

# Contents

<b>1. Cognitive Processing in Artificial Language Research . . . . .</b>	<b>1</b>
Herbert L. Roitblat, Heidi E. Harley, and David A. Helweg	
Animal language research and its controversies . . . . .	2
The value of animal language research . . . . .	6
Some general issues in cognitive processing . . . . .	8
Meaning and reference . . . . .	9
Syntax . . . . .	12
Pragmatics . . . . .	17
Conclusion . . . . .	19
<b>2. Beyond Animal Language . . . . .</b>	<b>25</b>
Gary Bradshaw	
The path to language . . . . .	28
Limitations of the Signature Characteristic Strategy . . . . .	30
Beyond Animal Language . . . . .	34
Conclusion . . . . .	39
<b>3. Similarities and Differences in Human and Animal . . . . .</b>	<b>45</b>
<b>Language Research: Toward a Comparative Psychology of Language</b>	
Stan A. Kuczaj II and Virginia M. Kirkpatrick	
What is the study of language?. . . . .	45
Is human language an appropriate standard for comparative language research? . . . . .	48
Questions generated by the human language standard . . . . .	49
What are the language units of various language systems? . . . . .	50
How meaningful are the symbolic units of various language systems?. . . . .	52
Do nonhuman language systems involve syntax?. . . . .	55
What functions do the languages of other species serve? . . . . .	57

## Contents

Concluding remarks . . . . .	58
<b>4. Knowing How to Use Language: Developing a Rapprochement Between Two Theoretical Traditions</b> William Bechtel	<b>65</b>
Symbol processing versus associationism. . . . .	66
Ryle's distinction between knowing how and knowing that . . . . .	68
The promise of connectionism to explain knowing how. . . . .	69
The contribution of animal language research . . . . .	75
Conclusion . . . . .	81
<b>5. A Proposal for Computer Modeling of Animal Linguistic Comprehension</b> Earl Hunt	<b>85</b>
The theoretical issue raised by animal linguistic comprehension. . . . .	85
<b>6. Language Acquisition and the Power of Expression</b> Lois Bloom	<b>95</b>
The "tool use" metaphor . . . . .	98
Language as expression . . . . .	99
Language, emotion, and cognition. . . . .	101
Expression of beliefs, desires, and feelings . . . . .	104
Allocating cognitive resources for emotional expression and words . . . . .	105
<b>7. Animal Language Research Needs a Broader Comparative and Evolutionary Framework</b> Peter L. Tyack	<b>115</b>
The evolution of domain specific cognitive processes . . . . .	117
Capability versus skill . . . . .	124
Problems in applying language analogies to animals. . . . .	125
Vocal learning and imitation. . . . .	129
Signature whistles in wild dolphins . . . . .	131
Vocal imitation in adult captive dolphins . . . . .	134

	Do dolphins imitate signature whistles to call specific individuals? . . . . .	136
	Ethological suggestions for animal language research . . . . .	138
8.	<b>Frequency-modulated Whistles as a Medium for Communication with the Bottlenose Dolphin (<i>Tursiops truncatus</i>)</b> John Sigurdson . . . . .	153
	Method . . . . .	156
	Conclusions. . . . .	170
9.	<b>Linguistic Phenomena in the Natural Communication of Animals</b> Charles T. Snowdon . . . . .	175
	Phonetic variation and categorization . . . . .	177
	Social components of communication. . . . .	181
	Syntax. . . . .	184
	Referential communication . . . . .	186
	Summary and conclusions . . . . .	189
10.	<b>Meaning, Reference, and Intentionality in the Natural Vocalizations of Monkeys</b> Robert M. Seyfarth and Dorothy L. Cheney . . . . .	195
	Subjects . . . . .	196
	Semanticity in the weakest sense . . . . .	197
	Semanticity in a stronger sense . . . . .	201
	Semanticity in the strongest sense . . . . .	209
	Summary . . . . .	214
11.	<b>Cognition and Communication in an African Grey Parrot (<i>Psittacus erithacus</i>): Studies on a Nonhuman, Nonprimate, Nonmammalian Subject</b> Irene Maxine Pepperberg . . . . .	221
	Background. . . . .	221
	Experimental design . . . . .	229
	Behaviors during training . . . . .	231

