## I Reviews of Lateralization Development

|   |          |
|---|----------|
|   | <b>1</b> |
| Manual Specialization and the Developing Brain: An Overview                     |          |
| <i>GERALD YOUNG, CARL M. CORTER, SIDNEY J. SEGALOWITZ, and SANDRA E. TREHUB</i> |          |
| Introduction  | 3        |
| Questions   | 4        |
| Conclusions   | 12       |
| References  | 12       |

## 2 Is Early Reaching Left-Handed? Review of Manual Specialization Research

|  |    |
|--|----|
| <i>GERALD YOUNG, SIDNEY J. SEGALOWITZ, PAT MISEK, I. ERCAN ALP, and RENÉE BOULET</i> |    |
| Introduction   | 13 |
| Studies of Early Lateralized Manual Behaviors  | 14 |
| Discussion   | 27 |
| Conclusions  | 30 |
| References   | 30 |

**3****Development of Hand-Use Preference during Infancy**

GEORGE F. MICHEL

|  |    |
|--|----|
| Introduction                                     | 33 |
| The Development of Handedness                    | 35 |
| The Character of Human Handedness                | 41 |
| Antecedents of the Dextral Bias in Handedness    | 43 |
| Hypothetical Mechanisms of Biasing Allele Action | 52 |
| Conclusions                                      | 62 |
| References                                       | 63 |

**4****Mechanisms Underlying Instability in the  
Development of Hand Preference**

JACQUELINE LIEDERMAN

|   |    |
|---|----|
| Introduction  | 71 |
| The Unstable Course of the Development of Lateral Biases in Movement                              | 73 |
| The Multifactor Stochastic Model: Factors That Contribute toward<br>Congruency in Lateralization  | 77 |
| The Multifactor Stochastic Model: Factors That Contribute toward<br>Variability in Lateralization | 80 |
| Conclusions   | 88 |
| References  | 89 |

**5****Hemispheric Specialization in Infancy**

DENNIS L. MOLFESE and VICTORIA J. MOLFESE

|  |     |
|--|-----|
| Introduction   | 93  |
| Evidence of Hemispheric Specialization                       | 94  |
| Hemisphere Differences in Response to Specific Stimulus Cues | 97  |
| Conclusions  | 106 |
| References   | 107 |

**6****How Many Lateralitys Are There?**

SIDNEY J. SEGALOWITZ

|                              |     |
|------------------------------|-----|
| Introduction                 | 111 |
| Developmental Considerations | 113 |
| The Theorist's Problem       | 114 |
| References                   | 115 |

## II

# Theories of Lateralization Development

## 7

### Hemispheric Specialization Development: What (Inhibition) and How (Parents)

GERALD YOUNG, JAMES G. BOWMAN, CAROLE METHOT, MARY FINLAYSON, JANET QUINTAL,  
and PAUL BOISSONNEAULT

|   |     |
|---|-----|
| Introduction  | 119 |
| Research on Hemispheric and Manual Specialization Development | 129 |
| Conclusions   | 136 |
| References  | 138 |

## 8

### Differentiation and Lateral Specialization in Motor Development

MICHAEL PETERS

|                              |     |
|------------------------------|-----|
| Introduction                 | 141 |
| The Phylogenetic Perspective | 142 |
| The Ontogenetic Perspective  | 144 |
| Conclusions                  | 157 |
| References                   | 158 |

## 9

### Unimanual Hand Preference and Duplicated Syllable Babbling in Infants

DOUGLAS S. RAMSAY

|              |     |
|--------------|-----|
| Introduction | 161 |
| Method       | 164 |
| Results      | 167 |
| Conclusions  | 171 |
| References   | 174 |

## 10

### Laterality of Function in the Infant: Historical and Contemporary Trends in Theory and Research

LAUREN JULIUS HARRIS

|   |     |
|---|-----|
| Introduction  | 177 |
| Theories of Handedness                                | 178 |
| Empirical Studies of Hand Preference in Human Infants | 192 |
| Retrospect—and Prospect                               | 228 |
| References  | 239 |

