Preface xv

Part I Conceptual foundations of behavior modification 1

1 Behavior modification: An overview 4

Definition of behavior modification 5

The history of behavior modification 6

Behavior modification and “mental health” professions 9

Behavior modification at work 11

Behavior as subject matter 12

Choice of methodology 14

Drawing conclusions 16

Ethical issues 17

The relevance of behavior modification 18

Summary 19

Suggested readings 20

2 The scientific emphasis in behavior modification 21

The goals of a scientific approach 21

Truth, certainty, and probable inference 23

Criteria in science 25

Testability 25

Objectivity and operationism 26

Scientific subject matter versus scientific methodology	29
Causation, correlation, and determinism	30
The limitations of science	32
Summary	34
Suggested readings	35

3 The role of inferred variables 36

Intervening variables and hypothetical constructs	36
Mentalism versus behaviorism	38
<i>Mentalism</i>	38
<i>Behaviorism</i>	41
<i>A final note</i>	46
Inferred variables in behavior modification	46
Summary	50
Suggested readings	50

4 Data collection and research design 51

Data collection	52
<i>Classes of behavioral data</i>	52
<i>Methods of data collection</i>	53
<i>Data collection formats</i>	55
<i>Summary</i>	55
Research design	55
<i>The experimental design</i>	56
<i>The case study</i>	56
<i>Intrasubject experimental designs</i>	58
<i>Intersubject experimental designs</i>	67
Summary	72
Suggested readings	72

5 Data analysis and interpretation 74

Nonstatistical data analysis	75
<i>Criteria for nonstatistical method</i>	75
<i>Possible shortcomings</i>	78
Statistical data analysis	79
<i>Basic statistical method</i>	79
<i>Possible shortcomings</i>	82
The approaches compared	85
Interpretation of data	85
Summary	86
Suggested readings	87

6 Models of behavior change 93

- The medical model 93
- Intrapsychic or quasi-medical models 95
 - Psychoanalytic theory* 95
 - Other intrapsychic approaches* 97
 - Implications of intrapsychic models* 97
 - Criticisms of the intrapsychic model* 101
- The behavioral approach 102
 - The behavioral model and learning* 104
 - Implications of the behavioral view* 108
- Summary 110
- Suggested readings 110

7 Principles of operant conditioning 111

- Reinforcement 113
 - Positive reinforcement* 113
 - Negative reinforcement* 117
- Punishment 118
- Operant extinction 120
- Reinforcement schedules 121
- Shaping 125
- Chaining 126
- Prompts 128
- Discrimination and stimulus control 129
- Generalization 130
 - Stimulus generalization* 130
 - Response generalization* 131
- Summary 132
- Suggested readings 133

8 Cognitive influences in behavior modification 134

- Cognitive processes and environmental events 135
- Contributions of cognitive psychology 137
 - Attribution* 137
 - Placebo reaction and demand characteristics* 139
 - Problem solving* 141
 - Verbal mediators of behavior* 145
 - Imaginal mediators of behavior* 149
- Summary 151
- Suggested readings 152

9 Assessment and treatment strategies	153
Experimental/clinical model	155
Clinical assessment	156
<i>Model for assessment</i>	<i>156</i>
<i>Areas of assessment</i>	<i>157</i>
Treatment strategies	162
Examples of experimental/clinical approaches	163
A final note	169
Summary	169
Suggested readings	170

10 Ethical issues	171
Free will, determinism, and responsibility	171
Behavior control and countercontrol	174
Behavioral freedom and humanistic issues	177
Summary	178
Suggested readings	179

Part III Applications of behavior modification 181

11 Anxiety management	183
Definition and measurement of anxiety	184
Nature and development of anxiety as a clinical problem	187
Targets of anxiety management	189
Behavioral approaches to anxiety management	191
<i>Systematic desensitization</i>	<i>191</i>
<i>Modeling</i>	<i>195</i>
<i>Flooding and implosion</i>	<i>197</i>
Some concluding comments	198

12 Behavioral formulations of depression	200
Definitions of depression	201
Measurement of depression	203
The experimental/clinical approach to depression	204
Socio-environmental model	205
<i>Development of depression</i>	<i>206</i>
<i>Treatment strategies</i>	<i>209</i>
Learned helplessness model	215
Cognitive model	216
<i>Development of depression</i>	<i>216</i>
<i>Treatment strategies</i>	<i>218</i>
Self-reinforcement model	219
<i>Development of depression</i>	<i>219</i>

