

# TABLE OF CONTENTS

<b>Contributors</b> .....	<b>xv</b>
<b>Preface</b> .....	<b>xvii</b>

✓ <b>1. Comprehension processes: Introduction</b> .....	<b>1</b>
K. Rayner	
Introduction .....	1
Comprehension of words .....	2
Syntactic processes in comprehension .....	3
Comprehension of discourse .....	3
Comprehension failures and dyslexia .....	4
Global themes .....	5
References .....	6

## SECTION 1: COMPREHENSION OF WORDS

✓ <b>2. The role of meaning in word recognition</b> .....	<b>9</b>
D. A. Balota	
Introduction .....	9
The magic moment in word processing .....	9
Surface-level descriptions .....	10
Beyond the surface in lexical decision performance .....	11
Isolated lexical decisions .....	11
Priming lexical decisions .....	13
Beyond the surface in pronunciation .....	14
Isolated pronunciation .....	14
Priming pronunciations .....	15
Other measures .....	16
What's the alternative? .....	16
The functional role of words in language .....	17

Empirical evidence .....	18
Decoupling meaning from word recognition .....	18
Threshold priming .....	19
Deep dyslexia .....	19
Direct influences of meaning on perception .....	20
Some caveats .....	22
A possible framework .....	23
Two possible accounts of the early influence of meaning .....	23
Meaning representation: An alternative approach .....	26
Summary .....	27
References .....	27
<b>3. Lexical access: Another theoretical soupstone? .....</b>	<b>33</b>
M. S. Seidenberg	
Introduction .....	33
Parallel distributed processing models of the lexicon .....	35
The Seidenberg and McClelland model .....	36
Does word naming require lexical access? .....	38
Frequency, lexical access, and naming .....	41
Phonology and lexical access .....	45
Differences among orthographies .....	49
Summary .....	52
Do lexical decisions require lexical access? .....	53
Lexical access and meaning .....	56
Conclusions .....	62
References .....	66
<b>4. Does the reading system need a lexicon? .....</b>	<b>73</b>
D. Besner	
Introduction .....	73
The lexical model of visual word identification and production:	
Some standard assumptions .....	74
Producing a phonological representation .....	75
The addressed-assembled distinction: Evidence from acquired dyslexia .....	75
The addressed-assembled distinction: Evidence from oral reading by intact subjects .....	76
An alternative account of oral reading and lexical decision:	
A PDP model .....	77
On the psychological reality of the addressed-assembled distinction: Some old and new evidence .....	78
Regularity effects in naming and lexical decision .....	79
Two effects of case alternation: Letter and multiletter unit identification .....	79

On the interaction of case alternation, word frequency, and the addressed-assembled distinction .....	80
A new prediction .....	81
Conclusions .....	82
Phonology and the PDP model: Some formal tests .....	82
Oral reading of nonwords .....	83
Can the model do lexical decision without a lexicon? The case of regularity effects .....	84
Pseudohomophone effects in lexical decision and naming .....	87
Simulation results .....	90
Measures of orthography .....	92
Summary .....	94
Conclusions .....	95
References .....	96
<b>5. The locus of the associative-priming effect in the mental lexicon .....</b>	<b>101</b>
A. M. B. de Groot	
Introduction .....	101
Localizing the associative-priming effect .....	102
Method .....	107
Materials .....	107
Lexical decision versus animateness categorization .....	107
Lexical decision versus size categorization .....	108
Subjects, apparatus and procedure .....	109
Unmasked-prime experiments .....	110
Lexical decision versus animateness categorization: .....	110
Lexical decision versus size categorization: .....	111
Discussion .....	113
Masked-prime experiments .....	115
Results and discussion .....	116
General discussion .....	117
References .....	122
<b>6. Lexical processing, morphological complexity and reading .....</b>	<b>125</b>
R. Schreuder, M. Grendel, N. Poulisse, A. Roelofs & M. van de Voort	
Introduction .....	125
Empirical evidence for a decomposed lexicon .....	127
Prefix stripping .....	127
The AAM model .....	128
The short SOA priming task .....	129
Inflection .....	129
Derivationally complex words .....	130

Morphological properties of the materials used .....	130
Method .....	131
Subjects .....	131
Materials and design .....	131
Procedure .....	133
Results .....	133
Discussion .....	137
Inflectionally complex forms .....	137
Derivationally complex verb forms .....	138
Morphological priming in a nondecomposed lexicon? .....	139
Conclusion .....	140
References .....	140

## 7. Eye movements and lexical access in reading ..... 143

A. Pollatsek & K. Rayner

Introduction .....	143
Background: The perceptual span in reading .....	145
More background: Immediacy of eye-movement control .....	147
Still more background: The timing of events on a fixation .....	148
A simple model of eye-movement control .....	149
Refixations of words .....	153
Lower-level signals to drive the eye .....	156
Changing perceptual span .....	157
Implications for understanding reading .....	159
References .....	161

