

# Contents

## Part I: THEORETICAL AND TECHNICAL APPROACHES

### Chapter 1

Microgenesis: Historical Review and Current Studies .....	3
<i>Robert E. Hanlon and Jason W. Brown</i>	
Early Studies .....	3
Perceptogenesis .....	5
Clinical Applications .....	6
Experimental Studies .....	10
Conclusion .....	12
References .....	13

### Chapter 2

Fractionation of Spatial Cognition following Focal and Diffuse Brain Damage .....	17
<i>Dean C. Delis and Amy M. Bihrlé</i>	
Historical Perspective .....	18
Visual Attention .....	19
Parts and Wholes .....	20
Studies of Visuospatial Processing Using Hierarchical Stimuli ...	21
Frequency and Severity of Visuospatial Deficits .....	25
Intrahemispheric Dissociations in Visuospatial Processing .....	27
Toward an Integration of Intra- and Interhemispheric Dissociations in Visuospatial Processing .....	28
Fractionation of Spatial Cognition in Diffuse Brain Pathology ...	29

Conclusion .....	32
References .....	32
 Chapter 3	
Anatomical and Physiological Correlations and Neuroimaging Techniques in Language Disorders .....	37
<i>Andrew Kertesz</i>	
Autopsy Location .....	37
Localization through Head Injuries .....	40
Surgical Localization .....	40
Cortical Stimulation .....	41
Electroencephalography and Evoked Potentials .....	43
Isotope Localization of Lesions .....	44
Computerized Tomographic (CT) Lesion Localization .....	45
Cerebral Blood Flow (CBF) Localization .....	48
Positron Emission Tomography (PET) .....	49
Single-Photon Computerized Tomography (SPECT) .....	50
Magnetic Resonance Imager (MRI) .....	50
Discussion and Conclusion .....	52
References .....	56
 Chapter 4	
ERPs and Advances in Neurolinguistics .....	61
<i>Sidney J. Segalowitz</i>	
Overview of ERP Methodology .....	61
ERP versus Reaction Time .....	62
ERPs and Some Research Issues in Neurolinguistics .....	69
Lexical Semantics .....	69
Semantics versus Syntax .....	70
Reading in Normals .....	71
Development of Reading Skills .....	73
Language Development .....	74
Second-Language Acquisition .....	75
Issues in Clinical Neurolinguistics .....	75

Summary .....	77
References .....	77

Part II: DEVELOPMENT AND DISSOLUTION OF LANGUAGE

Chapter 5

Disorders in Language Acquisition and Cerebral Maturation: A Neurophysiological Perspective .....	85
<i>Lyda Mejia and Jorge Eslava-Cobos</i>	
Organic and Functional Syndromes .....	88
Basic Embryologic Considerations .....	89
Analyzers and Stereotypes .....	92
Normal Language Organization: Physiologic Stable States .....	93
Abnormal Language Organization: Pathologic Stable States .....	98
Kinesthetic Motor Verbal Analyzer .....	98
Verbal Analyzer .....	100
Conclusions .....	102
References .....	102

Chapter 6

Speech and Language Alterations in Dementia Syndromes .....	107
<i>Jeffrey L. Cummings and D. Frank Benson</i>	
Methodology .....	108
Assessment .....	108
Participants .....	109
Results .....	110
Normal Control Subjects .....	110
Dementia of the Alzheimer Type .....	110
Parkinson's Disease .....	112
Multi-Infarct Dementia .....	113
Discussion .....	115
Conclusions .....	118
References .....	119

## Part III: ORAL AND WRITTEN LANGUAGE DISORDERS

## Chapter 7

Mechanisms Underlying Aphasic Transformations .....	123
<i>Hugh W. Buckingham</i>	
The Garrett Model .....	124
The Augmentations of the Garrett Model .....	128
Lexical Substitutions .....	131
Lexical Blends .....	133
Phonemic Substitution .....	134
Phonemic Transposition .....	137
Constraints on Errors Conditioned by Representative/Computational Knowledge .....	139
Summary .....	142
References .....	143

## Chapter 8

Alexia and Agraphia in Spanish Speakers: CAT Correlations and Interlinguistic Analysis .....	147
<i>Alfredo Ardila, Monica Rosselli, and Oscar Pinzon</i>	
Method .....	150
Subjects .....	150
Procedure .....	150
Instrument .....	154
Results .....	154
Population with Cerebral Damage and Normal Population .....	155
Patients with Right-Hemisphere Lesions and Patients with Left-Hemisphere Lesions .....	155
Intrahemispheric Comparisons .....	155
Quantification of the Type of Errors .....	160
Scores on the Rey-Osterrieth Complex Figure .....	162
Superimposition of Scans .....	163
Discussion .....	168
Patients with Right and Left Lesions .....	168
Intrahemispheric Comparisons .....	168
Topography of the Clinical Findings .....	172
An Interlinguistic Consideration .....	173
References .....	174

## Chapter 9

Semantic Aphasia Reconsidered .....	177
-------------------------------------	-----

*Alfredo Ardila, Maria Victoria Lopez, and Eugenia Solano*

Case Reports .....	180
Patient 1 .....	180
Patient 2 .....	181
Testing Procedure .....	182
Results .....	183
Discussion .....	186
References .....	192

## Part IV: BASAL GANGLIA AND COGNITIVE ACTIVITY

## Chapter 10

Cognitive Effects of Adrenal Autografting in Parkinson's Disease .....	197
---	-----

*Feggy Ostrosky-Solis, Ignacio Madrazo, Rene Drucker-Colin,  
and Luis Quintanar*

Pathology and Pathogenesis .....	198
Treatment .....	201
Neurosurgical Treatment .....	202
Pharmacological Treatment .....	202
Tissue Transplants .....	203
Adrenal Medullary Grafts in PD Patients .....	205
Surgical Technique .....	206
Neuropsychological Findings .....	206
General Considerations .....	212
References .....	214

## Chapter 11

The Striatum as a Temporary Memory Store .....	219
--	-----

*Roberto A. Prado-Alcalá*

Involvement of the Neostriatum in Memory .....	219
The Overtraining Effect .....	219
Conclusions .....	223
References .....	224

## Part V: RECOVERY FROM BRAIN DAMAGE

## Chapter 12

Development and Plasticity in the Central Nervous System: Organismic and Environmental Influences .....	229
<i>Donald G. Stein</i>	
Plasticity and Levels of Analysis of CNS Functions .....	234
Environmental and Behavioral Factors	
“Shape” CNS Morphology .....	236
Temporal Factors also Important in Predicting the Outcome of Brain Damage .....	238
Adaptative and Maladaptative Anomalous Growth in Response to CNS Injury .....	239
Behavioral Consequences of Lesions Early in Life vis-à-vis Injuries in Maturity .....	241
Important Individual Differences in Response to Brain Injury That Are Not Adequately Studied .....	244
Summary and Concluding Remarks .....	249
References .....	250
Index .....	253
