

CONTENTS

Preface	xvii
Acknowledgments	xxi
PART I: SCOPE AND METHODS	1
1. Introduction	3
Defining Cognitive Psychology	4
Core Concepts	8
<i>Mental Representations</i>	8
<i>Stages of Processing</i>	8
<i>Serial Versus Parallel Processing</i>	9
<i>Hierarchical Systems</i>	9
<i>Cognitive Architecture</i>	10
<i>Memory Stores</i>	11
<i>Consciousness</i>	12
Research Methods	13
<i>Behavioral Measures</i>	14
<i>Physiological Measures</i>	15
<i>Experimental Design</i>	16
<i>Ecological Validity</i>	20
Overview of the Text	21
Summary	23
Key Terms	24
2. Cognitive Neuroscience	25
Mind and Brain	26
Functional Neuroanatomy	28
<i>Parallel Processing</i>	29
<i>Brain Structures and Functions</i>	31
Methods of Cognitive Neuroscience	36
<i>Lesions</i>	36
<i>Electrophysiology</i>	37

<i>Neuroimaging</i>	41
Connectionist Models	42
<i>Basics of Neural Networks</i>	43
<i>Modeling English Verb Acquisition</i>	49
Summary	51
Key Terms	53

PART II: FUNDAMENTALS OF COGNITION **55**

3. Perception 57

Visual Consciousness	59
<i>Visual Pathways</i>	60
<i>Visual Cortex</i>	62
Pattern Recognition	63
<i>Agnosia</i>	64
<i>Top-Down Versus Bottom-Up Processes</i>	68
<i>Object Representations</i>	71
Face Perception	73
<i>Holistic Versus Analytic Processing</i>	76
<i>Modularity</i>	77
Speech Recognition	79
<i>Coarticulation</i>	80
<i>Lack of Invariance</i>	81
<i>Continuous Speech Stream</i>	83
<i>Categorical Perception</i>	85
Summary	86
Key Terms	88

4. Attention 89

Filter Theories	91
<i>Early Selection</i>	92
<i>Attenuation</i>	95
<i>Late Selection</i>	96
Capacity Theories	98
<i>Mental Effort</i>	98
<i>Multiple Resources</i>	100
<i>Conclusion</i>	101
Automatic Processes	101
<i>Criteria of Automaticity</i>	102
<i>Practice and Automaticity</i>	102
<i>Genetics and Maturation</i>	105

Visual Attention	106
<i>Neural Basis of Selection</i>	107
<i>Executive Control</i>	108
<i>Perceptual Binding</i>	109
<i>Subliminal Perception</i>	113
Summary	114
Key Terms	116
5. Memory	117
Encoding, Storage, and Retrieval	118
Sensory Memory	119
Short-Term Versus Long-Term Memory	122
<i>Serial Position Effects</i>	124
<i>Neurological Dissociations</i>	126
<i>Capacity</i>	130
<i>Duration</i>	131
<i>Other Distinguishing Criteria</i>	133
<i>Conclusion</i>	140
Working Memory	140
<i>Multiple Components</i>	141
<i>Neurological Dissociations</i>	142
Summary	145
Key Terms	146
PART III: LEARNING, KNOWING, AND REMEMBERING	147
6. Episodic Memory	149
Types of Long-Term Memory	150
<i>Declarative Versus Nondeclarative Memory</i>	150
<i>Episodic Versus Semantic Memory</i>	153
<i>Criticisms of Multiple Systems</i>	154
Encoding and Storing Events	156
<i>Levels of Processing</i>	158
<i>Transfer-Appropriate Processing</i>	159
<i>Distinctiveness</i>	160
<i>Relational Processing</i>	163
Retrieval Processes	164
<i>Retrieval Mode</i>	164
<i>Encoding Specificity</i>	166
Summary	173
Key Terms	174

7. Distortions of Memory	175
Reconstructive Retrieval	176
<i>Reconstructing Laboratory Events</i>	177
<i>Reconstructing Autobiographical Events</i>	181
Encoding Distortions	183
Source Monitoring	188
<i>Memory Illusions</i>	189
<i>Confabulation</i>	191
Eyewitness Testimony	193
<i>Selective Encoding</i>	194
<i>The Misinformation Effect</i>	195
<i>Implanted Memories</i>	197
<i>Recovered Memories</i>	198
Summary	202
Key Terms	203
8. Semantic Memory	204
Representing Concepts	205
<i>Rule-Governed Concepts</i>	205
<i>Object Concepts</i>	206
<i>Schemas</i>	211
<i>Meta-representations</i>	213
Propositions and Images	214
<i>The Nature of Images</i>	216
<i>The Nature of Propositions</i>	223
Using Semantic Memory	225
<i>Semantic Network Models</i>	225
<i>The Feature Comparison Model</i>	228
Summary	230
Key Terms	231
9. Learning Concepts and Skills	232
Concept Learning	233
<i>Object Permanence</i>	233
<i>Basic Concepts</i>	236
Learning Processes	237
<i>Automatic and Controlled Processes</i>	237
<i>Prototype Acquisition</i>	240
Implicit Learning	243
Acquiring Expertise	247