**11**

# Developmental Models of Hemispheric Specialization: Insights Past and Present

CARL M. CORTER

|                            |     |
|----------------------------|-----|
| Discussion of the Chapters | 249 |
| Conclusions                | 252 |
| Reference                  | 253 |

**III**

## Neonatal Research

**12**

### Neonatal Reflexes: A Search for Lateral Asymmetries

SANDRA E. TREHUB, CARL M. CORTER, and NANCY SHOENBERG

|                        |     |
|------------------------|-----|
| Introduction           | 257 |
| Method                 | 260 |
| Results and Discussion | 263 |
| Conclusion             | 270 |
| References             | 272 |

**13**

### Familial Handedness, Prenatal Environmental Adversity, and Neonatal Lateral Organization

MICHAEL SALING

|              |     |
|--------------|-----|
| Introduction | 275 |
| Method       | 278 |
| Results      | 280 |
| Discussion   | 281 |
| References   | 283 |

**14**

### Postural Orientation in Human Infants: Changes from Birth to Three Months

LAUREN JULIUS HARRIS and HIRAM E. FITZGERALD

|                             |     |
|-----------------------------|-----|
| Introduction                | 285 |
| Infant Motor Skills Project | 286 |
| Discussion                  | 298 |
| Conclusions                 | 303 |
| References                  | 304 |

**15****Methods for the Quantitative Analysis of Infant Limb Movements**

JOHN M. DOWD and EDWARD Z. TRONICK

|                        |     |
|------------------------|-----|
| Introduction           | 307 |
| Method                 | 310 |
| Results and Discussion | 314 |
| References             | 316 |

**IV****Infant Research****16****Is There a Stage of Left-Sided Precocity during  
Early Manual Specialization?**

JACQUELINE LIEDERMAN

|              |     |
|--------------|-----|
| Introduction | 321 |
| Method       | 323 |
| Results      | 325 |
| Discussion   | 327 |
| References   | 329 |

**17****Hand Differences in Grasp Duration and Reaching in  
Two- and Five-Month-Old Infants**

PATRICIA R. HAWN and LAUREN JULIUS HARRIS

|              |     |
|--------------|-----|
| Introduction | 331 |
| Method       | 335 |
| Results      | 339 |
| Discussion   | 344 |
| References   | 347 |

**18****Laterality in Manipulatory and Cognitive-Related Activity in  
Four- to Ten-Month-Olds**

CAROLYN J. MEBERT

|              |     |
|--------------|-----|
| Introduction | 349 |
| Method       | 350 |
| Results      | 355 |
| Discussion   | 359 |
| References   | 364 |

**19****Lateral Bias in Reaching and Holding at Six and Twelve Months**

MICHAEL PETERS

|              |     |
|--------------|-----|
| Introduction | 367 |
| The Study    | 368 |
| Results      | 369 |
| Discussion   | 370 |
| References   | 374 |

**20****Relationships between Processing and Motor Asymmetries  
in Early Development**

DAVID J. LEWKOWICZ and GERALD TURKEWITZ

|  |     |
|--|-----|
| Introduction   | 375 |
| Asymmetries in Early Development   | 376 |
| Developmental Changes in Asymmetries   | 378 |
| The Relationship between Motor Functions and Processing Asymmetries in Infancy | 381 |
| A Developmental View of Hemispheric Specialization                             | 387 |
| Relationship between Specialization and Preferential Use of the Hands          | 390 |
| References   | 391 |

**21****Development of Manual Laterality and Language Function**

THERESE TREVES, ITA GOLDSCHMIDT, and AMOS D. KORCZYN

|                        |     |
|------------------------|-----|
| Introduction           | 395 |
| Methods                | 396 |
| Results and Discussion | 397 |
| References             | 400 |

**22****Changes, Constancies, and Continuities in Lateralization Development**

GERALD YOUNG

|  |     |
|--|-----|
| Changes and Constancies in Development | 401 |
| Continuities in Development            | 402 |
| Conclusions to the Volume              | 402 |

|              |     |
|--------------|-----|
| <i>Index</i> | 405 |
|--------------|-----|
