<b>Introduction</b>	<b>3</b>

## **Question 1: Are There Basic Emotions? 5**

<i>James R. Averill: In the Eyes of the Beholder</i>	<b>7</b>
<i>Paul Ekman: All Emotions Are Basic</i>	<b>15</b>
<i>Jaak Panksepp: The Basics of Basic Emotion</i>	<b>20</b>
<i>Klaus R. Scherer: Toward a Concept of "Modal Emotions"</i>	<b>25</b>
<i>Richard A. Shweder: "You're Not Sick, You're Just in Love": Emotion as an Interpretive System</i>	<b>32</b>
<i>Paul Ekman and Richard J. Davidson: Afterword</i>	<b>45</b>

## **Question 2: How Are Emotions Distinguished from Moods, Temperament, and Other Related Affective Constructs? 49**

<i>Richard J. Davidson: On Emotion, Mood, and Related Affective Constructs</i>	<b>51</b>
<i>Paul Ekman: Moods, Emotions, and Traits</i>	<b>56</b>
<i>Nico H. Frijda: Varieties of Affect: Emotions and Episodes, Moods, and Sentiments</i>	<b>59</b>
<i>H.H. Goldsmith: Parsing the Emotional Domain from a Developmental Perspective</i>	<b>68</b>
<i>Jerome Kagan: Distinctions Among Emotions, Moods, and Temperamental Qualities</i>	<b>74</b>
<i>Richard Lazarus: The Stable and the Unstable in Emotion</i>	<b>79</b>

*Jaak Panksepp: Basic Emotions Ramify Widely in the Brain, Yielding Many Concepts That Cannot Be Distinguished Unambiguously . . . Yet* 86

*David Watson and Lee Anna Clark: Emotions, Moods, Traits, and Temperaments: Conceptual Distinctions and Empirical Findings* 89

*Richard J. Davidson and Paul Ekman: Afterword* 94

**Question 3: What Is the Function of Emotions?** 97

*James R. Averill: Emotions Are Many Splendored Things* 99

*Gerald L. Clore: Why Emotions Are Felt* 103

*Nico H. Frijda: Emotions Are Functional, Most of the Time* 112

*Robert W. Levenson: Human Emotions: A Functional View* 123

*Klaus R. Scherer: Emotion Serves to Decouple Stimulus and Response* 127

*Lee Anna Clark and David Watson: Distinguishing Functional from Dysfunctional Affective Responses* 131

*Paul Ekman and Richard J. Davidson: Afterword* 137

**Question 4: How is Evidence of Universals in Antecedents of Emotion Explained?** 144

*James R. Averill: It's a Small World, But a Large Stage* 143

*Paul Ekman: Antecedent Events and Emotion Metaphors* 146

*Phoebe C. Ellsworth: Some Reasons to Expect Universal Antecedents of Emotion* 150

*Nico H. Frijda: Universal Antecedents Exist, and Are Interesting* 155

*Richard Lazarus: Universal Antecedents of the Emotions* 163

*Klaus R. Scherer: Evidence for Both Universality and Cultural Specificity of Emotion Elicitation* 172

*Paul Ekman and Richard J. Davidson: Afterword* 176

**Question 5: What Are the Minimal Cognitive Prerequisites for Emotion?** 179

*Gerald L. Clore: Why Emotions Require Cognition* 181

*Phoebe C. Ellsworth: Levels of Thought and Levels of Emotion* 192

*Nico H. Frijda: Emotions Require Cognitions, Even If Simple Ones* 197

*Carroll E. Izard: Cognition Is One of Four Types of Emotion Activating Systems* 203