## COMMENTARY ON SECTION 1:

## 8. Lexical access: Some comments on models and metaphors ..... 165

O. Neumann

Introduction .....	165
The Standard Model .....	166
Doubts about the Standard Model .....	167
First challenge .....	167
Second challenge .....	169
Third challenge .....	171
Fourth challenge .....	174
Conclusion .....	176
The computer hardware metaphor and some of its consequences .....	177
Structure and function .....	177
Some further consequences of the hardware metaphor .....	180
References .....	183

<b>9. What's in a word? Levels of representation and word recognition</b> .....	<b>187</b>
P. Hudson	
Introduction .....	187
What problems underlie the papers? .....	189
Morphology and the notion word .....	189
Meaning and magic moments .....	190
The rules of inference .....	191
The single lexical entry: Static or dynamic representations ..	192
The interaction among tasks, theories, and inferences .....	193
What are core questions in word recognition? .....	195
The scope of explanations in word recognition .....	195
Two questions about theories: Representations and their processes .....	198
References .....	200
 <b>SECTION 2: SYNTACTIC PROCESSES IN COMPREHENSION</b>	
<b>10. The cooperative language processors: Semantic influences in an autonomous syntax</b> .....	<b>205</b>
C. A. Perfetti	
Introduction .....	205
Impoverished syntax .....	208
Semantic and contextual influences in parsing .....	210
Double prepositions and spatial relations .....	214
The syntax of postnominal prepositional phrases .....	217
The cooperative autonomous language processor .....	219
The organization of language processors .....	219
The pieces parser .....	222
Summary .....	227
References .....	228
 <b>11. Parsing and comprehension: A multiple-constraint view</b> .....	 <b>231</b>
R. Taraban & J. L. McClelland	
Introduction .....	231
Two views of parsing .....	233
The Standard View: "Syntax proposes and semantics disposes" .....	233
The alternative view: Multiple-constraint satisfaction .....	235
How is comprehension related to parsing? .....	235
The rigors of reading .....	236

Processing expectations .....	236
Is processing guided only by general syntactic principles? .....	238
Minimal attachment .....	238
Experiment 1 .....	239
Content, not general syntactic principles, makes the difference .....	241
The separate contribution of three types of content-based expectations .....	241
Experiment 2 .....	242
Expectations for thematic roles and for thematic role fillers count for a lot .....	243
Semantic violations? .....	245
The strong prediction of multiple-constraint models .....	246
Experiment 3 .....	247
The object noun phrase influences expectations and reading times .....	248
The major issues considered .....	250
Did subjects use prior content to guide the initial attachment and role assignment of a constituent? .....	250
"Having an expectation" reconsidered .....	250
Fit of the filler as a possible confound .....	251
Summary .....	252
Did subjects use general syntactic principles for the initial attachment of constituents? .....	253
What is the locus of content-based guidance? .....	253
Are thematic roles assigned by the syntax? .....	254
Are prepositional phrases arguments? .....	256
Questions of modeling .....	257
What is the right mechanism for modeling thematic role information? .....	257
A multiple-constraint satisfaction network .....	258
Conclusion: A theory of parsing needs a theory of reading comprehension .....	260
References .....	261

## 12. Comprehending sentences with empty elements ..... 265

C. Clifton Jr. & M. De Vincenzi

Introduction .....	265
Reading English sentences .....	267
Experiment 1: Reading times for lexical NPs .....	267
Experiment 2: Effects of verb subcategorization preferences .....	269
Comprehending Italian sentences .....	272
Experiment 3: Processing <i>wh</i> -words in Italian .....	272
The Minimal Chain Principle .....	275
Experiment 4: Inverted subjects in Italian .....	277
Experiment 5: Ergative verbs in Italian .....	279

Conclusions .....	282
References .....	282
<b>13. Reading in different languages: Is there a universal mechanism for parsing sentences? .....</b>	<b>285</b>
D. C. Mitchell, F. Cuetos & D. Zagar	
Introduction .....	285
Overview of parsing procedures in English .....	286
Is English parsing representative of that for other languages? .....	288
The role of agreement and order information .....	288
Are attachment strategies universal? .....	290
Experimental evidence on the use of late closure in Spanish .....	291
Potential interpretations of the data .....	295
Is there a universal human sentence parsing mechanism? .....	297
Summary .....	300
References .....	300
<b>14. Parsing modifiers: Special purpose routines in HSPM? 303</b>	
L. Frazier	
Introduction .....	303
PP attachment .....	304
Grammatical assumptions about the structure of NP:	
Smith's solution .....	305
Abney's solution .....	306
Taraban and McClelland's solution .....	309
The shape of the problem .....	311
The X-max solution .....	312
Summary .....	317
Relative clause attachment: A violation of late closure? .....	318
The phenomenon .....	320
In search of a more general account of parsing modifiers .....	324
References .....	329
<b>COMMENTARY ON SECTION 2:</b>	
<b>15. Connectionism: A case for modularity .....</b>	<b>331</b>
D. Norris	
Introduction .....	331
Learning in connectionist nets .....	333
Bottom-up models and top-down effects .....	338
Conclusion .....	341
References .....	342