<i>Skill Acquisition</i>	249
<i>Expert-Novice Differences</i>	253
Summary	260
Key Terms	262

PART IV: KNOWING AND USING LANGUAGE **263**

10. Language 265

Defining Language	265
<i>Origins of Language</i>	267
<i>Meaning, Structure, and Use</i>	268
<i>Contrasts to Animal Communication</i>	273
Representations of Language	274
<i>Symbolic Versus Connectionist Architectures</i>	275
<i>Universal Grammar</i>	281
<i>Neural Systems</i>	283
Thought and Language	288
<i>The Identity Hypothesis</i>	289
<i>The Modularity Hypothesis</i>	290
<i>The General Resource Hypothesis</i>	291
<i>The Linguistic Relativity Hypothesis</i>	291
Summary	293
Key Terms	295

11. Language Production 296

Speech Production	297
<i>Speech Errors</i>	297
<i>Acquired Aphasia</i>	298
Sentence Generation	300
<i>Types of Lexical Representations</i>	302
<i>Stages of Grammatical Encoding</i>	304
<i>Phonological Encoding</i>	306
<i>Articulation</i>	308
<i>Interaction Among Levels</i>	310
Writing	313
<i>Writing Processes</i>	314
<i>Multiple Representations in Working Memory</i>	316
<i>Knowledge-Transforming</i>	319
<i>Spelling</i>	320
Summary	321
Key Terms	323

12. Language Comprehension	324
Word Recognition	325
<i>Data-Driven and Conceptually Driven Processes</i>	325
<i>Word Frequency</i>	328
<i>Connectionist Models</i>	329
<i>Dual-Route Models</i>	330
<i>Dyslexia</i>	332
Sentence Comprehension	333
<i>Comprehension as Structure Building</i>	333
<i>Suppositions</i>	334
<i>Inferences</i>	336
Discourse Comprehension	341
<i>Referential Coherence</i>	342
<i>Global Frameworks</i>	343
<i>Models of Reading</i>	347
Summary	352
Key Terms	353

PART V: THINKING **355**

13. Problem Solving	357
Types of Thinking	358
<i>Well-Defined and Ill-Defined Problems</i>	358
<i>Productive and Reproductive Problem Solving</i>	361
<i>Relations Among Terms</i>	362
A General Model of Problem Solving	364
<i>Representing Problems</i>	364
<i>Searching the Problem Space</i>	368
<i>Domain-Specific Knowledge and Metacognition</i>	375
Creativity	379
<i>Historical Versus Process Creativity</i>	379
<i>Stages of Creativity</i>	380
<i>Creativity Blocks</i>	381
<i>Sources of Creativity</i>	386
<i>Creative Production</i>	387
Summary	388
Key Terms	390
14. Reasoning and Decision Making	391
Syllogistic Reasoning	392
<i>Syllogistic Forms</i>	393
<i>Common Errors</i>	396

<i>Cognitive Constraints</i>	397
Conditional Reasoning	400
<i>Valid and Invalid Conditional Reasoning</i>	400
<i>Common Errors</i>	401
<i>Cognitive Constraints</i>	402
Decision Making	406
<i>Types of Decisions</i>	406
<i>Subjective Utility</i>	407
<i>Probability Heuristics</i>	410
<i>Probability or Frequency</i>	417
<i>Automatic Versus Controlled Processes</i>	417
Summary	418
Key Terms	420
15. Intelligence	421
Defining Intelligence	423
<i>Biological Measures</i>	425
<i>Working Memory and IQ</i>	426
<i>Criticisms of General Intelligence</i>	428
Genetic and Environmental Influences	431
<i>Heritability</i>	432
<i>Environmental Effects</i>	434
Sex Differences	437
<i>Meta-analysis</i>	437
<i>Verbal Differences</i>	439
<i>Visual-Spatial Differences</i>	439
<i>Mathematical Differences</i>	440
<i>Navigation</i>	441
<i>Motor Skills</i>	443
<i>Reasons for Sex Differences</i>	444
Summary	447
Key Terms	448
Glossary	449
References	467
Author Index	503
Subject Index	509
Sources of Illustrations	519
About the Author	525
