

CONTENTS.

List of figures.	xiii
List of tables.	xv
Part I. Introduction.	1
Chapter 1. The Background to this study.	1
1A. Theories and models of the origin of agriculture in the English literature.	1
1B. A brief literature on the origin of agriculture in China.	2
1C. Significant questions on the origin of agriculture in China and the objectives of this thesis.	7
Chapter 2. Terminology and definitions.	9
2A. General definitions.	9
2B. Temporal and geographic definitions.	9
2C. Definitions for tools and other stone implements.	9
2D. Definitions for pottery.	11
Part II. The Transition from Foraging to Farming in Central China.	12
Chapter 3. Palaeoenvironments and palaeoclimates from the terminal Pleistocene to the early Holocene in Central China.	12
3 A. Palaeoenvironments and palaeoclimates of Central China.	12
3B. Local natural resources.	16
Chapter 4. Archaeological discoveries in Central China.	28
4A. Archaeological assemblages in the western plateau/mountain region.	28
4B. Archaeological assemblages in the North China Plain.	35
Chapter 5. Discussion on the transition from foraging to farming in Central China.	60
5A. Toolkits as indicators of the transition from foraging to farming.	60
5B. The cultural relevance of the botanical characteristics of green foxtail during the transition from foraging to farming in Central China.	61
5C. Pottery as an indicator of cultural relationships between the early Neolithic assemblages in Central China.	64
Part III. The Transition from Foraging to Farming in the Yangzi River Valley.	67
Chapter 6. The palaeoenvironments and palaeoclimates from the terminal Pleistocene to the early Holocene in the Yangzi valley.	67
6A. Palaeoenvironments and palaeoclimates of the Yangzi valley.	67
6B. Natural resources in the Yangzi valley.	71
Chapter 7. Archaeological discoveries in the Yangzi valley.	86
7A. Archaeological assemblages in the middle Yangzi valley.	86
7B. Archaeological assemblages in the lower Yangzi valley.	93
Chapter 8. Discussion on the transition from foraging to farming in the Yangzi River basin.	115
8A. Toolkits as indicators of the transition from foraging to farming in the Yangzi valley.	115
8B. The cultural relevance of the botanical characteristics of wild rice during the transition from foraging to farming.	115
8C. Pottery comparison.	116
Part IV. Comparisons and Propositions - the Transition from Foraging to Farming in China.	119
Chapter 9. Foragers of the terminal Pleistocene in China.	119
9A. The subsistence strategies of the foragers - a toolkit comparison.	119
9B. The population densities of prehistoric foragers in China.	122
9C. The mobility of foragers.	123
9D. Pottery and foraging.	124

Chapter 10 Farmers of the Early Holocene in China.	127
10A. The subsistence strategy and the cultivars of the early farmers.	127
10B. Population densities and degrees of sedentism of the early farmers.	127
10C. Pottery of the early farmers.	128
10D. Cereal cultivation and animal husbandry.	130
10E. The social complexity of the early farmers.	130
Chapter 11. Hypotheses and propositions: the origin of agriculture in China.	133
11A. When did agriculture originate in China? - the chronology of early farmers in the Yellow and the Yangzi valleys.	133
11B. The WHERE question - one, two, or multiple centres?	133
11C. How did agriculture originate in China?	135
11D. "Why should I farm when there are so many mongongo nuts?" - the impetus for the origin of agriculture in China.	136
Summary and Remaining questions.	140
 Bibliography	 145
Illustrations (drawings and photographs).	159
Appendix I. A list of Latin and English names of plants commonly found in China.	231

List of Tables.

Table 3(1). Faunas of the Terminal Pleistocene in Central China.	19
Table 3(2). A brief summary of the terminal Pleistocene faunas in Central China.	24
Table 3(3). Faunas of the Early Holocene in Central China.	26
Table 3(4). The life schedule of green foxtail (<i>Setaria viridis</i>).	27
Table 4(1). Absolute dates for archaeological assemblages of the terminal Pleistocene in Central China.	41
Table 4(2). Lithic implements from the Xiachuan sites.	45
Table 4(3). Lithic implements from Xueguan.	45
Table 4(4). Lithic implements from Shizitan.	46
Table 4(5). Lithic implements from Shayuan.	46
Table 4(6). Lithic implements from Dadiwan.	47
Table 4(7). Radiocarbon dates for archaeological assemblages of the early Holocene in Central China.	48
Table 4(8). Lithic implements from Youfang.	53
Table 4(9). Lithic implements from Xibaimaying.	53
Table 4(10). Lithic implements from Hutouliang.	54
Table 4(11). Lithic implements from Xiaonanhai.	54
Table 4(12). Lithic implements from layer 3, Cishan.	55
Table 4(13). Organic implements from layer 3, Cishan.	55
Table 4(14). Lithic implements from layer 2, Cishan.	56
Table 4(15). Organic implements from layer 2, Cishan.	56
Table 4(16). Lithic implements from Lingjing.	57
Table 4(17). Lithic implements from the upper cave, Xiaokongshan.	57
Table 4(18). Lithic implements from the lower cave, Xiaokongshan.	58
Table 4(19). Lithic implements from Dagang.	58
Table 4(20). Lithic implements from Peiligang.	59
Table 4(21). Organic implements from Peiligang.	59
Table 5(1). Comparison of selected lithic implement categories, by number and percentage for major sites.	65
