

Contents

Introduction	11
1 Philosophies	15
A Natural Philosophy	17
Things and Processes	
B Moral Philosophy	25
Values; Thinking and Feeling; Christianity and Environment	
2 Complexity	30
A The Nature of Complexity	30
Relations, Instructions and the Mind	
B Complexity of Information in the Modern World	32
3 Complex Shapes	38
A Symmetry and Ordered Shapes	38
B Shapes, neither Symmetrical nor Ordered	43
4 The Structure of Complex Systems	48
A Hierarchies	48
B Other Types of Order	51
5 Processes in Complex Systems	64
A Open and Closed Systems	64
B Growth	65

Exponential Growth; Compound Interest and Discounting the Future; Accelerated Exponential Growth; Limits to Growth; Differential Growth

6	Feed-back in Systems	80
	A Sequences	80
	Positive Feed-back; Chain Reactions; Negative Feed-back	
	B Networks	87
	Modelling Networks; Soft Spots	
	C Lock-In, Schismogenesis and Double-bind	92
7	Stablization in Complex Systems	97
	A Terminating Systems and Stable States	98
	B Progressive Systems and Stable Flows	103
	Chreods and Epigenetic Landscapes; Exploring a Landscape	
	C The Epigenetic Landscape of Human Society	114
8	Analysing Systems	117
	A The Classical Scientific Method	117
	Verification, Refutation or Getting a Likeness?; Strong Inference; Hard Work and Skill; The Limits of Science	
	B Statistics	130
	Populations; Samples; Correlations	
9	Communication in Systems	140
	A Information Theory	140
	B Instructions and Programs	145
	The Same Rules and Different Starts; Different Rules and the Same Start	
10	Handling Systems	161
	A The Theory of Games	161
	Zero-Sum Games; Non-Zero-Sum Games; Real Games	
	B Time Budgeting	173
	C Meeting Conflicting Requirements	177
	Theory; Democratic Practice	
	D Dealing With an Unpredictable Future	185
	E Operational Research	189

11	Technological Forecasting	198
	A Exploratory Forecasting	198
	Brainstorming; Delphi Technique; Cross-Impact Matrices; Scenario Writing; Models – Operational, Mathematical, Physical; Gaming-Simulation; Trend Extrapolation	
	B Normative	215
	Relevance Trees; Pattern; Levels in the Relevance Tree	
	C Technology Assessment	223
12	System Modelling	225
	The World as a System	226
	Epilogue	231
	References and Suggested Reading	236
	Index	241
