Preface xi

## I Introduction and Overview

- 1 **Introduction** 3
  - PHYLOGENY 5
  - ONTOGENY 6
- 2 **A History of the Experimental Approach to Learning** 9
  - EMPIRICISM AND ASSOCIATIONISM 9
    - A Physical Account of Association / Early Scientific Studies
  - THORNDIKE'S CONNECTIONISM 13
  - THE GREAT AGE OF LEARNING THEORIES 18
  - GUTHRIE'S CONTIGUOUS CONDITIONING 20
  - HULL'S BEHAVIOR THEORY 24
  - TOLMAN'S PURPOSIVE BEHAVIORISM 28
  - SKINNER'S OPERANT CONDITIONING 33
  - RETROSPECTIVE: THE PROBLEM OF PURPOSE 37
- 3 **Habituation, Sensitization, Classical Conditioning** 40
  - HABITUATION 41
    - Stimulus-Specificity of Habituation / Rate of Habituation / The Interstimulus Interval / Generalization / Recovery and Dishabituation

	SENSITIZATION	52
	Dual-Process Theory / Interactions Between Habituation and Sensitization	
	CLASSICAL CONDITIONING	60
	Basic Principles / Temporal Relations Between Stimuli	
	RESPONSE PARAMETERS IN CONDITIONING	68
	The Conditional Response	
	STIMULUS PARAMETERS IN CONDITIONING	73
	Contingency Versus Contiguity / The Correlational View / The Rescorla–Wagner Model	
<b>4</b>	<b>Operant Conditioning</b>	<b>81</b>
	BASIC CONCEPTS	82
	MEASURING OPERANT BEHAVIOR	84
	Apparatus / Subjects	
	BASIC PHENOMENA	91
	Acquisition and Shaping / Modeling, Imitation, and Behavior Chains / Autoshaping / Schedules of Reinforcement / Extinction	
	APPLICATIONS IN BEHAVIOR THERAPY	101
	Systematic Desensitization	
	THE NATURE OF REINFORCEMENT	107
	Autoshaping Studies / The Premack Principle / Responding for Food with Food Already Present / Economical Distribution of Activities	

## II Research and Theory in Operant Behavior

<b>5</b>	<b>Stimulus Control</b>	<b>119</b>
	BASIC PRINCIPLES	120
	Generalization Gradients / Postdiscrimination Gradients / Behavioral Contrast / The Peak Shift and Gradients of Not-Responding / Interactions of Stimulus Control Gradients	
	THE SHARPENING OF STIMULUS CONTROL	143
	The Hull–Spence and Lashley Theories / Assessment of Stimulus Control Theories	
	ATTENTION	155
	General Principles and Phenomena / An Overview of Attention	
	CONCEPTUAL BEHAVIOR	165
<b>6</b>	<b>Conditioned Reinforcement</b>	<b>168</b>
	BEHAVIOR CHAINS	168
	EXPERIMENTAL TECHNIQUES	173
	STRENGTH OF CONDITIONED REINFORCERS	177
	Magnitude of Primary Reinforcement / Number of Pairings with Primary Reinforcement / Schedule of Primary Reinforcement / The Interreinforcement Interval	
	CHAINED SCHEDULES	182
	Chain Versus Tandem Schedules / Paired Brief Stimuli	
	BEHAVIOR MODIFICATION: THE TOKEN ECONOMY	186
	Psychiatric Patients / Classrooms / Correctional Institutions / Problems	

