CHAPTER 1	INTRODUCTION TO THE STUDY OF MOTOR BEHAVIOR	1
	The Study of Psychology	1
	The Study of Motor Behavior.	3
	The Neuropsychological Approach of This Text	5
	Motor Learning and Performance.	9
CHAPTER 2	BASIC NEUROANATOMY OF THE NERVOUS SYSTEM	11
	Terminology Used in Neuroanatomy.	11
	General Parts of the Nervous System	18
	The Neuron	14
	The Central Nervous System (CNS).	18
	The Peripheral Nervous System (PNS)	35
CHAPTER 3	NEURAL TRANSMISSION	41
	Conduction of Nerve Impulses by Axons.	41
	Response of Dendrites and Cell Bodies to Stimulation	52
	Types of Stimuli That Excite the Neuron	53
	Synaptic Transmission	53
	The Neuromuscular Junction	60
	Neural Circuits	62
CHAPTER 4	SENSORY INTEGRATION	63
	Sensory Functions	63
	Sensory Limits	65
	The Sensory Receptors	65

Transmission of Impulses to the Brain	67
Interpretation of Sensations	76
Hemispheric Dominance in the Brain	79
Control of Sensory Transmission by the Brain	80

CHAPTER 5 THE SOMATOSENSORY SYSTEM 81

Cutaneous Receptors	81
The Proprioceptors	88

CHAPTER 6 THE VISUAL SYSTEM 109

Radiant Energy	109
Anatomy of the Eye	111
Transduction of Light Energy in the Retina	117
Optic Transmission	119
Directional Properties of Vision	121

CHAPTER 7 MOTOR INTEGRATION AND CONTROL OF MOVEMENT 123

Development of Motor Organization	124
Motor Integration and Transmission Network	124
Control of Movement by the Brain	140

**CHAPTER 8 MOTOR INTEGRATION AND CONTROL:
THE BRAINSTEM AND SPINAL CORD 143**

The Brainstem	143
The Reticular Formation	150
The Spinal Cord	150
Some General Reflex Characteristics	160
Damage to the Motor System	161

CHAPTER 9 LEARNING AND MEMORY 163

Understanding Learning and Memory	163
Theories of Learning-Memory	167
Present Status of Consolidation Memory Theory	180
Implications of Consolidation Memory Theory	181

CHAPTER 10 A NEUROPSYCHOLOGICAL MODEL OF MOTOR BEHAVIOR 185

Basic Components of a Movement Model	186
A Neuropsychological Model	188
Problems of Models	213

CHAPTER 11 PERCEPTION: INTRODUCING CONCEPTS	215
General Features of Perception	215
Differences between Sensation and Perception	216
Sequence of Perceptual Organization	217
Development of Perception	218
Perceptual Learning	224
Perceptual Types	227
Perceptual-Motor Behavior	229
CHAPTER 12 SPEED OF PERCEPTION	231
Definition of Terms	231
Speed of Perception and Motor Behavior	233
The Study of Reaction Time	233
Measurement of Reaction Time	235
Factors Affecting the Speed of Perception	237
Effects of Practice on Speed of Perception	251
Relationship of Reaction Time to Movement Time	252
Amending an Incorrect Movement	253
Speed of Perception and Games and Sports	254
CHAPTER 13 VISUAL PERCEPTION AND MOTOR BEHAVIOR	257
Focusing Properties of Vision	258
Field of Vision and Peripheral Vision	264
Visual Perception of Depth	267
Color Vision	277
Figure-Ground Perception	279
Visual Tracking	284
Eye Dominance	291
Motor Learning and Vision	293
CHAPTER 14 KINESTHESIS AND MOTOR BEHAVIOR	295
Definition of Kinesthesia	296
Kinesthesia and Neural Mechanisms	296
Measurement of Kinesthesia	300
Development of Kinesthesia	304
Kinesthesia and Motor Learning and Performance	305
Kinesthetic Aftereffects	311
Using Kinesthetic Cues in Teaching	315

CHAPTER 15 PAIN PERCEPTION AND MOTOR BEHAVIOR	319
<hr/>	
Pain and Sports Performance	320
Pain Threshold, Tolerance, and Measurement	320
The Neurophysiological Basis of Pain	322
Psychological Aspects of Pain	327
Pain Perception and Athletes	330
Enhancing Pain Tolerance in Motor Activities	332
CHAPTER 16 MOTOR SKILL ACQUISITION	335
<hr/>	
Terminology Used in Motor Skill Literature	335
Motor Skill Research Tasks	339
Performance Curves	345
Measuring Motor Learning	348
Limits of Motor Skill Acquisition	349
Retention and Forgetting	352
Reminiscence	359
CHAPTER 17 ORGANIZATIONAL FEATURES AND PHASES OF MOTOR SKILL ACQUISITION	361
<hr/>	
Organizational Features of Motor Learning	361
Phases of Acquisition of Motor Skill	364
Factors Affecting Acquisition of Motor Skills	374
CHAPTER 18 MOTOR ABILITIES AND MOTOR BEHAVIOR	375
<hr/>	
Definition of Motor Ability	375
General Motor Ability	378
Intelligence and Motor Behavior	387
CHAPTER 19 PRACTICE AND MOTOR BEHAVIOR	389
<hr/>	
Research on Practice	389
The Effects of Practice	390
Instruction before Practice	390
Practice Intentions	391
Amount of Practice	392
Practice Schedules	393
Practice under Fatigued Conditions	403
Mental Practice	405
CHAPTER 20 FEEDBACK AND MOTOR BEHAVIOR	411
<hr/>	
The Study of Feedback	412
Terminology and Feedback	413

Intrinsic Feedback	414
Augmented Feedback	415
Frequency and Withdrawal of Feedback	419
Delay of Feedback	422
Functions of Feedback	427
Manipulation of Feedback	432

CHAPTER 21 TRANSFER OF MOTOR LEARNING **433**

The Study of Transfer of Learning	434
Transfer and Similar Elements	437
Transfer and General Factors	447
Additional Factors and Transfer	451
General Principles of Transfer of Learning	454

CHAPTER 22 MOTIVATION: AN OVERVIEW **455**

The Study of Motivation	456
Definition and Function of Motivation	457
Motivation Terminology	457
Types of Needs	458
Motivation Theories	459
Measuring Motivation	465

CHAPTER 23 THE AUTONOMIC NERVOUS SYSTEM **471**

The Autonomic Nervous System	471
Autonomic Divisions	473
Autonomic Transmitters	478
Autonomic Control Levels	479
Autonomic Effects	485

CHAPTER 24 AROUSAL AND MOTOR BEHAVIOR **493**

The Concept of Arousal	493
The Study of Arousal	494
Neurological Basis of Arousal	495
Arousal and Emotion	498
Arousal and Motor Performance	499
Theories of Arousal and Performance	509
Measurement of Arousal	510
Arousal and Sports Performance	511
Manipulating Arousal	513
Arousal and Motor Learning	515

CHAPTER 25 THE DIRECTION OF MOTIVATION	519
<hr/>	
The Direction of Behavior	519
Categories of Needs	520
Motivation Techniques	523
Intrinsic and Extrinsic Motivation	536
References	539
<hr/>	
Index	583
<hr/>
