I. INTRODUCTION	1
1. Historical Background	3
Overview	3
Beginnings	4
II. ATTACHMENT	15
2. The Development of Attachment	17
Whence Attachment and Affection?	18
Larger Theoretical Context	19
Darwin and the Biological Sciences	19
General Systems Theory Applied to Attachment Behavior	21
The Maintenance of Regulation beyond Infancy	24
Ethology	24
Ethology's Origins	25
Human Ethology	28
The Impact of Ethology on the Study of Child Development	31
The Contribution of John Bowlby (1907–1990)	32
Attachment Theory	34
How Universal Is the Attachment Phenomenon in Humans?	40
3. Differential Attachment: Origins and Sequelae	43
The Contribution of Mary Ainsworth	43
The First Study: Uganda	45
The Second Study: Baltimore	48
Distribution of Attachment Types	50

Continuity of Attachment Classification over Time	52
The Role of Internal Working Models in Stability of Attachment Classification	52
Predictive Validity of Early Attachment Relationships and Their Developmental Sequelae	54
Differential Contribution of Caregiver and Infant to Observed Differences in Strange Situation Classifications	56
The Role of Temperament in Quality of Attachment	57
Maternal Personality Characteristics Associated with Differential Attachment Classifications	60
Attachment Patterns of Infants Exposed to Maltreatment	61
Children of Depressed Parents	63
Ecological Validity of the Strange Situation	63
Cross-Cultural Studies of Attachment	64
Effects of Day Care on Children's Emotional Development as Assessed by the Strange Situation	69
Attachment Research beyond Infancy and Early Childhood	70
Other Research on Attachment Relationships in Adult Life	72
Summary of Attachment Research and Commentary	76
Future Directions	79
III. EMOTION EXPRESSION AND ITS SOCIALIZATION	81
4. The First Wave of Research: Behaviorism and Psychoanalysis	83
Historical Overview: Taming the Human Passions	83
Earliest Studies of Infant Emotion	86
Earliest Observational Studies of Individual Children: The Baby Biographies	89
Earliest "Scientific" Studies of Emotion	94
Prelude to the Conditioning Research of Watson: Description of the Emotions and Their Elicitors	100
Earliest Experimental Studies of Emotion	102
Watson and the Conditioning of Fear	102
Mary Cover Jones and the Development of Counterconditioning	105
Experimental Tests of Watson's Claim of Innate Emotions	109
Large-Scale Observational Studies of Infants' and Children's Expressive Behavior	114
Contribution of Kathryn Bridges	115
The Infant Research of Charlotte Bühler	122
The Demise of Discrete Emotions	130
Psychoanalysis and Emotion	133
Freud	133

Spitz on the Development and Organization of Affect	135
The Middle Years: The Gradual Disappearance of Emotions Research	139
5. The Second Wave of Research: Functionalist and Cognitivist Approaches	141
Dawn of the Second Wave	142
Key Developmental Issues	143
Emotional Development in Infancy	143
Emotional Development beyond Infancy	144
Developmental Theories of Emotion	145
The Darwinian Lead	145
Functionalist Theories	146
The Cognitive/Constructivist Position	159
Ontogeny of Emotional Expression	168
The Delaware Project	168
The New York Project	169
6. Anger and Aggression	175
Overview	176
Early Writings on Anger Development	177
Anger in Bridges's Genetic Theory of Emotion	179
Florence Goodenough's Study	179
The Middle Years	181
Child Rearing in the 1950s and the Control of Anger	183
The Development of Aggression	185
The Second Wave	188
The Psychology of Anger in a Changing Culture	188
Anger in South Baltimore: The Influence of Class	190
Summary and Commentary	192
7. Empathy and Prosocial Behavior	195
Definitional Issues	196
Measurement	199
The Development of Empathy	200
Factors Influencing the Acquisition of Empathy	201
Age and Empathy	204
Hoffman's Model of the Development of Empathy	205
Discrete Emotions and Empathy	208
Studies of Sympathy: The Life and Work of Lois Barclay Murphy	209
Summary and Commentary	213

IV. EMOTION AND PERSONALITY DEVELOPMENT	217
8. The Role of Emotion in Personality: Organizational Models	219
Personality Theory: Past and Present	220
Modern Trait Theories of Personality	222
Gordon Allport (1897–1967)	222
The Five-Factor Model of Personality	225
Silvan Tomkins and Affect Theory	228
Biography of Tomkins (1911–1991)	228
Affect Theory: A Theory of Human Motivation	229
Socialization of Emotion	233
Script Theory	235
Relation between Scripts and Affects	236
Summary and Evaluation of Tomkins's Theory	237
9. A Discrete Emotions, Functionalist Analysis of Personality Development: Part I: The Fundamentals	239
Neofunctionalism and Discrete Emotions Theory	240
An Affective Analysis of Early Attachment Patterns	241
A Discrete Emotions, Functionalist Analysis of Development beyond Earliest Infancy	243
Affect Biases Information Processing	245
Affect Biases Coping Styles	247
Affect Biases Interpersonal Process	250
10. A Discrete Emotions, Functionalist Analysis of Personality Development: Part II: Illustrations from Biography and Empirical Research	253
A View of Personality from Biography	253
Anger and Personality Process	257
The Anger Organization	258
Ontogeny of the Anger Organization	261
Interpersonal Process Develops and Sustains the Organization	264
Shame/Shyness in Personality Process	268
The Shame/Shyness Organization	269
Ontogeny of the Shame/Shy Organization	272
Interpersonal Process Develops and Sustains the Organizations	274
Emotion Biases, Socialization, and Personality	277
Earliest Developmental Influences	277
Contagion, Imitation, and Self-Regulation	282
Processes in Later Development	284

11. Emotion and Personality Change	295
Overview	295
Literary and Biographical Examples of Lifecourse Change and Their Relation to Affect	308
Surprise, Emotional Disequilibrium, Appraisal, Reflection, and Change	311
Religious Conversion as a Prototype of Personality Change	312
Personality Change and War Experiences	315
Enduring Changes and the Processes That Support Them	317
Interpersonal Scaffolds of Personality Change	318
Support of Culture and Cognition	318
The Search for Confirmation	320
Summary and Future Directions	321
Afterword	323
References	325
Index	357
