

# Contents

LIST OF CONTRIBUTORS . . . . .	vii
PREFACE . . . . .	ix
<b>1 Central and Peripheral Mechanisms in Motor Control</b>	
<i>J. A. Scott Kelso and George E. Stelmach</i>	
I. Introduction . . . . .	1
II. Peripheral Mechanisms Underlying Movement Control . . . . .	8
III. Central Mechanisms Underlying Movement Control . . . . .	20
IV. Concluding Comments . . . . .	34
References . . . . .	35
<b>2 The Schema as a Solution to Some Persistent Problems in Motor Learning Theory</b>	
<i>Richard A. Schmidt</i>	
I. Introduction . . . . .	41
II. Limitations of Existing Theories . . . . .	42
III. A Possible Solution: The Schema Theory . . . . .	45
IV. Some Key Concerns Facing the Schema Theory . . . . .	51
References . . . . .	64
<b>3 Spatial Location Cues and Movement Production</b>	
<i>David G. Russell</i>	
I. Introduction . . . . .	67
II. Motor Control . . . . .	68
III. Coding and the Availability of Movement Cues . . . . .	73
IV. Spatial Location and Movement Control . . . . .	76
V. Evidence . . . . .	79
VI. Implications . . . . .	81
VII. Summary . . . . .	82
References . . . . .	83
<b>4 Issues for a Closed-Loop Theory of Motor Learning</b>	
<i>Jack A. Adams</i>	
I. Introduction . . . . .	87
II. Review of Adams' Closed-Loop Theory of Motor Learning . . . . .	88
III. The Motor Program . . . . .	92

IV. Schema . . . . .	100
V. General Conclusions . . . . .	105
References . . . . .	105
<b>5 The Structure of Motor Programs</b>	
<i>Steven W. Keele and Jeffery J. Summers</i>	
I. Introduction . . . . .	109
II. The Motor Program Concept . . . . .	110
III. Memory Structures of Motor Programs . . . . .	127
IV. Summary . . . . .	139
References . . . . .	140
<b>6 Attention and Movement</b>	
<i>Raymond M. Klein</i>	
I. Introduction . . . . .	143
II. Attention . . . . .	144
III. Perception of Movement . . . . .	149
IV. Production of Movement . . . . .	157
V. Conclusion . . . . .	170
References . . . . .	171
<b>7 Cognitive Information Processes in Motor Short-Term Memory and Movement Production</b>	
<i>Ronald G. Marteniuk</i>	
I. Introduction . . . . .	175
II. Coding Processes in Motor Short-Term Memory . . . . .	176
III. Movement Production: The Motor Schema . . . . .	181
IV. Coding of Movement Information: A Two-Stage Process . . . . .	184
References . . . . .	185
<b>8 Proprioception as a Basis of Anticipatory Timing Behavior</b>	
<i>Robert W. Christina</i>	
I. Introduction . . . . .	187
II. Proprioceptive Trace Hypothesis . . . . .	189
III. Proprioceptive Input Hypothesis . . . . .	192
IV. Issues and Trends . . . . .	196
References . . . . .	198
<b>9 Dimensions of Motor Task Complexity</b>	
<i>Keith C. Hayes and Ronald G. Marteniuk</i>	
I. Introduction . . . . .	201
II. Motor Programming and Response Complexity . . . . .	202
III. Information Processing and Complexity . . . . .	212
IV. Summary . . . . .	224
References . . . . .	225
SUBJECT INDEX . . . . .	229