*Richard Lazarus: Appraisal: The Long and the Short of It* 208

*Joseph E. LeDoux: Cognitive-Emotional Interactions in the Brain* 216

<i>Jaak Panksepp: A Proper Distinction Between Affective and Cognitive Process Is Essential for Neuroscientific Progress</i>	224
<i>Klaus R. Scherer: An Emotion's Occurrence Depends on the Relevance of an Event to the Organism's Goal/Need Hierarchy</i>	227
<i>Richard J. Davidson and Paul Ekman: Afterword</i>	232
<b>Question 6: Is There Emotion-Specific Physiology?</b>	<b>235</b>
<i>Richard J. Davidson: Complexities in the Search for Emotion-Specific Physiology</i>	237
<i>Jeffrey A. Gray: Three Fundamental Emotion Systems</i>	243
<i>Joseph E. LeDoux: Emotion-Specific Physiological Activity: Don't Forget About CNS Physiology</i>	248
<i>Robert W. Levenson: The Search for Autonomic Specificity</i>	252
<i>Jaak Panksepp: The Clearest Physiological Distinctions Between Emotions Will Be Found Among the Circuits of the Brain</i>	258
<i>Richard J. Davidson and Paul Ekman: Afterword</i>	261
<b>Question 7: Can We Control Our Emotions?</b>	<b>263</b>
<i>James R. Averill: Emotions Unbecoming and Becoming</i>	265
<i>Joseph E. LeDoux: The Degree of Emotional Control Depends on the Kind of Personal System Involved</i>	270
<i>Robert W. Levenson: Emotional Control: Variations and Consequences</i>	273
<i>Paul Ekman and Richard J. Davidson: Afterword</i>	280
<b>Question 8: Can Emotions Be Nonconscious?</b>	<b>283</b>
<i>Gerald L. Clore: Why Emotions Are Never Unconscious</i>	285
<i>Joseph E. LeDoux: Emotional Processing, but Not Emotions, Can Occur Unconsciously</i>	291
<i>Robert B. Zajonc: Evidence for Nonconscious Emotions</i>	293
<i>Richard J. Davidson and Paul Ekman: Afterword</i>	298
<b>Question 9: What Is the Relation Between Emotion and Memory?</b>	<b>301</b>
<i>Gordon H. Bower: Some Relations Between Emotions and Memory</i>	303
<i>Richard Lazarus: The Past and the Present in Emotion</i>	306
<i>Joseph E. LeDoux: Memory Versus Emotional Memory in the Brain</i>	311
<i>Jaak Panksepp: Subjectivity May Have Evolved in the Brain as a Simple Value-Coding Process That Promotes the Learning of New Behaviors</i>	313

<i>Richard J. Davidson and Paul Ekman: Afterword</i>	<b>316</b>
<b>Question 10: How Do Individuals Differ in Emotion-Related Activity?</b>	<b>319</b>
<i>Richard J. Davidson: Honoring Biology in the Study of Affective Style</i>	<b>321</b>
<i>Jeffrey A. Gray: Personality Dimensions and Emotion Systems</i>	<b>329</b>
<i>Richard Lazarus: Individual Differences in Emotion</i>	<b>332</b>
<i>Mary K. Rothbart: Broad Dimensions of Temperament and Personality</i>	<b>337</b>
<i>Paul Ekman and Richard J. Davidson: Afterword</i>	<b>342</b>
<b>Question 11: What Develops in Emotional Development?</b>	<b>345</b>
<i>Linda A. Camras: Two Aspects of Emotional Development: Expression and Elicitation</i>	<b>347</b>
<i>Judy Dunn: Experience and Understanding of Emotions, Relationships, and Membership in a Particular Culture</i>	<b>352</b>
<i>Carroll E. Izard: Intersystem Connections</i>	<b>356</b>
<i>Richard Lazarus: Meaning and Emotional Development</i>	<b>362</b>
<i>Jaak Panksepp: Emotional Development Yields Lots of “Stuff” . . . Especially Mind “Stuff” That Emerges from Brain “Stuff”</i>	<b>367</b>
<i>Mary K. Rothbart: Emotional Development: Changes in Reactivity and Self-Regulation</i>	<b>369</b>
<i>Richard J. Davidson and Paul Ekman: Afterword</i>	<b>373</b>
<b>Question 12: What Influences the Subjective Experience of Emotion?</b>	<b>377</b>
<i>James R. Averill: I Feel, Therefore I Am—I Think</i>	<b>379</b>
<i>Gerald L. Clore: Why Emotions Vary in Intensity</i>	<b>386</b>
<i>Joseph E. LeDoux: Emotional Experience Is an Output of, Not a Cause of, Emotional Processing</i>	<b>394</b>
<i>Jaak Panksepp: Evolution Constructed the Potential for Subjective Experience Within the Neurodynamics of the Mammalian Brain</i>	<b>396</b>
<i>David Watson and Lee Anna Clark: The Vicissitudes of Mood: A Schematic Model</i>	<b>400</b>
<i>Paul Ekman and Richard J. Davidson: Afterword</i>	<b>406</b>
<b>Epilogue—Affective Science: A Research Agenda</b>	<b>409</b>
