<i>Preface</i>	<i>xvii</i>
<i>Acknowledgements</i>	<i>xix</i>
<b>Introduction</b>	<b>1</b>
Organisation of the book	3
<b>Chapter 1 Task analysis, concepts and terminology</b>	<b>7</b>
Introduction	8
Systems thinking	8
Systems thinking in describing human skill	11
Human performance in systems	13
Justification of HTA in systems terms	16
Some terminology so far	21
Concluding comments	23
<b>Chapter 2 HTA - a task analysis framework</b>	<b>25</b>
Introduction	26
The main strategies of HTA	26
HTA - a Framework for Analysing Tasks	32
Using the framework	39
Concluding comments	39
<b>Chapter 3 Plans and complexity</b>	<b>41</b>
Introduction	42
Different sorts of plan	42
Composite plans	56
Unravelling complex plans	56
Concluding comment	64
<b>Chapter 4 Flexibility, constraint, cognition and context</b>	<b>67</b>
Introduction	68
Inferring cognitive operations	72
Focus and Bias	74
Modelling and evaluating strategies	74
Situating cognition	77
Identifying strategies off line	85
Concluding remarks	85

<b>Chapter 5 Representing and recording HTA</b>	<b>87</b>
Introduction	88
Reasons for representing and recording	88
Hierarchical diagrams	89
Numbering the analysis	92
Tabular Formats	93
Representation of plans in diagrams and tables	97
Computer aids in recording task analysis	98
Concluding remarks	100
<b>Chapter 6 Analysis of tasks - some illustrations</b>	<b>101</b>
Introduction	102
Changing a cartridge	104
Process control	104
Task analysis of a batch operation	106
Task analysis of a continuous process control task	109
Air-traffic control	111
Minimal Access Surgery (MAS)	113
A customer service task	116
Using a wordprocessor	117
Mechanical maintenance	120
Nursing	124
Management	124
Staff supervision - nurse in charge of a ward	131
Concluding remarks	133
<b>Chapter 7 Making human factors design decisions within HTA</b>	<b>135</b>
Introduction	136
Considering the design options	137
Making design choices	143
Context and constraint and design decisions	147
Collating and resolving design decisions	151
Developing detailed design within the system life-cycle	152
Concluding remarks	155
<b>Chapter 8 Teams and jobs</b>	<b>157</b>
Introduction	158
Collaborating on a common goal	159
Assessing workload	164
The tasks of within a working team	168
Concluding remarks	173

<b>Chapter 9 Information and skill</b>	<b>175</b>
Introduction	176
The reliance on information in tasks - some examples	177
Characteristic problems with information and control	179
Identifying information requirements in operations	185
Types of operation	187
Identifying information requirements in plans	193
Representing and situating information and control	193
Concluding remarks	195
<b>Chapter 10 HTA and training</b>	<b>197</b>
Introduction	198
Learning practical skills	198
An informal training intervention	200
Elements of a formal training programme	205
Part-task training	209
Simulation for training	213
Concluding comment	216
<b>Chapter 11 Designing support documentation</b>	<b>217</b>
Introduction	218
Common types of support documentation	219
Determining where job-aids should be employed	225
Relating job-aids to training	226
Representation of job-aids and the link to HTA	228
Concluding remarks	230
<b>Chapter 12 Human resource management issues</b>	<b>231</b>
Introduction	232
Establishing a proper task description	232
Making human resource management decisions	234
Concluding comment	238
<b>Chapter 13 Conclusions</b>	<b>239</b>
The method	239
The application of HTA to different domains	241
The application of HTA to supporting different design solutions	242
Cognition and flexibility	243
Tasks and contexts	243
HTA and other task analysis methods	244

<b>Chapter 14 Notes</b>	<b>245</b>
Chapter 1: Task analysis, concepts and terminology	245
Chapter 2: HTA - a task analysis framework	247
Chapter 3: Plans and complexity	254
Chapter 4: Flexibility, constraint, cognition and context	254
Chapter 5: Representing and recording HTA	255
Chapter 6: Analysis of tasks - some illustrations	256
Chapter 7: Making human factors design decisions within HTA	257
Chapter 8: Teams and jobs	257
Chapter 9: Information and skill	258
Chapter 10: HTA and training	258
Chapter 11: Designing support documentation	259
Chapter 12: Some human resource management issues	259
<b>References</b>	<b>260</b>
<b>Index</b>	<b>267</b>

# Figures

<i>Figure 0.1</i>	<i>A simple illustration of Hierarchical Task Analysis.</i>	2
<i>Figure 1.1</i>	<i>Systems and subsystems in a hypothetical transportation system.</i>	8
