Preface	xi

## PART I. INTRODUCTION

1. Aims and justifications	3
2. Explanatory and integrative status of current theories	10
1 Concepts of personality and motivation	10
2 Concepts of interaction	19
3 A metatheoretical comment	26

## PART II. TOWARDS A NEW MODEL

3. An outline of cognitive structure and process concepts	31
1 Structures and processes	31
2 Cognitive data considered as information	33
3 The information processing system	39
4. Memory and the representation of knowledge	51
1 Memory and perception	52
2 The organization of knowledge structures	55
3 The 'languages' of cognitive structures	68
5. Social determinants of cognitive structures	78
1 Informational analysis of the social environment	79
2 Socialization interpreted as cognitive development	87
3 Parental socialization strategies and their effects	100
6. The cognitive-semantic representation of motivation and personality	125
1 Antecedent considerations	125
2 Traits and goals as cognitive structures	131
3 The semantic representation of behavioural strategies and their goals	159

## PART III. RETROSPECTIVE AND PROSPECTIVE APPLICATIONS

<b>Introduction</b>	187
<b>7. Some implications for some currently dominant models</b>	189
1 Social cognition	189
2 Psycho-dynamic concepts	193
<b>8. A cognitive-semantic model of anxiety</b>	208
1 Inadequacy of arousal explanations	208
2 Derivation of cognitive model	210
3 Tests of cognitive model	213
4 Further evidence for semantic coding of anxiety	228
<b>9. The cognitive structures and processes of stress vulnerability</b>	234
1 Problems of definition	234
2 Varieties of stressor-strain vulnerability	241
3 Stressor-strain avoidance or 'coping'	248
4 Pathological structures and processes	265
<b>10. Implications for the role of intelligence, and for social conflict</b>	278
1 Intelligence and the referent-attribute structures of goal-directed behaviour	279
2 Social conflict and the referent-attribute structures of goal-directed behaviour	289
3 A last but obviously not final word	309
