PREFACE	xiii
I MECHANISTIC VERSUS COGNITIVE VIEWS	1
Introduction	1
<i>Animate versus inanimate behavior • Human behavior versus infrahuman behavior • Thought versus action as scientific data</i>	
Types of Mechanistic and Cognitive Theories	7
Learning and Motivation	9
II DRIVE THEORY	11
Historical Antecedents	12
<i>The instinct doctrine • Original conceptions of drive • Early experimental work • Summary</i>	
Scientists Who Influenced Hull	17
<i>Charles Darwin • John B. Watson • Edward L. Thorndike • Ivan P. Pavlov • Curt P. Richter • Alfred N. Whitehead and Bertrand Russell • Summary and prospectus</i>	
The Basic Concepts of Hull's Theory	23
<i>Learning • Drive • The integration of habit and drive • The emergence of incentives</i>	

Empirical Support for Drive Theory	40
<i>Investigations with infrahuman subjects •</i>	
<i>Investigations of human behavior • Evidence for</i>	
<i>drive as a pooled source of energy</i>	
Theoretical Extensions	57
<i>Frustration • Conflict</i>	
Associationism Without a Drive Construct	69
<i>Drive stimuli</i>	
Some Shortcomings of Drive Theory	76
<i>Problems in predicting speed of verbal learning •</i>	
<i>Problems in the conceptual analysis of incentives •</i>	
<i>The nondirective conception of drive and some</i>	
<i>experimental confounding • Secondary drive and</i>	
<i>secondary reinforcement • Conceptualization of</i>	
<i>frustration and conflict</i>	
General Summary	89
III FIELD THEORY	92
Historical Evolution	93
<i>Gestalt psychology • Lewin-Ach controversy</i>	
Theoretical Orientation	99
<i>The use of concepts • Field theory •</i>	
<i>Appropriate areas of psychological investigation</i>	
Formal Theory	105
<i>The life space • Concepts related to the person •</i>	
<i>Concepts related to the environment • Further</i>	
<i>discussion of hodological space</i>	
Drive Theory Reinterpreted	121
<i>Studies employing the Columbia Obstruction</i>	
<i>Box • The speed of consumption • The goal</i>	
<i>gradient • Secondary reinforcement</i>	
Further Extensions of the Theory	125
<i>Conflict • Frustration</i>	
Experiments Generated by Field Theory	137
<i>Task recall • Task resumption • Substitution •</i>	
<i>Satiation and cosatiation</i>	
Additional Areas of Investigation	152
<i>Psychological ecology • Level of aspiration</i>	
Summary	166

IV ACHIEVEMENT THEORY	169
Historical Evolution	169
<i>Henry Murray • McClelland's theory of personality and motivation</i>	
Achievement Motivation	175
<i>Assessment of the need for achievement • The arousal of motivation • The arousal of achievement needs • Individual differences in motive strength</i>	
The TAT as a Measure of Achievement Motivation	184
<i>Content validity • Criterion-related validity • Construct validity</i>	
Atkinson's Theory of Achievement Motivation	192
<i>General laws and individual differences: Introduction to the theory • Hope of success • Fear of failure • Resultant achievement motivation • Further elaboration of the model • Combining the motives</i>	
Derivations from the Theory and Supporting Evidence	203
<i>Free-choice behavior • Forced-choice behavior (risk preference) • Level of aspiration • Persistence of behavior in progress</i>	
Educational Implications of the Theory	215
<i>Vocational aspiration • Programmed instruction • Intelligence and motivation • Grade point average • Ability grouping • Major field of concentration</i>	
Success and Failure and Problems for the Achievement Model	226
<i>The motivational effects of failure • The motivational effects of success • Summary of motivational effects</i>	
A Modification of the Achievement Model	231
<i>Inertial motivation • Problem one: Explaining failure effects when $M_{AF} > M_s$ • Problem two: Disentangling stimulus from inertial effects • Further examination of the persistence of behavior • Summary • The reduction of inertial motivation</i>	
Another Look at Educational Practices	249
<i>Programmed learning • Grades • Item-difficulty sequence • Long-term goals</i>	
Conflict	252
Frustration	253

