procedure   | 307 |
| VI. Controls and Standards   | 309 |
| VII. Instruments   | 310 |
| VIII. Results  | 310 |
| IX. Summary  | 313 |
| References   | 315 |
| <b>20. Application and Detection of IdUrd and CldUrd as Two<br/>Independent Cell-Cycle Markers</b>   |     |
| <i>Jacob A. Aten, Jan Stap, Ron Hoebe, and Piet J. M. Bakker</i>   |     |
| I. Introduction  | 317 |
| II. Application  | 318 |
| III. Materials   | 319 |
| IV. Methods  | 320 |
| V. Critical Aspects of the Procedure   | 321 |
| VI. Controls and Standards   | 323 |
| VII. Results   | 324 |
| References   | 325 |
| <b>21. Cell-Cycle Analysis Using Continuous Bromodeoxyuridine<br/>Labeling and Hoechst 33358–Ethidium Bromide Bivariate<br/>Flow Cytometry</b> |     |
| <i>Martin Poot, Holger Hoehn, Manfred Kubbies, Angelika Grossmann,<br/>Yuchyau Chen, and Peter S. Rabinovitch</i>                              |     |
| I. Introduction  | 328 |
| II. Application  | 328 |
| III. Materials   | 329 |
| IV. Procedures   | 331 |
| V. Controls and Standards  | 333 |
| VI. Instruments  | 333 |
| VII. Results   | 334 |
| References   | 339 |

**22. Detection of BrdUrd-Labeled Cells by Differential Fluorescence Analysis of DNA Fluorochromes: Pulse-Chase and Continuous Labeling Methods**

*Harry A. Crissman, Noboru Oishi, and Robert Habbersett*

|   |     |
|---|-----|
| I. Introduction                             | 341 |
| II. Applications                            | 343 |
| III. Materials                              | 344 |
| IV. Cell Preparation and Staining Procedure | 344 |
| V. Critical Aspects                         | 344 |
| VI. Controls and Standards                  | 345 |
| VII. Instruments                            | 345 |
| VIII. Results                               | 346 |
| References                                  | 349 |

**23. Analysis of Intracellular Proteins**

*Kenneth D. Bauer and James W. Jacobberger*

|   |     |
|---|-----|
| I. Introduction   | 352 |
| II. Application   | 356 |
| III. Materials  | 359 |
| IV. Staining Procedures                                 | 361 |
| V. Critical Aspects                                     | 364 |
| VI. Controls and Standards                              | 369 |
| VII. Instruments  | 370 |
| VIII. Multiparameter Analysis of Intracellular Antigens | 371 |
| References  | 374 |

**24. "Washless" Procedures for Nuclear Antigen Detection**

*Jørgen K. Larsen*

|   |     |
|---|-----|
| I. Introduction   | 377 |
| II. Applications  | 378 |
| III. Materials, Cell Preparation, and Staining                              | 380 |
| IV. Critical Aspects of the Procedure: Controls, Standards, and Instruments | 382 |
| V. Results  | 387 |
| References  | 388 |

**25. Light Scatter of Isolated Cell Nuclei as a Parameter Discriminating the Cell-Cycle Subcompartments**

*Walter Giaretti and Michael Nüsse*

|                                       |     |
|---------------------------------------|-----|
| I. Introduction                       | 389 |
| II. Application                       | 391 |
| III. Materials                        | 391 |
| IV. Critical Aspects of the Procedure | 393 |

|  |     |
|--|-----|
| V. Instruments   | 394 |
| VI. Results  | 395 |
| VII. Appendix  | 398 |
| References   | 400 |
| <br>   |     |
| <b>26. Simultaneous Analysis of Cellular RNA and DNA Content</b>   |     |
| <i>Zbigniew Darzynkiewicz</i>  |     |
| I. Introduction  | 402 |
| II. Applications   | 406 |
| III. Materials   | 407 |
| IV. Staining Procedures Employing AO   | 409 |
| V. Staining RNA and DNA with PY and Hoechst 33342  | 410 |
| VI. Critical Aspects of the Procedures   | 411 |
| VII. Controls and Standards  | 413 |
| VIII. Instruments  | 414 |
| IX. Results  | 415 |
| X. Comparison of the Methods   | 418 |
| References   | 419 |
| <br>   |     |
| <b>27. Analysis of DNA Content and Cyclin Protein Expression in Studies of DNA Ploidy, Growth Fraction, Lymphocyte Stimulation, and the Cell Cycle</b> |     |
| <i>Zbigniew Darzynkiewicz, Jianping Gong, and Frank Traqanos</i>   |     |
| I. Introduction  | 422 |
| II. Bivariate Analysis of DNA Content versus Cyclin B1 or Cyclin E Expression  | 422 |
| III. Application of Cyclin B1 Analysis in DNA Ploidy and Chromatin Cycle Estimates   | 424 |
| IV. Lymphocyte Stimulation   | 427 |
| V. Tumor Growth Fraction Analysis  | 429 |
| VI. Mapping the Cell Cycle: Mechanism of Action of Cytostatic Drugs  | 431 |

## **Contents of Volume 42**

### **Flow Cytometry, Second Edition, Part B**

- 1. A Flow Cytometric Technique for Detection of DNA Repair in Mammalian Cells**  
*Jules R. Seldon and Frank Dolbeare*
- 2. Rapid Determination of Cellular Resistance Related Drug Efflux in Tumor Cells**  
*Awtar Krishan*
- 3. Glutathione and Cellular Resistance to Anti-Cancer Drugs**  
*David Hedley and Sue Chow*
