Preface	ix
1 Introduction	1
Psychology and Language	2
The Role of Human Information Processing	3
The Role of Linguistics	12
The Role of Computer Science	15
Reading versus Listening	17
Research Methods of Language Processes	19
Some Notes on Using this Book	23
Summary	24
2 Language and Meaning: Representing and Remembering Discourse	27
Levels of Representation	27
Sentence Form versus Meaning	29
Propositional Content of Sentences and Discourse	31
Psychological Reality of Propositions	37
Representation of the Form of Discourse	41
Representation of Situation Models	47
Summary	54

3 Syntax and Parsing Processes **57**

Syntax and Immediate Constituent Analysis	58
Factors That Affect Parsing Processes	63
Principles of Parsing	69
Interaction of Syntax and Semantics: Interactive versus Modular Parsing	79
Summary	87

4 The Role of Knowledge in Language Comprehension **89**

The Role of Knowledge during Encoding	92
The Role of Knowledge during Retrieval	98
Characteristics of Schemata	105
Summary	110

5 Understanding Coherent Discourse **113**

Coherence and the Given-New Analysis	114
Processing Given and New Information	118
Coherence and the Identification of the Referents of Given Information	121
Overcoming Impediments to Coherence	133
Factors Influencing the Speed of Reading Coherent Text	140
Summary	147

6 Theme **149**

Discourse Factors that Signal Theme	149
Discourse Theme: Structure and Process	154
Theme and Macrostructure	161
Summary	165

7 Inference Processes **167**

When are Inferences Drawn?	171
Message Characteristics that Guide Inference Processing	175
Reader Characteristics that Guide Inference Processing	183
Summary	188

8	Understanding Stories	191
	The Story Schema	192
	Schemata of Cause, Plans, and Goals	200
	Nonnarrative Discourse	202
	Understanding Script-Based Stories	204
	Coordinating Different Schemata	218
	Summary	219
9	Question Answering and Sentence Verification	221
	Stages of Question Answering	223
	Process Models of Sentence Verification and Question Answering	234
	Fact Retrieval and Question Answering	241
	Summary	246
10	Natural Language Understanding by Computers—and People	249
	The Role of Computer Models of Language Processes	253
	Computer Simulations of Language Processes	255
	Conclusions	268
	Summary	269
	References	271
	Author Index	291
	Subject Index	299
	Acknowledgments and Copyrights	305