	THEORY OF CONDITIONED REINFORCEMENT	193
	Traditional Theories / Contemporary Theories	
	OBSERVING RESPONSES	198
<b>7</b>	<b>Choice Behavior</b>	<b>208</b>
	METHODS FOR STUDYING CHOICE	209
	CHOICE AS A TECHNIQUE	212
	CHOICE AND REINFORCER MAGNITUDE	214
	Concurrent-Interval and Concurrent-Ratio Schedules	
	CHOICE AND RATE OF REINFORCEMENT	217
	SUPERSTITION AND THE CHANGEOVER DELAY (COD)	218
	THE QUANTITATIVE LAW OF EFFECT	221
	Strengths and Limitations / Alternative Formulations	
	CHOICE FOR SCHEDULES OF REINFORCEMENT	227
	Molecular Characteristics of Choice	
	SELF-CONTROL	237
<b>8</b>	<b>Aversive Control</b>	<b>242</b>
	PUNISHMENT: AN EMPIRICAL OVERVIEW	243
	Maintenance of Punished Behavior / Parameters of Punishment /	
	Punishment as a Discriminative Stimulus / Conditioned Suppression	
	CURRENT THEORIES OF PUNISHMENT	251
	AVERSION THERAPY	257
	NEGATIVE REINFORCEMENT	258
	ESCAPE	259
	AVOIDANCE	262
	Discrete-Trial Avoidance / Free-Operant Avoidance / The Reinforcer	
	in Avoidance / Shock-Frequency Reduction Theory / The Role of	
	Pavlovian Processes in Avoidance / Extinction of Avoidance and	
	Self-Punitive Behavior / Learned Helplessness	

### III The Biological Perspective

<b>9</b>	<b>Species-Specific Behavior Patterns</b>	<b>295</b>
	THE CONCEPT OF INSTINCT	297
	The Anti-Instinct Revolt / Interaction of Heredity and Environment	
	EVOLUTION	306
	THE GENETICS OF BEHAVIOR	308
	THE ETHOLOGICAL APPROACH	310
	Techniques	
	ETHOLOGICAL THEORY	314
	Sign Stimuli / Fixed Action Patterns / The Hydraulic Model /	
	Alternatives to the Hydraulic Model	
	THE DEVELOPMENT OF SPECIES-SPECIFIC BEHAVIOR	329
	The Lehrman Experiments / Specific Hungers / The Rozin Experiments	
<b>10</b>	<b>The Natural History of Learning</b>	<b>340</b>
	THE NATURAL ENVIRONMENT	341

	GUSTATORY LEARNING, FORAGING, AND PREDATION	343
	Taste Aversion Learning / Taste Aversion Learning in the Wild / Learning to Locate Food	
	HOMING AND MIGRATION	356
	The Ontogeny of Pigeon Homing	
	IMPRINTING	363
	Sexual Imprinting / The Sensitive Period / The Function of Imprinting / Nonvisual Imprinting / Naturalistic Studies of Imprinting	
	SONG LEARNING IN BIRDS	376
	Developmental Stages in Singing / Biological Constraints on Song Development / Theories of Song Learning	
	THE NATURAL HISTORY APPROACH	386
<b>11</b>	<b>Invertebrate Learning I: Protozoa, Coelenterates, Platyhelminthes</b>	<b>387</b>
	PHYLOGENETIC DIVERSITY IN LEARNING	390
	PROTOZOA	391
	Associative Conditioning / Habituation	
	COELENTERATES	403
	Associative Conditioning / Habituation	
	PLATYHELMINTHES	412
	Classical Conditioning / Instrumental Conditioning / Reactive Inhibition / Habituation	
<b>12</b>	<b>Invertebrate Learning II: Annelids, Molluscs, Arthropods</b>	<b>423</b>
	ANNELIDS	424
	Habituation / Classical Conditioning / Instrumental Conditioning	
	MOLLUSCS	433
	Gastropods / Cephalopods	
	ARTHROPODS	453
	Insects / Laboratory Research / Field-Oriented Research	

## IV Integration

<b>13</b>	<b>Toward an Integrated Approach to Behavior</b>	<b>473</b>
	THE NATURE-NURTURE QUESTION	475
	LABORATORY AND FIELD	476
	The Problem of Validity / Methods for Increasing Validity	
	LABORATORY ANALOGUES TO NATURAL PHENOMENA	481
	Multiple Response Environments / Foraging	
	THE CHALLENGE TO REINFORCEMENT THEORY	494
	EPILOG	498
