Foreword by Jeffrey Gray	<i>page</i> ix
Preface	xi
<b>1 Introduction</b>	<b>1</b>
Some historical background and context	1
Why drive and motivation?	2
Motivation, reinforcement and purpose	8
Is there more than one form of learning?	13
Cognition	14
Examples of cognition and purpose	16
Scope	17
Aims of the study and general conclusions	17
<b>2 Where drive and motivation constructs have been employed</b>	<b>21</b>
Dethier's drive and motivation constructs	21
The instrumental behaviour criterion	22
Epstein's goal-direction model	23
Motivation as a response instigator	27
Drive as an intervening variable or summary	28
Drive as an energizer	30
Motivation as a mechanism involving decisions	32
Conclusions	33
<b>3 Models and theories of motivation</b>	<b>35</b>
Homeostatic models	35
Incentive-motivation	40
Drive and homeostasis	41
Incentive or 'hedonic' stimuli	41
Central motivational state	42
Responses and goal direction	44
Multiple relationships and flexibility	46
A systems theory model	47
Motivational isoclines	51
Intrinsic motivation	53
Ethology – K. Lorenz	53
A psychological approach	55
R. Herrnstein's view	56

The role of sensory pleasure – hedonism	58
The opponent-process theory of motivation	62
Conclusions	66
<b>4 Ingestive systems and motivational phenomena</b>	<b>68</b>
Drinking	68
Introduction	68
Bases of motivation	69
Satiety	71
Goal-directed behaviour and instrumental measures	74
Anticipatory factors	76
Sodium appetite and its satiation	77
Feeding	78
Introduction	78
Bases of feeding	78
Mechanisms of satiety	81
Suppression of feeding by loading energy	82
Hormones and satiety	83
Sensory-specific satiety	85
Problems inherent in dichotomizing between internal and external controls of feeding	85
The role of learning	87
Goal-seeking, instrumental behaviour and feeding	89
Formal control-theory models	89
Conclusions	91
<b>5 Comparison with non-ingestive motivational systems</b>	<b>93</b>
Temperature control	93
Introduction	93
Bases of motivation	94
Goal-directed behaviour and instrumental measures	95
Sex	96
Introduction	96
Bases of sexual motivation	97
Sensory-specific satiety	99
Goal-directed behaviour and instrumental measures	100
Fear and aggression	101
Introduction	101
Bases of fear and attack	101
Goal-directed behaviour and instrumental measures	103

Exploration	107
Introduction	107
The bases of exploratory behaviour	108
Inspective and inquisitive exploration	108
Goal-directed behaviour and instrumental measures	109
Self-administration of drugs	109
Introduction	109
An incentive-based model and some necessary qualifications	110
Theories of conditioning and relapse	112
Incentives and goals – a possible synthesis	113
Motivational systems compared	114
Priming and positive-feedback mechanisms	
Compensation	116
Conclusions	118
<b>6 Associations and motivation</b>	<b>121</b>
Bindra's model of learning	121
Contemporary learning theory	123
Future goals and predictive associations	124
Hedonic states and learning theory	125
The associations normally formed by the animal	128
Taste–taste associations	128
Taste–consequence associations	129
Maintenance of internal states by self-infusion	129
Constraints on learning	134
Conditioning of drives	135
Conclusions	139
<b>7 Models of the environment in the spatial dimension</b>	<b>140</b>
Representations of incentive objects	140
The Deutsch model	142
Some experiments that require a cognitive interpretation	142
Avoidance learning	143
Foraging in natural and semi-natural environments	147
Conclusions	148
<b>8 Interaction between motivational systems</b>	<b>151</b>
Gene perpetuation	152
On not being able to do two things, or be in two places, at once	153

Multiple relationships between internal states and incentives – integration	156
Conclusions	159
<b>9 Conclusions and outlook</b>	<b>161</b>
An incentive theory?	163
Comparisons between motivational systems	164
Internal and external factors and homeostasis	165
Extension to humans	167
Hedonism	168
Future states and present behaviour	168
Motivation and emotion	170
Formal modelling	171
References	172
Index	186