<b>16. Parsing principles and language comprehension during reading</b> .....	<b>345</b>
G.B. Flores d'Arcais	
Introduction .....	345
Does syntactic analysis take place during reading? .....	345
The nature of parsing principles in reading .....	347
The autonomy of syntax .....	350
Are parsing principles universal? .....	351
Conclusions .....	354
References .....	355

### **SECTION 3: COMPREHENSION OF DISCOURSE**

<b>17. Causal relatedness and text comprehension</b> .....	<b>361</b>
J. L. Myers	
Introduction .....	361
Trabasso's model of causal structure .....	362
Analysis of narrative text .....	362
Retrieval times .....	363
Summary .....	364
Fletcher and Bloom's current-state model .....	365
The accessibility of information about goals .....	369
Concluding remarks .....	373
References .....	374
<b>18. Which elaborative inferences are drawn during reading?</b>	
<b>A question of methodologies</b> .....	<b>377</b>
J. M. Keenan, G. R. Potts, J. M. Golding & T. M. Jennings	
Introduction .....	377
Measures of inferencing and the debate over what constitutes an inference .....	381
A critical analysis of tasks used to detect inferences .....	383
Cued recall .....	383
Sentence verification .....	384
Sentence reading times .....	385
On-line question-answering methodology .....	388
Recognition .....	388
Activation measures of inferences .....	389
Lexical decision .....	390
Naming .....	391
Modified Stroop task .....	392
Summary of task analysis .....	394

Task selection as a function of one's definition of an inference .....	394
Distinguishing inferences occurring during reading from processes occurring at test .....	395
Construction of proper controls .....	396
Controlling for word-based priming .....	396
The null hypothesis problem .....	397
Controlling for expectancy priming .....	397
When to test for inferences .....	397
Summary .....	399
References .....	399
<b>19. Textual inferences: Models and measures .....</b>	<b>403</b>
G. McKoon & R. Ratcliff	
Introduction .....	403
Word identification .....	404
Memory retrieval .....	408
Case study I: Elaborative inferences .....	409
On-line tasks .....	410
Memory tasks .....	413
Summary .....	415
Case study II: Anaphoric references .....	415
Conclusions .....	418
References .....	418
<b>20. The causal inference maker: Towards a process model of inference generation in text comprehension .....</b>	<b>423</b>
P. van den Broek	
Introduction .....	423
The representation of text in memory .....	424
Empirical evidence for network representations .....	427
A process model of inference generation .....	430
Backward inferences .....	433
Empirical evidence for backward inferences .....	435
Forward inferences .....	438
Empirical evidence for forward inferences .....	439
Discussion .....	440
References .....	443
<b>21. On the control of inferences in text understanding .....</b>	<b>447</b>
W. Vonk & L. Noordman	
Introduction .....	447
On the necessity of inferences .....	448

Inferences in causal and contrastive relations .....	452
On-line inferences? .....	455
Experiment 1 .....	455
Experiment 2 .....	458
Inferences and the reader's purpose .....	459
Experiment 3 .....	460
Experiment 4 .....	460
Inferences and the reader's knowledge .....	461
Experiment 5 .....	461
Conclusion .....	462
References .....	463
<b>22. Referential processing in reading: Focusing on roles and individuals .....</b>	<b>465</b>
S. Garrod & A. Sanford	
Introduction .....	465
Entities and roles in narrative text .....	466
Referential processes and attentional focus .....	467
Entity focusing and the interpretation of pronouns .....	468
Focusing on roles and interpreting definite descriptions .....	473
Summary of the focusing studies .....	478
The explicit/implicit focus account .....	479
The overall structure of the system .....	479
Individuals and their representation in Explicit Focus .....	479
Roles and their representation in Implicit Focus .....	482
Summary and conclusions .....	483
References .....	484
<b>23. A connectionist model of text comprehension .....</b>	<b>487</b>
N. E. Sharkey	
Introduction .....	487
The assembly of world knowledge .....	488
Previous research on world knowledge .....	489
Dynamic assembly of macro-units .....	491
Proposition-units and centrality .....	494
A simulation of propositional pattern completion .....	495
The relation to the data .....	496
Memory distortions .....	496
Response time measures .....	498
Lexical context effects .....	498
Some properties of the model .....	501
Context effects .....	502
Rate of microfeature activation .....	503
Proposition construction and priming .....	505
The selection phase .....	506