Treatment strategies 220
An integrative model 222

13 Behavior modification in the classroom 227

Praise and ignore technique 228

With individual children 228

With entire class 229

Back-up reinforcers: The token economy 231

Program with individual contingencies 234

Program with group contingencies 235

Punishment in the classroom 236

Response cost 236

Time out from positive reinforcement 237

Verbal reprimands 238

Current topics of research 239

Peers as behavior modifiers 239

Self-control 240

Sociometric behavior 240

Generalization 241

Concluding comments 242

14 Treating the hospitalized person 243

Questions about mental hospitals 244

Who goes there? 244

Are admissions rates decreasing? 245

What are the costs? 246

Treatment in the hospital setting 247

Psychotherapy and drugs 247

Family therapy 248

Individually tailored behavioral programs 248

Token economy programs 249

Comprehensive behavioral or psychiatric rehabilitation 252

Why a comprehensive program? 252

Areas for rehabilitation 254

Example of a comprehensive program 255

Recent and future directions 258

15 Behavior management in medical and nursing practice 260

Relationship of medical and behavioral treatments 263

The bio-behavioral model 264

Behavioral intervention 265

Behavior management and the somatic systems 266

Cardiovascular system 266

<i>Respiratory system</i>	269
<i>Dermatological system</i>	272
<i>Gastrointestinal system</i>	274
<i>Gynecological system</i>	277
<i>Neurological systems</i>	277
<i>Musculoskeletal system</i>	280
<i>Genitourinary system</i>	282
<i>A final note</i>	283
Patient self-management through behavioral technology	283
<i>Self-medication</i>	284
<i>Self-prevention</i>	284
Behavioral self-examination for health professionals	284
<i>Measurement and monitoring</i>	285
Emerging themes in behavioral health care	286
The future	288
16 Behavioral principles and experimental communities	289
Can a science of behavior help solve the problems of experimental communities?	290
The University of Kansas Experimental Living Project	293
The worksharing system	294
<i>Conceptual analysis</i>	294
<i>Behavioral solution</i>	296
The coordinating system	299
<i>Conceptual analysis</i>	299
<i>Behavioral solution</i>	300
The governance system	303
<i>Conceptual analysis</i>	303
<i>Behavioral solution</i>	304
An overview	307
A peek at the future	309
17 The teaching-family model of group home treatment	310
Description of the program	312
Evaluation of the program	314
18 Behavior modification in prisons	321
Development of the controversy	322
Three examples of behavioral prison programs	324
<i>Patuxent Institution</i>	324
<i>START</i>	327
<i>The Rehabilitation Research Foundation</i>	331
Implementing the behavioral model in prisons	333

- Problems stemming from conflicting roles of a prison* 333
- Steps for implementing a behavioral model* 335
- Ethical issues* 337

19 Sexual deviation 341

- Development of behavioral approaches 342
 - Aversion therapy* 342
 - Expanding the approach* 344
- Assessment of patterns of sexual arousal 346
 - Verbal report* 346
 - Attitudinal measures* 346
 - Physiological measures of sexual arousal* 347
- New developments in treatment of sexual deviation 352
 - Development of alternative treatments* 352
 - Example of behavioral treatment* 353
- A concluding note 360

20 Social skills training 361

- Social skills and behavior disorders 363
 - Historical antecedents* 363
 - Assertive training* 364
 - Social skills and treatment of depression* 365
 - Social skills and treatment of minimal dating* 367
- Assessment and treatment 368
 - Measurement of social skills deficits* 368
 - Current treatment procedures* 371
 - Generalization and maintenance of therapeutic gains* 373
- A concluding note 375

21 Alcohol and drug abuse 376

- Definition of abuse 378
- Etiology of drug abuse 378
 - Sociological factors* 378
 - Physiological factors* 379
 - Psychological factors* 380
 - Specific maintaining factors* 381
- Traditional treatment approaches 383
- Assessment techniques 383
 - Self-report measures* 383
 - Physiological measures* 383
 - Behavioral measures* 384
- A model behavioral treatment program 385
 - Decreasing drug-taking behavior* 385

<i>Teaching incompatible behaviors</i>	388
<i>Rearranging environmental contingencies</i>	390
Community self-help groups	392
Overview	393

22 Behavioral management of obesity 394

Behavior modification principles used	396
<i>Consequent control of behavior</i>	396
<i>Antecedent stimulus control</i>	398
<i>Additional procedures</i>	399
Research issues	400
<i>Attrition rate</i>	401
<i>Standardized improvement criteria</i>	401
<i>Intermediate and long-term followups</i>	401
<i>Research strategies and significance</i>	402
<i>Reinforce the reporting of individual differences</i>	402
A comprehensive behavioral program	402
<i>Assessment stage</i>	405
<i>Treatment program stage</i>	409
<i>Maintenance followup stage</i>	412
<i>Human factors</i>	413

23 Quitting smoking 414

Development and maintenance of motivation to quit smoking	416
<i>Motivational impediment</i>	416
<i>Behavioral treatments</i>	417
Withdrawal symptoms	418
<i>Addiction or habituation?</i>	418
<i>Physical symptoms</i>	418
<i>Behavioral treatments</i>	419
Habit in smoking	420
<i>Extent of the habit</i>	420
<i>Behavioral treatments</i>	421
The needs filled by smoking	426
<i>Reasons for smoking</i>	426
<i>Behavioral treatments</i>	428
A concluding note	429

24 Behavioral treatment of marital problems 431

Marital relationships	432
Behavioral view of marriage and its problems	434
Intervention procedures	436
<i>Pinpointing and discrimination training</i>	436

Communication skills training 440
Problem solving and negotiation training 442
Contingency contracting 443
A concluding note 446

25 The future of behavior modification 447

Behavior modification 450
Reinforcement mechanisms 452
Aggression and altruism 454
Group processes and behavior change 454
Taxonomy and diagnosis 455
Social systems analysis 456
Reactance and countercontrol 458
Self-regulation and self-control 459
Control of physiological responses 460
Language and thinking 461
Summary and conclusion 461