<b>Study of Lateralized Cognitive Processes in</b>	
<b>Chimpanzees: Some Recent Findings</b>	
William D. Hopkins and Robin D. Morris	
Methodological issues . . . . .	296
Statistical issues . . . . .	299
The time course of hemispheric activation . . . . .	302
Summary and conclusion. . . . .	305
<b>15. Cognitive Factors Affecting Comprehension . . . . .</b>	<b>311</b>
<b>of Gesture Language Signs: A Brief Comparison of</b>	
<b>Dolphins and Humans</b>	
Palmer Morrel-Samuels and Louis M. Herman	
Artificial gestural language . . . . .	311
General features of gesture recognition . . . . .	312

	Cerebral asymmetry during gesture recognition . . . . .	316
<b>16.</b>	<b>Chimpanzee Competence for Comprehension . . . . .</b>	<b>329</b>
	<b>Video-formatted Task Situation</b>	
	Duane M. Rumbaugh, William Hopkins, David A. Washburn, and E. Sue Savage-Rumbaugh	
	Perceptions of quantities . . . . .	333
<b>17.</b>	<b>Acquisition of Personal Pronouns by a Chimpanzee . . . . .</b>	<b>347</b>
	Shoji Itakura and Tetsuro Matsuzawa	
	Discrimination of the letters of the alphabet . . . . .	348
	Individual recognition . . . . .	348
	Description of the subject and the object of action . . . . .	349
	Acquisition of personal pronouns . . . . .	351
	Discussion and conclusions . . . . .	359
<b>18.</b>	<b>"Language Training" and its Role in the . . . . .</b>	<b>365</b>
	<b>Expression of Tacit Propositional Knowledge by Chimpanzees (<i>Pan troglodytes</i>)</b>	
	Roger K. R. Thompson and David L. Oden	
	A profound disparity? . . . . .	365
	Representational differences between physical and relational matching . . . . .	367
	Evidence for tacit if not explicit propositional knowledge in infant chimpanzees. . . . .	370
	The chimpanzee infants and their general environment	370
	Matching training and testing . . . . .	371
	Perceptual sensitivity to physical and relational similarities and differences . . . . .	373
	Explicit training on relational matching. . . . .	377
	What does language training do? . . . . .	379

<b>19. The Effects of Language on Information Processing . . . . .</b>	<b>385</b>
<b>and Abstract Concept Learning in Dolphins, Monkeys, and Humans</b>	
Melissa R. Shyan and Anthony A. Wright	
Evidence from dolphin and human comparative research . . . . .	386
Evidence from monkey and human comparative research . . . . .	392
Where do we go from here? . . . . .	396
Conclusions. . . . .	398
<b>20. Representational and Conceptual Skills of Dolphins . . . . .</b>	<b>403</b>
Louis M. Herman, Adam A. Pack, and Palmer Morrel-Samuels	
Receptive language competencies . . . . .	404
Behavioral mimicry: Imitating the behavior of a model . . . . .	414
Matching-to-sample . . . . .	421
Conclusions. . . . .	428
<b>21. A Bottlenosed Dolphin's Responses to Anomalous . . . . .</b>	<b>443</b>
<b>Sequences Expressed Within an Artificial Gestural Language</b>	
Mark D. Holder, Louis M. Herman, and Stanley Kuczaj II	
The use of anomalous sequences in language research . . . . .	444
Akeakamai's language and the construction of anomalous sequences . . . . .	445
Testing responses to anomalous sequences . . . . .	446
Relational anomalies . . . . .	449
Nonrelational anomalies . . . . .	451
Responses to sequences given by a naive signer . . . . .	453
Summary . . . . .	454

22. <b>Language Learnability in Man, Ape, and Dolphin</b> . . . . .	457
E. S. Savage-Rumbaugh	
The strong-L learning view . . . . .	458
Reference and syntax. . . . .	459
Receptive and productive competence. . . . .	462
Critical differences between dolphin and child linguistic experience . . . . .	464
A theory of language acquisition . . . . .	467
Summary . . . . .	469