The associative phase .....	506
The bottom-up account .....	507
The top-down account .....	508
The minimal top-down account .....	508
Discussion of the model .....	509
References .....	511

### COMMENTARY ON SECTION 3:

<b>24. On the nature of text-driven inference .....</b>	<b>515</b>
A. Sanford	
Introduction .....	515
Necessary and elaborative inferences for text understanding .....	516
Anaphora .....	517
Causes and outcomes .....	519
Incomplete processes .....	520
Interpretation, cohesion, and incompleteness .....	520
Established relations and component processes .....	522
The control of inferential processes .....	525
Computational and mental resources .....	526
Type- and content-based inferential patterns: Causality .....	528
Generalizing beyond causality .....	530
Conclusions .....	531
References .....	533

### SECTION 4: COMPREHENSION FAILURES AND READING

<b>25. Explaining failures in spoken language comprehension by children with reading disability .....</b>	<b>539</b>
S. Crain & D. Shankweiler	
Introduction .....	539
Comprehension and the language apparatus .....	541
The verbal working memory system .....	542
Testing competing hypotheses about the source of comprehension failures .....	543
Comprehension of temporal terms .....	544
Comprehension of garden path sentences .....	548
Detection and correction of ungrammatical sentences .....	550
Conclusion .....	551
References .....	552

<b>26. Reading comprehension in dyslexic and normal readers: A component-skills analysis</b> .....	<b>557</b>
F. A. Conners & R. K. Olson	
Introduction .....	557
Models and measures of component skills in reading comprehension .....	559
Models .....	559
Measures .....	561
Reading comprehension .....	561
Listening comprehension .....	561
General verbal ability .....	561
Word recognition .....	562
Components of word recognition .....	562
Segmental language tasks .....	563
Group comparisons .....	563
Subjects .....	564
Results and discussion .....	565
Reading comprehension .....	565
Listening comprehension .....	566
General verbal ability .....	567
Word recognition .....	567
Components of word recognition .....	567
Segmental language skills .....	568
Path analyses .....	568
The basic model .....	569
The extended model .....	572
Results for listening comprehension .....	572
Results for word recognition .....	574
General discussion and conclusions .....	575
References .....	577
<b>27. Semantic processing in dyslexia</b> .....	<b>581</b>
P. H. K. Seymour	
Introduction .....	581
Cognitive analysis of dyslexia: An overview .....	582
Processing model .....	582
Cognitive assessment method .....	583
Visual, phonological, and morphemic impairments .....	584
Acquired dyslexias .....	585
Developmental dyslexias .....	586
Reconsideration of the subtype question .....	586
Operational definition of impairments .....	587
Conclusion .....	589
Semantic processing .....	590
Semantic mediation in phonological access .....	590

Abstract/concrete effect .....	590
Function word effect .....	591
Semantic errors .....	591
Derivational errors .....	592
Access to semantics .....	592
Blocked access .....	593
Delayed access .....	594
Phonologically mediated access .....	595
Conclusion .....	596
Status of the semantic system .....	596
Discussion .....	599
Methods of investigation .....	599
Requirements for models .....	599
Reading acquisition .....	600
Patterns of disability .....	600
Description of dyslexia .....	601
Causation of dyslexia .....	601
References .....	602
<b>28. Comprehension problems in dyslexia .....</b>	<b>603</b>
J. Rispens	
Introduction .....	603
The concept of dyslexia .....	604
Word recognition and comprehension .....	606
Empirical evidence .....	606
Absence of text modeling or long term memory deficiencies .....	607
Some counter evidence .....	609
Conclusion .....	610
Comprehension and knowledge of story structure .....	610
Differences in developmental course .....	610
Explicit awareness .....	611
Reading and listening comprehension .....	612
Empirical evidence .....	612
Conclusion .....	614
Comprehension problems of dyslexic readers: A summary .....	615
References .....	616
<b>COMMENTARY ON SECTION 4:</b>	
<b>29. Comprehension failures .....</b>	<b>621</b>
A. van der Leij	
Introduction .....	621
Reading comprehension and its operationalization .....	621
Bottom-up versus top-down factors? .....	623

Developmental lag or structural deficit? .....	624
The issue of individual differences .....	625
Factors contributing to comprehension failure .....	627
Conclusions .....	628
References .....	628

## **GENERAL COMMENTARY**

### **30. Comprehension processes in reading: Final thoughts . 631**

K. Rayner, G.B. Flores d'Arcais, & D. A. Balota

Introduction .....	631
On-line processing activities in reading .....	632
Searching for the appropriate measures of on-line processing activities .....	633
Modeling the reading process .....	634
Reading problems .....	636
Final thoughts .....	637
References .....	638

**Author index .....** 639

**Subject index .....** 653
