List of Contributors	xiii
Preface	xv

Introduction

1. Electrophysiology of Mental Activities and Introduction to The Psychological Process of Thinking	3
<i>Edmund Jacobson</i>	
The Discussion of Dr. Jacobson's Paper	24
<i>Led by Dr. Johann Stoyva</i>	
Open Discussion	26
References and Supporting Publications	28

Emphasis on Central Nervous System—Primarily Electroencephalogram

2. The Operant Conditioning of the Electrical Activity of the Brain as a Method for Controlling Neural and Mental Processes	35
<i>A. H. Black</i>	
I. Introduction	35
II. The Processes Controlled by Operant Neural Conditioning	39
III. Operant Neural Conditioning as a Method of Control	45
IV. Efficiency of Conditioning: Feedback and Constraints on Conditioning	49
V. Operant Neural Conditioning as a Method for Studying Functional Significance	53
VI. Conclusion	60
	vii

The Discussion of Dr. Black's Presentation	61
<i>Led by Dr. Ralph Hefferline</i>	
Open Discussion	62
References	65
3. Evoked Potentials of the Brain Related to Thinking	69
<i>Robert M. Chapman</i>	
I. Experimental Design	71
II. Average Evoked Potential from One Subject	74
III. Analysis of Group Data	80
IV. CNV and AEP	87
V. AEP Changes with Learning	90
VI. Discussion	91
VII. Conclusions	97
References	107
The Discussion of Dr. Chapman's Paper	97
<i>Led by Dr. Thomas Mulholland</i>	
Open Discussion	99
References	107
4. Objective EEG Methods for Studying Covert Shifts of Visual Attention	109
<i>Thomas Mulholland</i>	
I. Introduction	109
II. Neurophysiological Basis for Changes in the EEG Related to Visual Attention	133
The Discussion of Dr. Mulholland's Paper	146
<i>Led by Dr. William Grings</i>	
Open Discussion	147
References	150
5. The Psychophysiology of Mental Activity during Sleep	153
<i>Allan Rechtschaffen</i>	
I. Description of the Stages of Sleep	155
II. Relationship of Mental Activity to Sleep Stages	158
III. Temporal Correlates	165
IV. EEG Correlates	165

V. Motor Activity	166
VI. Cardiac and Respiratory Activity	168
VII. Electrodermal Activity	169
VIII. Penile Erections	171
IX. Temperature	173
X. Sympathetic Arousal	173
XI. Eye Movement Activity	176
XII. Phasic Events	182
XIII. Phasic Events and Other Physiological Variables	190
References	200

The Discussion of Dr. Rechtschaffen's Paper	192
<i>Led by Dr. Dean Foster</i>	
Open Discussion	194
References	200

Emphasis on Central Nervous System—Primarily Surgical Approaches

6. Lateral Specialization of Cerebral Function in the Surgically Separated Hemispheres	209
<i>R. W. Sperry</i>	

The Discussion of Dr. Sperry's Paper	222
<i>Led by Dr. Paul J. Woods</i>	
Open Discussion	223
References	227

Emphasis on Peripheral Measures—Primarily Autonomic Behavior

7. The Role of Consciousness and Cognition in Autonomic Behavior Change	233
<i>William W. Grings</i>	

The Discussion of Dr. Grings's Paper	257
<i>Led by Dr. Robert Chapman</i>	
Open Discussion	258
References	259

8. Psychophysiological Correlates of Imagery	263
<i>Allan Paivio</i>	
I. Theoretical Definition of Imagery	264
II. Electroencephalographic Studies	268
III. Eye Movements and Imagery	270
IV. Pupillary Reactions during Imagery Tasks	273
The Discussion of Dr. Paivio's Paper	285
<i>Led by Dr. Charles Osgood</i>	
Open Discussion	287
References	291
 Emphasis on Peripheral Measures—Primarily Electromyogram	
9. Hallucinations: An Experimental Approach	299
<i>Ralph F. Hefferline, Louis J. J. Bruno, and Janet A. Camp</i>	
I. Hypnotically Induced Hallucinations	300
II. Conditioned Hallucinations	304
The Discussion of Dr. Hefferline's Paper	337
<i>Led by Dr. Randall Flory</i>	
Open Discussion	338
References	341
10. Electrical Measurement of Covert Processes as an Explication of "Higher Mental Events"	343
<i>F. J. McGuigan</i>	
I. On the Genesis of the Problem of "Mind," and of a Natural Science Approach to "Mental Processes"	343
II. Development of Experimental Techniques	345
III. Language Stimuli as an Indicator of Thinking	346
IV. Internal Information Processing	346
V. Measurement of Covert Oral Behavior	348
VI. Summary	359
VII. Systematic Changes in the Amplitude of Covert Oral Behavior	359
VIII. Summary and Preliminary Interpretation	364
IX. Study of Patterns of Covert Processes	366
X. Mediational Processes	374
XI. Concluding Statement	375

The Discussion of Dr. McGuigan's Paper	376
<i>Led by Dr. Peter MacNeilage</i>	
Open Discussion	379
References	382
 11. Biofeedback Techniques and the Conditions for Hallucinatory Activity	 387
<i>Johann Stoyva</i>	
I. Inferences about Consciousness	388
II. Between Sleep and Wakefulness	399
III. On the Conditions for Hallucinatory Activity	402
IV. Summary of Argument	405
 The Discussion of Dr. Stoyva's Paper	 406
<i>Led by Dr. Abe Black</i>	
Open Discussion	408
References	413

Integrative Approaches

12. Central Processes Controlling Speech Production during Sleep and Waking	417
<i>Peter F. MacNeilage and Linda A. MacNeilage</i>	
I. Lashley's Views on Serial Order in Behavior	418
II. Phoneme-Based Models of Speech Production	420
III. The "Motor Command" Hypothesis	421
IV. The "Target" Hypothesis	422
V. The Role of Sensory Feedback	424
VI. The Multiplicity of Functional Units	428
VII. The Implications of Speech Errors	429
VIII. An Hierarchical Schema for Speech Production	429
IX. A Contemporary Associative Chain Model	433
X. Speech Production during Sleep	435
XI. Subvocal Activity during Sleep	435
XII. Physiological Correlates of Sleep Talking	437
XIII. Language Behavior during Sleep: Further Questions	438
XIV. The Verbal Component of Dream Content	439
XV. Speech Errors in Sleep-Talking Episodes	439

The Discussion of Dr. MacNeilage's Paper	440
<i>Led by Dr. Ronald Webster</i>	
Open Discussion	442
References	446
13. Psychophysiological Correlates of Meaning: Essences or Tracers?	449
<i>Charles E. Osgood and F. J. McGuigan</i>	
I. Two-Stage (Representational) Neobehaviorism	451
II. Universals of Affective Meaning	454
III. Three-Stage (Integrational) Neobehaviorism	458
IV. Central Versus Peripheral Facilitation of Perception	461
V. On the Nature and Nurture of Tracers of M	476
The Discussion of Dr. Osgood's Paper	483
<i>Led by Dr. Allan Paivio</i>	
Open Discussion	487
References	490
14. Final Open Discussion	493
Author Index	499
Subject Index	507
