

Contents

| | |
|---|----------|
| Introduction | 9 |
| <i>Gotthard Bechmann, Vitaly Gorokhov, Nico Stehr</i> | |
| 1 Knowledge and information society | 10 |
| 2 Changing knowledge production in science | 11 |
| 3 Knowledge politics | 13 |
| 4 Decision-oriented science | 14 |
| 5 Knowledge and information | 16 |
| 6 Communication and knowledge | 19 |
| 7 Knowledge is self-multiplying | 20 |
| 8 Knowledge as a capacity to act | 21 |
| 9 The sociology of knowledge and science | 23 |
| 10 About this volume | 24 |

I Science Production in the Knowledge Society

| | |
|--|-----------|
| Scientific Knowledge and Values of Technogenic Civilisation | 35 |
|--|-----------|

Vyacheslav Stepin

| | |
|--|----|
| 1 Science as a civilisation phenomenon | 35 |
| 2 Principles of science and their structure | 40 |
| 3 From classical to post-non-classical science | 47 |

| | |
|---|-----------|
| Institutional Interfaces of the Science System and the Economic System | 67 |
|---|-----------|

Thomas Heinze

| | |
|---|----|
| Introduction | 67 |
| 1 The concept of “structural coupling” | 69 |
| 2 Indicators for science-based technologies | 70 |
| 3 Organisations and functional systems | 73 |
| 4 Interorganisational networks | 76 |
| 5 Conclusion | 79 |

| | |
|---|-----------|
| Path Dependency and Path Creation – Some Theoretical Reflections | 85 |
|---|-----------|

Gerd Schienstock

| | |
|--------------------|----|
| Introduction | 85 |
|--------------------|----|

| | | |
|---|---|----|
| 1 | Technical regimes and path dependency | 86 |
| 2 | Evolving new paths and path creation | 88 |
| 3 | Path change out of path dependency | 89 |
| 4 | The communities of practice concept and the niche concept | 90 |
| 5 | New technological paradigms and path creation | 92 |
| 6 | Conclusion | 95 |

Climate Research between Knowledge and Organisation – Problems of Transdisciplinary Science 101

Gotthard Bechmann

| | |
|---|-----|
| Introduction | 101 |
| 1 The changing organisation of research | 103 |
| 2 The political function of research | 106 |
| 3 Problem- and programme-oriented research | 109 |
| 4 Scientific advice and political decision | 112 |
| 5 Climate research as an example of transdisciplinary science | 114 |
| 6 Summary | 117 |

II The Governance of Science

The Social and Political Surveillance of Knowledge in Modern Societies 123

Nico Stehr

| | |
|---|-----|
| 1 Science policy and knowledge politics | 127 |
| 2 Knowledge politics explained | 130 |
| 3 On the origins of modern knowledge politics | 132 |
| 4 The governance of knowledge | 138 |
| 5 Concluding observations | 141 |

Vision Assessment Supporting the Governance of Knowledge – the Case of Futuristic Nanotechnology 147

Armin Grunwald

| | |
|--|-----|
| Introduction and overview | 147 |
| 1 Futuristic visions in nanoscience and nanotechnology | 149 |
| 1.1 Visions accompanying the career of nanotechnology | 149 |
| 1.2 Visions, Leitbilder, and science fiction | 151 |
| 1.3 Characteristics of futuristic visions | 153 |
| 2 The case of human enhancement and the need for orientation | 154 |

| | | |
|-----|---|-----|
| 2.1 | Converging technologies for improving human performance | 154 |
| 2.2 | Occasions of choice and need for orientation | 156 |
| 3 | The orientation dilemma related to using future knowledge | 157 |
| 3.1 | Functions of visionary future communication | 158 |
| 3.2 | The ambivalence of futuristic visions | 159 |
| 3.3 | The orientation dilemma | 162 |
| 4 | Vision assessment and the governance of knowledge | 162 |
| 4.1 | The need for vision assessment | 164 |
| 4.2 | Vision assessment – an outline | 165 |
| 5 | Conclusions | 168 |

In the Absence of Knowledge Politics – Neuropsychiatry and the Drug Industry 171

Thomas Brante

| | | |
|---|--|-----|
| 1 | Science as classification and explanation | 172 |
| 2 | Classification of mental disorders: the DSM | 173 |
| 3 | Explanation of mental disorders: neuropsychiatry | 180 |
| 4 | Conclusion: the troublesome tension between classification and explanation | 186 |

Regulatory Borders – Knowledge Politics and Reproductive Science 201

Jacquelyne Luce

| | | |
|---|--|-----|
| 1 | Regulatory borders | 201 |
| 2 | Assisted conception and governance | 202 |
| 3 | Images of donor insemination | 205 |
| 4 | Regulating access – donor semen and/or insemination services | 206 |
| 5 | 1980-1999: Cross-border reproductive relations | 208 |
| 6 | Regulatory effects | 216 |
| 7 | Policy implications | 219 |
| 8 | Reflections: Assisted Human Reproduction Act 2004 | 222 |

III Organisation of Problem-oriented Research: Case Studies

Sustainable Development – Methodological Aspects 229

Victor Danilov-Danil'yan

| | | |
|---|--|-----|
| 1 | The content of the concept of <i>sustainable development</i> – sustainability and survival | 229 |
| 2 | Aspects of sustainable development | 231 |

| | | |
|-----|---|------------|
| 3 | Sustainability of the biota and sustainability of civilisation | 234 |
| 4 | Sustainability mechanisms in civilisation | 236 |
| 5 | Optimality or sustainability? | 237 |
| 6 | Towards a definition of sustainable development | 239 |
| 7 | The environmental aspect of stability | 240 |
| 7.1 | Socio-medical aspect of stability | 242 |
| 7.2 | The humanitarian aspect of stability | 244 |
| 7.3 | Interrelationship of the three aspects of stability | 245 |
| 7.4 | Anticipating the consequences of the use of technology is more important than the technology itself | 247 |
| 7.5 | The ordinary consciousness and the problem of sustainability | 248 |
| 7.6 | The role of science, education and moral training in the transition to sustainable development | 251 |
| | The Natural and the Artificial from Galileo to Nanotechnology | 255 |
| | <i>Vitaly Gorokhov</i> | |
| 1 | Galileo's new science and technological development | 256 |
| 2 | From a geometric scheme to physical processes and from the latter to a design diagram | 263 |
| 3 | The natural and the artificial | 268 |
| 4 | Conclusion | 281 |
| | Problem-oriented Research and the Disciplinary Dynamics of Science – the Case of Atmospheric Chemistry | 289 |
| | <i>Jost Halfmann, Falk Schützenmeister</i> | |
| | Introduction | 289 |
| 1 | Air pollution and the rise of atmospheric chemistry | 291 |
| 2 | Chemistry of the global atmosphere – ozone hole and climate change | 301 |
| 3 | Conclusion | 303 |
| | Authors | 307 |