Comparison with Hullian and Lewinian Theory	254
Achievement Motivation in Society	257
<i>Training in achievement motivation</i>	
General Summary	268

V COGNITIVE APPROACHES AND ATTRIBUTION THEORY

270

Historical Background of the Cognitive Approach	271
Psychoanalytic Theory and Cognitive Controls	275
<i>Psychoanalytic models of thought and action • Cognitive style</i>	
Cognitive Determinants of Emotion	281
<i>Cognition, arousal, and emotion • The informational value of arousal</i>	
Cognitive Appraisal and Coping Behavior	286
Theories of Cognitive Consistency	289
<i>Cognitive balance • Cognitive dissonance</i>	
Research in Cognitive Dissonance	294
<i>Forced compliance and insufficient justification • Post-decisional dissonance • Motivational research • Resistance to extinction • General summary</i>	
Attribution Theory	310
<i>General theoretical orientation of attribution theory • Fritz Heider</i>	
Internal and External Attributions	317
<i>Attribution and emotional expression • Attribution and cognitive dissonance • Attribution in animal experimentation</i>	
Individual Differences in Causal Beliefs	332
<i>Social learning theory • Skill versus chance, reinforcement schedules, and resistance to extinction • Individual differences in locus of control</i>	
Other Work in Causal Attribution Based on Individual Differences	341
<i>Origin-pawn as a causal determinant • Intellectual achievement responsibility</i>	
An Attributional Model of Action	350
Summary	352

VI ACHIEVEMENT MOTIVATION AND ATTRIBUTION THEORY	354
The Perceived Causes of Success and Failure	354
<i>A classification scheme of the causal determinants • Antecedent conditions • Empirical investigations of cue utilization in achievement contexts</i>	
Achievement Needs and Causal Ascription	369
Causal Attribution and Affective Expression	374
<i>Inferred empirical evidence • Direct empirical evidence • Achievement needs, causal inferences, and affect • General summary</i>	
Causal Attribution and Expectancy Change	381
<i>Empirical evidence • General summary</i>	
Atkinson's Theory of Achievement Motivation	388
<i>Free choice • Persistence of behavior • Intensity of performance • Risk preference (forced choice) • Summary of behavioral consequences of causal ascription and the attributional analysis of achievement needs</i>	
Locus of Control Reevaluated	396
Experimental Extinction	398
<i>Experimental studies • Achievement dispositions and reinforcement schedules: A comparison</i>	
Morality	403
<i>Piaget's analysis of moral judgment • Morality and achievement motivation • Societal development: An attributional comparison of Piaget and Karl Marx</i>	
Educational Implications	409
<i>Ascriptions to ability or to effort • Motivated attributional errors • Attributional conflict • Teaching programs • Surveillance, trust, and grades • Achievement training programs</i>	
Summary	417
 VII REVIEW AND REINTERPRETATION: THE COGNITIVE ARGUMENT	 419
Deprivation and Tissue Injury States	419
<i>The mechanistic analysis • The cognitive analysis of drive states</i>	

Learned Drives	423
<i>The mechanistic analysis of fear • The cognitive conception of fear and emotion</i>	
Individual Differences in Emotional Reactivity	424
<i>The mechanistic analysis of verbal learning • The cognitive analysis of verbal learning</i>	
Resistance to Extinction	427
<i>The mechanistic analysis of extinction • The cognitive analysis of extinction</i>	
Issues for a Cognitive Psychology of Motivation	432
<i>Science versus ethnoscience • Levels of consciousness and a new methodology • The body-mind problem • A cognitive psychology of infrahumans • Quantitative exactness</i>
